COMPLAINT DESCRIPTION:

Regarding the gas transmission line in Blue Ash, specifically located off of Bluewing Terrace. In addition to the obvious safety and health concerns as a result of having such a risky transmission line installed, has Duke completed environmental studies to identify the environmental impact of deforestation, e.g. accelerated soil degradation caused by erosion and flooding? Will our drainage system handle the run off? Right now, the drainage system for Blue Wing Terrace (cul de sac) is not sufficient in managing hard rainfall. I have seen the erosion in the backyard of a

neighbor whose home is on the cul de sac of Southgate. On Cooper Road, our backyards experience flooding during heavy rainfalls. Deforestation-induced erosion can undermine drainage systems and cause considerable flooding as water finds the path of least resistance, down the hillside to the homes on Cooper Road. I am not a proponent of installing a gas transmission line of this caliber in our Blue Ash Community and believe it should be directed in an area less dangerous to residential and business residents.
