COMMENT DESCRIPTION:

Duke Energy is proposing an extensive pipeline extension right through a densely populated area (referred to as the GREEN Line) of our beautiful neighborhood. Please note, the neighbors and community members here are STRONGLY opposed to having a gas pipeline extension built through such a densely populated area. It will adversely affect our neighborhoods in too many ways to count and will decrease our home values. There is already an existing pipeline running

north and south through Park Hills. The current siting of the GREEN LINE has it running on the north side of Glendale Milford Road until it is west of Park Hills property, where it will then cross to the south side. However, this siting is not yet fixed and subject to change. If the GREEN LINE is selected and the pipeline is sited on the south side of Glendale Milford Road, the impact on Park Hills homeowners would be terrible. Not only would all owners see property values decline, people would begin to leave. In addition to this, we would experience risks and extreme traffic issues during implementation of this project. Please make note of the very active, high sentiment against this proposed project here in our communities. It's something everyone is talking about, and no one wants. Please do not approve this project plan on the Green Line. These are beautiful neighborhoods, and the communities here will neither benefit from the pipeline extension, nor support it. This project will result in neighborhood exodus, resulting economic ramifications, and potentially much worse. Please respond to assure me you have heard this concern and will weigh it carefully.
