COUNTY: Not Selected

COUNTRY: USA

COMPANY_NAME: Duke Energy or any Gas Transmission Pipeline Request

CASE_NUMBER:

COMMENTS: Does the OPSB, in their decisions on gas transmissions pipelines, such as the Duke Central Corridor Project, take into consideration the unnessessary risk associated with a 30 inch gas pipeline being laid within 200 feet of an elementary school when ruling with on a company's plans, or is the OPSB only concerned with the environmental impact and "public need" stated in the mission statement?

Furthermore, does the OPSB scrutinize a company's route selection process so as to understand what less risky routes could have been taken to maintain public safety, but may have cost Duke more?

If the OPSB is not concerned with these items, what Ohio regulatory body is concerned?

Thank you
