Subject: Duke Pipeline

Please do not allow the proposed Duke high pressure natural gas pipeline to be routed through our beautiful village. It is a potential danger to this populated area. It is our understanding that these pipelines are generally routed through rural areas. Also, the safety record of these high pressure natural gas pipelines does not to generate confidence.

We live only a block from one of the proposed routes. The construction of it alone would be extremely disruptive along the very busy road. The Village's police and fire departments are located on this road as well. Construction would no doubt impair these vital services.

Please consider what a disaster it would be if there were an explosion in this populated area. Don't allow Duke to build this pipeline.
