To Whom It May Concern:

I'd like to echo my wife's concerns listed below regarding the safety and security of running a high pressure gas line through residential areas and especially if the proposed / designated route goes anywhere by any schools. We specifically moved into Blue Ash as a family in December 2015 to send our child to Sycamore Community Schools with Blue Ash Elementary being our first stage in that process. Having potentially hazardous and dangerous gas infrastructure so close to young students (and/or homes) is unacceptable in my opinion and has caused us to consider alternative means of education and potential relocation to ensure our child's safety.

Accidents can and do happen. Please uphold the community responsibility to ensure that the citizens, and especially our children, are as safe as possible.

Thank you.

Jason

In regards to Duke Energy's proposed Central Corridor Pipeline Extension project 16-253-GA-BTX. This project is extremely concerning to me. One of the proposed routes goes directly past what we had hoped to be our daughters elementary school. This pipeline will directly endanger my child's life and the lives of all the children and staff at the Blue Ash Elementary School. How can I send my child to school with confidence that she will be safe? How will the school continue to thrive if families feel they should pull their students out of this school for concern for their safety? Please take into consideration all the young lives that could be lost if an "accident" happened. Thank you.
