Subject: Case # 16-0253-GA-BTX Susan Carter Sycamore Township Ohio Resident

I am writing with a question re: case#16-0253-GA-BTX involving Duke Energy Central Corridor Pipeline Extension. I attended a open house last evening , 6/15/2016, which was billed as a way to have questions answered about the project. The question I asked repeatedly was in regards to the specific criteria used to determine the route. All the answers I received were vague and most definitely off the point. I was told that Duke Energy "cannot give a specific answer until the project is filed". I was also told "the OPSB requires us to make the pipeline a straight shot to keep it economical". What I would like to know from you is if the specific criteria (as referred to above) is available or not to the public? Also is it true you require a "straight shot" even if large areas of much less populated land is available within a few miles of the proposed line?

I appreciate your time in considering this question.
