16-0253-GA-BTX

This is to inform you we are totally opposed to Duke Energy's proposal to bring a transmission line through the neighborhood of Blue Ash, Ohio. This 12 mile long, 30 inch diameter and pressured at over 700psi line, is a danger to us as residents, as well as a hazard to our environment, our health, and poses a devaluing of our property.

Our city of Blue Ash has spent millions of dollars developing our new and beautiful Summit Park. One of the proposed routes would require the front section to be dug up for the pipeline which is money throwaway. In addition, the pipeline route would run directly in front of the Blue Ash University of Cincinnati campus! This is a densely populated area.

Please find another route and please do NOT approve this application.
