To Whom It May Concern,

PUCO

As a resident of Hamilton County in Cincinnati, Ohio and more specifically a resident of the neighborhood known as Pleasant Ridge, I am writing to voice my concerns regarding the Duke Energy proposal for a high pressure natural gas pipeline that would run through my community.

I am opposed to the pipeline for the following reasons:

1. The pipeline would run through densely populated areas comprised of neighborhoods, schools, businesses, daycare centers, churches and businesses
2. The pipeline would be dangerous, as shown by other similar pipelines in the past.
3. It would decrease my property value and quality of life.
4. The pipeline would damage the environmental integrity of the land.

It is not just pipeline development in my neighborhood that I am opposed to - it is the routing of the pipeline through ANY residential area that is very worrisome.

Each of the routes proposed by Duke Energy for the Central Corridor Extension Pipeline poses a danger to residential areas.

Residential safety should be of greater concern than company profit. Duke Energy should spend the money necessary to route this pipeline through non-residential areas.

Sincerely,

  
Leslie Hadaway
