- 6. The Respondent has authorization from the Public Utilities Commission of Ohio (PUCO) to incur short-term debt of up to \$500 million through bank facilities and the utility money pool. The Respondent has the ability to borrow from its regulated affiliates and FirstEnergy to meet its short-term working capital requirements. FirstEnergy Service Company administers this money pool and tracks surplus funds of FirstEnergy and the respective regulated subsidiary, as well as proceeds available from bank borrowings. Companies receiving a loan under the money pool agreements must repay the principal amount of the loan, together with accrued interest, within 364 days of borrowing the funds. The rate of interest is the same for each company receiving a loan from their respective pool and is based on the average cost of funds available through the pool. The average interest rate for borrowings in the year ended December 31, 2015 was 0.84% per annum.

NOTES TO FINANCIAL STATEMENTS (Continued)						

## 1. ORGANIZATION, BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The Cleveland Electric Illuminating Company (CEI), is a wholly owned subsidiary of FirstEnergy Corp. (FE), and is incorporated in Ohio. CEI operates an electric distribution system in Ohio. CEI is subject to regulation by the Public Utilities Commission of Ohio (PUCO) and the Federal Energy Regulatory Commission (FERC).

#### Basis of Presentation

The accompanying financial statements have been prepared in accordance with FERC accounting requirements as set forth in the Uniform System of Accounts and accounting releases, which differ from Generally Accepted Accounting Principles in the United States of America (GAAP). The significant differences between FERC and GAAP related to these financial statements include the following:

- Wholly owned subsidiaries that are consolidated under GAAP are accounted for under the equity method of accounting under FERC. As such investment in subsidiaries are reflected under the equity method of accounting on the FERC income statement, balance sheet and cash flow statement, and on a consolidated basis on the GAAP income statement, balance sheet and cash flow statement.
   The current portion of long-term debt, long-term assets or long-term liabilities is not reported separately on the FERC balance sheet.
- sheet.

  | Deferred Income Taxes are recorded on a gross basis on the FERC balance sheet with deferred tax assets and deferred tax
- Deferred Income Taxes are recorded on a gross basis on the FERC balance sheet with deferred tax assets and deferred tax liabilities being reported separately.
- Asset removal costs are classified as accumulated depreciation on the FERC balance sheet and as regulatory liabilities on the GAAP balance sheet.
- For income statement purposes, there are differences in items included in Operating Income and Other Income and Deductions under GAAP and FERC reporting, including costs which are recorded in operating expenses for GAAP and non-operating expenses for FERC.
- Regulatory Assets and Liabilities per GAAP differ from Regulatory Assets and Liabilities per FERC because Account 189, Unamortized loss on reacquired debt and Account 257, Unamortized gain on reacquired debt are regulatory assets and liabilities for GAAP statements but not for FERC statements.
- Capital leases are recorded on a net basis in Plant in Service on the FERC balance sheet.
- Estimated interest and penalties related to uncertain tax positions are recorded as part of interest expense and penalties respectively for FERC statements and as income tax expense for GAAP statements.
- Other Comprehensive Income pages 122a-b are not audited per FERC instructions.

CEI complies with the regulations, orders, policies and practices prescribed by FERC and the PUCO. The preparation of financial statements requires management to make periodic estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and disclosure of contingent assets and liabilities. Actual results could differ from these estimates. The reported results of operations are not indicative of results of operations for any future period.

# **ACCOUNTING FOR THE EFFECTS OF REGULATION**

CEI accounts for the effects of regulation through the application of regulatory accounting since its rates are established by a third-party regulator with the authority to set rates that bind customers, are cost-based and can be charged to and collected from customers. CEI records regulatory assets and liabilities that result from the regulated rate-making process that would not be recorded under GAAP for non-regulated entities. These assets and liabilities are amortized in the Statements of Income concurrent with their recovery or refund through customer rates. CEI believes that it is probable that its regulatory assets and liabilities will be recovered and settled, respectively, through future rates.

## **REVENUES AND RECEIVABLES**

CEI's principal business is providing electric service to customers in Ohio. CEI's retail customers are metered on a cycle basis. Electric revenues are recorded based on energy delivered through the end of the calendar month. An estimate of unbilled revenues is calculated to recognize electric service provided from the last meter reading through the end of the month. This estimate includes many factors, among which are historical customer usage, load profiles, estimated weather impacts, customer shopping activity and prices in effect for each class of customer. In each accounting period, CEI recognizes the estimated unbilled amount receivable as revenue and reverses the related prior period estimate.

Receivables from customers include distribution and retail electric sales to residential, commercial and industrial customers. There was no material concentration of receivables as of December 31, 2015 and 2014, with respect to any particular segment of CEI's customers. Billed and unbilled customer receivables were \$59 million and \$53 million, respectively, as of December 31, 2015, and

NOTES TO FINANCIAL STATEMENTS (Continued)						

were \$61 million and \$46 million, respectively, as of December 31, 2014.

## PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment reflects original cost (net of any impairments recognized), including payroll and related costs such as taxes, employee benefits, administrative and general costs, and capitalized interest incurred to place the assets in service. The costs of normal maintenance, repairs and minor replacements are expensed as incurred. CEI recognizes liabilities for planned major maintenance projects as they are incurred.

CEI provides for depreciation on a straight-line basis at various rates over the estimated lives of property included in plant in service. Depreciation expense was approximately 3.1% of average depreciable property in 2015 and 2014.

CEI reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The recoverability of a long-lived asset is measured by comparing its carrying value to the sum of undiscounted future cash flows expected to result from the use and eventual disposition of the asset. If the carrying value is greater than the undiscounted cash flows, an impairment exists and a loss is recognized for the amount by which the carrying value of the long-lived asset exceeds its estimated fair value. CEI utilizes the income approach, based upon discounted cash flows to estimate fair value.

## ASSET RETIREMENT OBLIGATIONS (ARO)

CEI has recognized applicable legal obligations for AROs and its associated cost primarily relating to closure of coal ash disposal sites. In addition, CEI has recognized conditional retirement obligations, primarily for asbestos remediation.

Conditional retirement obligations associated with tangible long-lived assets are recognized at fair value in the period in which they are incurred if a reasonable estimate can be made, even though there may be uncertainty about timing or method of settlement. When settlement is conditional on a future event occurring, it is reflected in the measurement of the liability, not in the recognition of the liability.

CEI's ending ARO balance as of December 31, 2015 and 2014 was \$3 million. Accretion recorded during 2015 and 2014 was insignificant.

## **GOODWILL**

In a business combination, the excess of the purchase price over the estimated fair values of the assets acquired and liabilities assumed is recognized as goodwill. CEI evaluates goodwill for impairment annually on July 31 and more frequently if indicators of impairment arise. In evaluating goodwill for impairment, CEI assesses qualitative factors to determine whether it is more likely than not (that is, likelihood of more than 50 percent) that its fair value is less than its carrying value (including goodwill). If CEI concludes that it is not more likely than not that its fair value is less than its carrying value, then no further testing is required. However, if CEI concludes that it is more likely than not that its fair value is less than its carrying value or bypasses the qualitative assessment, then the two-step quantitative goodwill impairment test is performed to identify a potential goodwill impairment and measure the amount of impairment to be recognized, if any.

No impairment of goodwill was indicated as a result of testing in 2015 and 2014. In 2015 and 2014, CEI performed a quantitative assessment using a discounted cash flow analysis. In 2015, the fair value of CEI exceeded its carrying value by approximately 14%. Key assumptions incorporated in the discounted cash flow analysis requiring significant management judgment included: a discount rate, growth rates, projected operating income, changes in working capital, projected capital expenditures, projected funding of pension plans, expected results of future rate proceedings, and a terminal value growth rate. The July 31, 2015 assessment included a discount rate of 5.75% and a terminal value growth rate of 1.63%. Lower than forecasted revenue growth and a higher discount rate could have a negative impact on future goodwill assessments.

## **INVESTMENTS**

All temporary cash investments purchased with an initial maturity of three months or less are reported as cash equivalents on the Balance Sheets at cost, which approximates their fair market value. Investments other than cash include notes receivable.

# **NEW ACCOUNTING PRONOUNCEMENTS**

In May 2014, the Federal Accounting Standards Board (FASB) issued, Accounting Standards Update (ASU) 2014-09 "Revenue from Contracts with Customers", requiring entities to recognize revenue by applying a five-step model in accordance with the core principle

	<del></del>
FERC FORM NO. 1 (ED. 12-88)	Page 123,2

Name of Respondent	This Report is:	Date of Report	Year/Period of Report			
	(1) X An Original	(Mo, Da, Yr)	.			
Cleveland Electric Illuminating Company, The	(2) _ A Resubmission	11	2015/Q4			
NOTES TO FINANCIAL STATEMENTS (Continued)						

to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the accounting for costs to obtain or fulfill a contract with a customer is specified and disclosure requirements for revenue recognition are expanded. In August 2015, the FASB issued a final Accounting Standards Update deferring the effective date until fiscal years beginning after December 15, 2017. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, (the original effective date). The standard shall be applied retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. CEI is currently evaluating the impact on its financial statements of adopting this standard.

In February 2015, the FASB issued, "Consolidations: Amendments to the Consolidation Analysis", which amends current consolidation guidance including changes to both the variable and voting interest models used by companies to evaluate whether an entity should be consolidated. This standard is effective for interim and annual periods beginning after December 15, 2015, and early adoption is permitted. A reporting entity must apply the amendments using a modified retrospective approach by recording a cumulative-effect adjustment to equity as of the beginning of the period of adoption or apply the amendments retrospectively. CEI does not expect this amendment to have a material effect on its financial statements.

In January of 2016, the FASB issued ASU 2016-01, "Financial Instruments-Overall: Recognition and Measurement of Financial Assets and Financial Liabilities". Changes to the current GAAP model primarily affect the accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. In addition, the FASB clarified guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale debt securities. The ASU will be effective in fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption can be elected for all financial statements of fiscal years and interim periods that have not yet been issued or that have not yet been made available for issuance. PN is currently evaluating the impact on its financial statements of adopting this standard.

## 2. PENSIONS AND OTHER POSTEMPLOYMENT BENEFITS

FE provides noncontributory qualified defined benefit pension plans that cover substantially all of its employees and non-qualified pension plans that cover certain employees, including employees of CEI. The plans provide defined benefits based on years of service and compensation levels. In addition, FE provides a minimum amount of noncontributory life insurance to retired employees in addition to optional contributory insurance. Health care benefits, which include certain employee contributions, deductibles and co-payments, are also available upon retirement to certain employees, their dependents and, under certain circumstances, their survivors. CEI recognizes its allocated portion of the expected cost of providing pension and Other Post-Employment Benefits (OPEB) to employees and their beneficiaries and covered dependents from the time employees are hired until they become eligible to receive those benefits. CEI also recognized its allocated portion of obligations to former or inactive employees after employment, but before retirement, for disability-related benefits. In 2014, the qualified pension plan was amended authorizing a voluntary cashout window program for certain eligible terminated participants with vested benefits. Payment of benefits for participants that elected an immediate lump sum cash payment or an annuity resulted in a \$40 million reduction to the underfunded status of the pension plan. Additionally, during 2015 and 2014, certain unions ratified their labor agreements that ended subsidized retiree health care resulting in a reduction to the OPEB benefit obligation by approximately \$10 million and \$97 million, respectively. There was no reduction to CEI's share of its OPEB net liability resulting from the 2015 and 2014 amendments.

FE recognizes as a pension and OPEB mark-to-market adjustment the change in the fair value of plan assets and net actuarial gains and losses annually in the fourth quarter of each fiscal year and whenever a plan is determined to qualify for a remeasurement. The remaining components of pension and OPEB expense, primarily service costs, interest on obligations, assumed return on assets and prior service costs, are recorded on a monthly basis. CEI's mark-to-market adjustment for the years ended December 31, 2015 and 2014 were \$3 million (\$6 million net of amounts capitalized) and \$59 million (\$37 million net of amounts capitalized), respectively. In 2015, the pension and OPEB mark-to-market adjustment primarily reflects lower than expected asset returns as well as the impact of other demographic assumptions including revisions to the mortality assumptions partially offset by a 25 basis point increase in the discount rate.

FE's pension and OPEB funding policy is based on actuarial computations using the projected unit credit method. During the year ended December 31, 2015, FE made contributions of \$143 million to its qualified pension plan. In 2016, FE has minimum required funding obligations of \$381 million to its qualified pension plan with \$160 million contributed to date. Pension and OPEB costs are affected by employee demographics (including age, compensation levels and employment periods), the level of contributions made to the plans and earnings on plan assets. Pension and OPEB costs may also be affected by changes in key assumptions, including anticipated rates of return on plan assets, the discount rates and health care trend rates used in determining the projected benefit obligations for pension and OPEB costs. FE uses a December 31 measurement date for its pension and OPEB plans. The fair value of the plan assets represents the actual market value as of the measurement date.

FE's assumed rate of return on pension plan assets considers historical market returns and economic forecasts for the types of investments held by the pension trusts. In 2015, FE's qualified pension and OPEB plan assets experienced losses of \$(172) million, or

ı			110	/==	12-88)

NOTES TO FINANCIAL STATEMENTS (Continued)						

(2.7)% compared to earnings of \$387 million, or 6.2% in 2014, and assumed a 7.75% rate of return for each year on plan assets which generated \$476 million and \$496 million of expected returns on plan assets, respectively. The expected return on pension and OPEB assets is based on the trusts' asset allocation targets and the historical performance of risk-based and fixed income securities. The gains or losses generated as a result of the difference between expected and actual returns on plan assets will increase or decrease future net periodic pension and OPEB cost as the difference is recognized annually in the fourth quarter of each fiscal year or whenever a plan is determined to qualify for remeasurement.

During 2014, the Society of Actuaries published new mortality tables and improvement scales reflecting improved life expectancies and an expectation that the trend will continue. An analysis of FE pension and OPEB plan mortality data indicated the use of the RP2014 mortality table with blue collar adjustment for females and projection scale SS2014INT was most appropriate as of December 31, 2015. As such, the RP2014 mortality table with projection scale SS2014INT was utilized to determine the 2015 benefit cost and obligation as of December 31, 2015 for the FE pension and OPEB plans.

CEI's allocated share of pension and OPEB costs (credits) and CEI's share of net liability, including the mark-to-market adjustment was as follows:

	= =	ended iber 31,
(In millions)	2015	2014
Pension plans	(\$1)	\$40
OPEB	(\$8)	(\$12)
Pension plan liability	\$93	\$96
OPEB plan liability	\$34	\$34

## 3. LEASES

CEI leases certain office space and other property and equipment under cancelable and noncancelable leases.

Operating lease expense which includes rent expense for the use of office space and other property and equipment owned by affiliated companies for the years ended December 31, 2015 and 2014 was \$4 million for both years. CEI's estimated future minimum lease payments for capital and operating leases as of December 31, 2015 with initial or remaining lease terms in excess of one year are as follows:

<i>a</i>		224-		2012		T1		Less: amount reprenting interest	net minimum capital lease
(In millions)	2016	2017	2018	2019	2020	Thereafter	<u>Total</u>	and fees	payments
Capital Leases	<del></del>	\$4	\$3	\$2	\$2	\$5	\$20	\$2	\$18
Operating Leases	\$2	\$2	\$1	\$1	\$1	\$1	\$8	n/a	n/a

The carrying amounts of assets recorded under capital lease agreements included in "Property, plant and equipment, net" on CEI's Consolidated Balance Sheets as of December 31, 2015 and 2014 were \$17 million and \$19 million, respectively.

# 4. REGULATORY MATTERS

## STATE REGULATION

CEI's retail rates, conditions of service, issuance of securities and other matters are subject to regulation in Ohio by the PUCO. In addition, under Ohio law, municipalities may regulate rates of a public utility, subject to appeal to the PUCO if not acceptable to the utility.

# OHIO

The Ohio Companies (CEI, Ohio Edison Company (OE) and The Toledo Edison Company (TE)) operate under their Electric Security Plan (ESP) 3 plan which expires on May 31, 2016. The material terms of ESP 3 include:

- ☐ A base distribution rate freeze through May 31, 2016;
  - Collection of lost distribution revenues associated with energy efficiency and peak demand reduction programs;
- Economic development and assistance to low-income customers for the two-year plan period at levels established in the prior ESP;
- A 6% generation rate discount to certain low income customers provided by the Ohio Companies through a bilateral

NOTES TO	NOTES TO FINANCIAL STATEMENTS (Continued)						

On January 27, 2016, certain parties filed a complaint at FERC against FES, Ohio Edison Company (OE), CEI, and The Toledo Edison Company (TE) that requests FERC review of the ESP IV PPA under Section 205 of the Federal Power Act (FPA). FES, OE, CEI and TE responded to the complaint on February 23, 2016 and March 9, 2016. In a separate proceeding, on March 21, 2016, a number of generation owners filed a complaint against PJM requesting that FERC expand the Minimum Offer Price Rule in the PJM Tarriff to prevent the alleged artificial suppression of prices in the PJM capacity markets by state-subsidized generation, in particular the ESP IV PPA and other similar agreements. The complaint asked that FERC issue an order by May 1, 2016, so the revised rule can be in effect for the May 2016 PJM capacity auction. FES, OE, CEI, and TE intend to respond to the complaint. In addition to such proceedings, parties have expressed an intention to challenge in the courts and/or before FERC, the PPA or PUCO approval of the ESP IV, if approved. Management intends to vigorously defend against such challenges.

Under Ohio's energy efficiency standards (SB221 and Substitute Senate Bill No. 310 (SB310)), and based on the Ohio Companies' amended energy efficiency plans, the Ohio Companies are required to implement energy efficiency programs that achieve a total annual energy savings equivalent of 2,266 Gigawatt-Hours (GWH) in 2015 and 2,288 GWHs in 2016, and then begin to increase by 1% each year in 2017, subject to legislative amendments to the energy efficiency standards discussed below. The Ohio Companies are also required to retain the 2014 peak demand reduction level for 2015 and 2016 and then increase the benchmark by an additional 0.75% thereafter through 2020, subject to legislative amendments to the peak demand reduction standards discussed below.

On September 30, 2015, the Energy Mandates Study Committee issued its report related to energy efficiency and renewable energy mandates, recommending that the current level of mandates remain in place indefinitely. The report also recommended: (i) an expedited process for review of utility proposed energy efficiency plans; (ii) ensuring maximum credit for all of Ohio's Energy Initiatives; (iii) a switch from energy mandates to energy incentives; and (iv) a declaration be made that the General Assembly may determine energy policy of the state. No legislation has yet been introduced to change the standards described above.

On March 20, 2013, the PUCO approved the three-year energy efficiency portfolio plans for 2013-2015, originally estimated to cost the Ohio Companies approximately \$250 million over the three-year period, which is expected to be recovered in rates. Actual costs may be lower for a number of reasons including the approval of the amended portfolio plan under SB310. On July 17, 2013, the PUCO modified the plan to authorize the Ohio Companies to receive 20% of any revenues obtained from offering energy efficiency and Demand Response reserves into the PJM auction. The PUCO also confirmed that the Ohio Companies can recover PJM costs and applicable penalties associated with PJM auctions, including the costs of purchasing replacement capacity from PJM incremental auctions, to the extent that such costs or penalties are prudently incurred. ELPC and OCC filed applications for rehearing, which were granted for the sole purpose of further consideration of the issue. On September 24, 2014, the Ohio Companies filed an amendment to their portfolio plan as contemplated by SB310, seeking to suspend certain programs for the 2015-2016 period in order to better align the plan with the new benchmarks under SB310. On November 20, 2014, the PUCO approved the Ohio Companies' amended portfolio plan. Several applications for rehearing were filed, and the PUCO granted those applications for further consideration of the matters specified in those applications.

On September 16, 2013, the Ohio Companies filed with the Supreme Court of Ohio a notice of appeal of the PUCO's July 17, 2013 Entry on Rehearing related to energy efficiency, alternative energy, and long-term forecast rules stating that the rules issued by the PUCO are inconsistent with, and are not supported by, statutory authority. On October 23, 2013, the PUCO filed a motion to dismiss the appeal, which is still pending. The matter has not been scheduled for oral argument.

Ohio law requires electric utilities and electric service companies in Ohio to serve part of their load from renewable energy resources measured by an annually increasing percentage amount through 2026, subject to legislative amendments discussed above, except 2015 and 2016 that remain at the 2014 level. The Ohio Companies conducted RFPs in 2009, 2010 and 2011 to secure RECs to help meet these renewable energy requirements. In September 2011, the PUCO opened a docket to review the Ohio Companies' alternative energy recovery rider through which the Ohio Companies recover the costs of acquiring these RECs. The PUCO issued an Opinion and Order on August 7, 2013, approving the Ohio Companies' acquisition process and their purchases of RECs to meet statutory mandates in all instances except for certain purchases arising from one auction and directed the Ohio Companies to credit non-shopping customers in the amount of \$43.4 million, plus interest, on the basis that the Ohio Companies did not prove such purchases were prudent. On December 24, 2013, following the denial of their application for rehearing, the Ohio Companies filed a notice of appeal and a motion for stay of the PUCO's order with the Supreme Court of Ohio, which was granted. On February 18, 2014, the OCC and the ELPC also filed appeals of the PUCO's order. The Ohio Companies timely filed their merit brief with the Supreme Court of Ohio and the briefing process has concluded. The matter is not yet scheduled for oral argument.

On April 9, 2014, the PUCO initiated a generic investigation of marketing practices in the competitive retail electric service market, with a focus on the marketing of fixed-price or guaranteed percent-off Standard Service Offer (SSO) rate contracts where there is a provision that permits the pass-through of new or additional charges. On November 18, 2015, the PUCO ruled that on a going-forward basis, pass-through clauses may not be included in fixed-price contracts for all customer classes. On December 18, 2015, FES filed an Application for Rehearing seeking to change the ruling or have it only apply to residential and small commercial customers.

NOTES TO FINANCIAL STATEMENTS (Continued)				

## **FEDERAL REGULATION**

With respect to its wholesale services and rates, CEI is subject to regulation by FERC. Under the Federal Power Act, FERC regulates rates for interstate wholesale sales, accounting and other matters.

FERC regulates the sale of power for resale in interstate commerce in part by granting authority to public utilities to sell wholesale power at market-based rates upon showing that the seller cannot exert market power in generation or transmission or erect barriers to entry into markets. CEI has been authorized by FERC to sell wholesale power in interstate commerce and has a market-based rate tariff on file with FERC; although major wholesale purchases remain subject to regulation by relevant state commissions. As a condition to selling electricity on a wholesale basis at market-base rates, CEI, like other entities granted market-based rate authority, must file electronic quarterly reports with FERC listing its sales transactions for the prior quarter.

#### **RELIABILITY MATTERS**

Federally-enforceable mandatory reliability standards apply to the bulk electric system and impose certain operating, record-keeping and reporting requirements on CEI. North American Electric Reliability Corporation (NERC) is the the Electric Reliability Organization designated by FERC to establish and enforce these reliability standards, although NERC has delegated day-to-day implementation and enforcement of these reliability standards to eight regional entities, including Reliability First Corporation (RFC). All of FE's facilities, including those of CEI, are located within the RFC region. FE actively participates in the NERC and RFC stakeholder processes, and otherwise monitors and manages its companies in response to the ongoing development, implementation and enforcement of the reliability standards implemented and enforced by RFC.

FE believes that it is in compliance with all currently-effective and enforceable reliability standards. Nevertheless, in the course of operating its extensive electric utility systems and facilities, FE occasionally learns of isolated facts or circumstances that could be interpreted as excursions from the reliability standards. If and when such occurrences are found, FE develops information about the occurrence and develops a remedial response to the specific circumstances, including in appropriate cases "self-reporting" an occurrence to RFC. Moreover, it is clear that NERC, RFC and FERC will continue to refine existing reliability standards as well as to develop and adopt new reliability standards. Any inability on FE's part to comply with the reliability standards for its bulk electric system could result in the imposition of financial penalties, and obligations to upgrade or build transmission facilities, that could have a material adverse effect on CEI's financial condition, results of operations and cash flows.

## **FERC MATTERS**

Regional Transmission Organization Realignment

In a May 31, 2011 order, FERC ruled that the costs for certain "legacy Regional Transmission Expansion Plan" transmission projects in PJM approved before CEI affiliate American Transmission Systems, Incorporated (ATSI) joined PJM could be charged to transmission customers in the ATSI zone, which includes CEI's service territory. The amount to be paid, and the question of derived benefits, is pending before FERC as a result of a June 25, 2014 order from a divided three-judge panel of the United States Court of Appeals for the Seventh Circuit's which ruled that FERC had not quantified the benefits that western PJM utilities would derive from certain new 500 Kilovolt or higher lines and thus had not adequately supported its decision to socialize the costs of these lines. The majority found that eastern PJM utilities are the primary beneficiaries of the lines, while western PJM utilities are only incidental beneficiaries, and that, while incidental beneficiaries should pay some share of the costs of the lines, that share should be proportionate to the benefit they derive from the lines, and not on load-ratio share in PJM as a whole. The court remanded the case to FERC, which issued an order setting the issue of cost allocation for hearing and settlement proceedings. Settlement discussions under a FERC-appointed settlement judge are ongoing.

The outcome of this proceeding and its impact, if any, on CEI cannot be predicted at this time.

# 5. COMMITMENTS AND CONTINGENCIES

# **ENVIRONMENTAL MATTERS**

Various federal, state and local authorities regulate CEI with regard to air and water quality and other environmental matters. Compliance with environmental regulations could have a material adverse effect on CEI's earnings and competitive position to the extent that CEI competes with companies that are not subject to such regulations and, therefore, do not bear the risk of costs associated with compliance, or failure to comply, with such regulations.

NOTES TO FINANCIAL STATEMENTS (Continued)						

## **OTHER LEGAL PROCEEDINGS**

Other Legal Matters

There are various lawsuits, claims (including claims for asbestos exposure) and proceedings related to CEI's normal business operations pending against CEI and its subsidiaries. The loss or range of loss in these matters is not expected to be material to CEI or its subsidiaries. The other potentially material items not otherwise discussed above are described under Note 4, Regulatory Matters of the Notes to Consolidated Financial Statements.

CEI accrues legal liabilities only when it concludes that it is probable that it has an obligation for such costs and can reasonably estimate the amount of such costs. In cases where CEI determines that it is not probable, but reasonably possible that it has a material obligation, it discloses such obligations and the possible loss or range of loss if such estimate can be made. If it were ultimately determined that CEI or its subsidiaries have legal liability or are otherwise made subject to liability based on any of the matters referenced above, it could have a material adverse effect on CEI's or its subsidiaries' financial condition, results of operations and cash flows.

## 6. TRANSACTIONS WITH AFFILIATED COMPANIES

CEI's operating revenues, operating expenses, interest income and interest expenses include transactions with affiliated companies. These affiliated company transactions include affiliated company power sales agreements between FE's competitive and regulated companies, support service billings, interest on affiliated company notes including the money pools and other transactions.

FE's competitive companies at times provide power through affiliated company power sales to meet a portion of the Utilities' POLR and default service requirements. The primary affiliated company transactions for CEI during the two years ended December 31, 2015 and 2014 are as follows:

		2015	_	2014	
	(In millions)				
Revenues:	\$	9	\$	9	
Expenses:					
Purchased power from affiliates		59		60	
Support services		51		45	
Interest Expense:		4		4	

FE does not bill directly or allocate any of its costs to any subsidiary company. Costs are allocated to the CEI from FESC, a subsidiary of FE. The majority of costs are directly billed or assigned at no more than cost. The remaining costs are for services that are provided on behalf of more than one company, or costs that cannot be precisely identified and are allocated using formulas developed by FESC. The current allocation or assignment formulas used and their bases include multiple factor formulas: each company's proportionate amount of FE's aggregate direct payroll, number of employees, asset balances, revenues, number of customers, other factors and specific departmental charge ratios. Management believes that these allocation methods are reasonable. Intercompany transactions with FE and its other subsidiaries are generally settled under commercial terms within thirty days.

# 7. STATEMENT OF CASH FLOWS - As required by instructions on Page 121

As of December 31,		2015		2014	
Cash (Account 131) Working Fund (Account 135) Temporary Cash Investments (Account 136)	\$	1,358	\$	1,394	
Cash and Cash Equivalents at End of Year  SUPPLEMENTAL DISCLOSURE OF CASH FLOW INFORMATION:  Cash paid during the year:	\$	1,358	\$	1,394

### Schedule Page: 261 Line No.: 33 Column: a

#### Basis of Allocation:

Respondent is included in the consolidated Federal Income Tax Return filed by FirstEnergy Corp., which includes its wholly owned subsidiaries. Federal income tax liability is allocated on the basis of each member's United States Federal tax liability. The total Federal Income Tax liability of each member will be no more than if it were to file an individual tax return. This is in accordance with IRC Section 1552 and Treasury Regulation 1.1502-33(d)(3) and 1.1552-1(a)(2).

	COMMON UTILITY PLANT AND EX	L PENSES					
COMMON UTILITY PLANT AND EXPENSES  1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.  2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.  3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.  4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

ST Stores Factor WS Workstation Support

'Direct' indicates that 100% of the costs assess to one legal entity

MA – Each Subsidiary benefiting from receiving the product or service will be charged a proportion of the Indirect Costs. The FirstEnergy Holding Co bears 5% of the product or service costs being allocated. The remaining 95% of the costs will be allocated between the Utility and Non-Utility Subsidiaries based on FirstEnergy's equity investment in the respective groups. A subsequent step then allocates among the Utility Subsidiaries based upon the "Multiple Factor - Utility" (MU) method and among the Non-Utility Subsidiaries based upon the "Multiple Factor - Non-Utility" (MN) method, both explained below.

MN – Each Non-Utility Subsidiary benefiting from receiving the product or service will be charged a proportion of the Indirect Costs based upon the total assets of each Non-Utility Subsidiary, including the generating assets under operating leases to the Utility Subsidiaries.

MT – The product or service costs being charged are allocated 100% between Utility and Non-Utility Subsidiaries in the same manner as MA above. Unlike MA, FirstEnergy Holding Co does not bear any of the allocation.

MU – Each Utility Subsidiary benefiting from receiving the product or service will be charged a proportion of the Indirect Costs based upon the sum of the weighted averages of (1) Gross transmission and/or distribution plant; (2) Operating and maintenance expense excluding purchase power and fuel costs: and (3) Transmission and/or distribution revenues, excluding transactions with affiliates. Each of the 3 components is weighted equally.

TX – Each Utility Subsidiary benefiting from receiving the product or service will be charged a proportion of the Indirect Costs based upon the sum of the weighted averages of (1) Gross transmission plant; (2) Operating and maintenance expense excluding purchase power and fuel costs; and (3) Transmission revenues, excluding transactions with affiliates. Each of the 3 components is weighted equally.

### Case No. 14-1297-EL-SSO

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Provide for a Standard Service Offer Pursuant to R.C. § 4928.143 in the Form of an Electric Security Plan

### RESPONSES TO REQUEST

OCC Set 22 – INT-51

customers.

Please identify measures the Companies can take to reduce their cash requirements during the term of ESP IV without impairing their ability to render distribution service to their

# Response:

Objection. The request is vague and ambiguous in its use of the terms "measures," "reduce," "cash requirements," "impairing" and "render their distribution service." This request also seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. In addition, this request seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry. Further, this request calls for speculation, and seeks an improper narrative response. See Penn Cent. Transp. Co. v. Armco Steel Corp., 271 N.E.2d 877 (Montgomery Co., 1971) (improper use of discovery device or interrogatory to require detailed narrative response). Subject to and without waiving the foregoing objections, no analysis has been conducted.

Subject to and without waiving the foregoing objections, no analysis has been conducted.

OCC Set 22 Witness: Eileen M. Mikkelsen As to Objections: Carrie M. Dunn

#### Case No. 14-1297-EL-SSO

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Provide for a Standard Service Offer Pursuant to R.C. § 4928.143 in the Form of an Electric Security Plan

#### **RESPONSES TO REQUEST**

OCC Set 22 – INT-56 Please identify potential reductions in operations and maintenance expenses that may be undertaken during the term of ESP IV without impairing the companies' ability to render distribution service to their customers.

Response:

Objection. The request is vague and ambiguous in its use of the terms "potential reductions," "impairing" and "render distribution service." This request also seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. In addition, this request seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry. Further, this request calls for speculation, and seeks an improper narrative response. See Penn Cent. Transp. Co. v. Armco Steel Corp., 271 N.E.2d 877 (Montgomery Co., 1971) (improper use of discovery device or interrogatory to require detailed narrative response). Subject to and without waiving the foregoing objections, no analysis has been conducted.

Sierra Club Set 13 Witness: Eileen M. Mikkelsen As to Objections: Carrie M. Dunn

#### Case No. 14-1297-EL-SSO

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Provide for a Standard Service Offer Pursuant to R.C. § 4928.143 in the Form of an Electric Security Plan

#### **RESPONSES TO REQUEST**

SC Set 13 – INT-237 In the event that Modified Rider RRS were to result in a credit for customers in any particular year, explain how the Companies would pay such credits, and identify each potential source of funds the Companies could use to do so.

#### Response:

Objection. The request is vague and ambiguous as to the term "pay such credits." Further, the request seeks an improper narrative response. See Penn Cent. Transp. Co. v. Armco Steel Corp., 271 N.E.2d 877 (Montgomery Co., 1971) (improper use of discovery device or interrogatory to require detailed narrative response). Subject to and without waiving the foregoing objections, Rider RRS credits will not result in cash payments to customers. Rather, customers' overall electric bills will be reduced, thereby lowering the amount of cash received by the Companies.

Sierra Club Set 14 Witness: Eileen M. Mikkelsen As to Objections: Carrie M. Dunn

#### Case No. 14-1297-EL-SSO

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Provide for a Standard Service Offer Pursuant to R.C. § 4928.143 in the Form of an Electric Security Plan

#### **RESPONSES TO REQUEST**

- SC Set 14 Refer to your response to SC-INT-237. With regards to your statement that Rider RRS credits would "lower[] the amount of cash received by the Companies":
  - a. State whether such lowering of the amount of cash received by the Companies as a result of Rider RRS credits could factor into whether the Companies are entitled to receive a rate increase in a future proceeding.
    - i. If so, explain how.
    - ii. If not, explain why not.
  - b. State whether the Companies could seek to recover from its customers additional revenues in order to offset the lowering of the amount of cash received by the Companies as a result of Rider RRS credits.
    - i. If so, explain how.
    - ii. If not, explain why not.
  - c. State whether such lowering of the amount of cash received by the Companies could negatively impact the Companies' finances.
    - i. If so, state whether such negative impact to the Companies' finances could factor into whether the Companies are entitled to receive a rate increase in a future proceeding.
    - ii. If not, explain why not.
  - d. Refer to line 13 of SC Ex. 89, which projects \$623 million NPV (\$976 million nominal) of Rider RRS credits from 2019 through May 31, 2024.
    - i. Confirm that you are projecting that the cash received by the Companies from 2019 through May 31, 2024 would be lowered by \$623 million NPV

(\$976 million nominal) as a result of Modified Rider RRS.

- 1. If confirmed, explain how the Companies would be able to incur or make up for such losses.
- 2. If not confirmed, explain why not.

#### Response:

- a. Objection. This request is vague and ambiguous in its use of "lowering," "could factor into," and "rate increase." This request also calls for a legal conclusion and calls for speculation.
- b. Objection. This request is vague and ambiguous in its use of "could," "additional revenues"

and "the lowering." This request also calls for a legal conclusion and calls for speculation. Subject to and without waiving the foregoing objections, it is not the Companies' intention to seek recovery from customers of additional revenues in order to offset the lowering of the amount of cash received by the Companies as a result of Rider RRS credits.

- c. Objection. This request is vague and ambiguous in its use of "lowering," "negatively impact" and "finances." This request also calls for speculation.
- d. Objection. This request is vague and ambiguous in its use of "projects."
  - i. Objection. This request is vague and ambiguous in its use of "projecting." Subject to and without waiving the foregoing objection, confirmed.
    - 1. Objection. This request is vague and ambiguous in its use of "incur," "make up" and "losses." This request also seeks an improper narrative response. See Penn Cent. Transp. Co. v. Armco Steel Corp., 271 N.E.2d 877 (Montgomery Co., 1971) (improper use of discovery device or interrogatory to require detailed narrative response). Subject to and without waiving the foregoing objection, the Companies are responsible for Rider RRS credits.
    - 2. Not applicable.

Sierra Club Set 13 Witness: Eileen M. Mikkelsen As to Objections: Carrie M. Dunn

#### Case No. 14-1297-EL-SSO

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Provide for a Standard Service Offer Pursuant to R.C. § 4928.143 in the Form of an Electric Security Plan

#### RESPONSES TO REQUEST

#### SC Set 13 – INT-245

Refer to page 14 lines 17 to 18 of Ms. Mikkelsen's Rehearing Testimony, and page 1 lines 15 to 16 and page 3 line 7 of Mr. Moul's Supplemental Testimony (filed May 4, 2015). Given that the Companies' Modified Rider RRS proposal is "not tied to any particular plants," confirm that Modified Rider RRS would not address Mr. Moul's stated concerns about the financial viability of the Sammis and Davis-Besse plants.

- a. If confirmed, state whether the Companies no longer believe that the Sammis and Davis-Besse plants are at risk of closure.
- b. If not confirmed, identify and explain each way in which Modified Rider RRS would improve the financial viability of Sammis and/or Davis-Besse.

#### Response:

Objection. This request seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. This request also seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry. In addition, this request is vague and ambiguous. Subject to and without waiving the foregoing objections, the Companies answer as follows: confirmed.

#### Case No. 14-1297-EL-SSO

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Provide for a Standard Service Offer Pursuant to R.C. § 4928.143 in the Form of an Electric Security Plan

#### RESPONSES TO REQUEST

SC Set 13 – Refer to page 6 line 23 of Ms. Mikkelsen's Rehearing Testimony. With regards to the contention that "the cash associated with Rider RRS charges would not flow to FES":

- a. Identify and explain the basis for your contention that "the cash associated with Rider RRS charges would not flow to FES."
- b. Identify each and every safeguard that the Companies have established to ensure that none of the cash associated with Rider RRS charges would flow to FES.
- c. State whether "the cash associated with Rider RRS charges" could flow to FirstEnergy Corp.
  - i. If not, explain why not.
- d. Confirm that net revenues generated by the Companies can be distributed to FirstEnergy Corp. through dividends or other means.
- e. State whether any cash associated with Rider RRS charges could be included in any sums distributed to FirstEnergy Corp. through dividends or other means.
- f. If any cash associated with Rider RRS charges could be included in any sums distributed to FirstEnergy Corp., state whether such cash could then flow to FES.
  - i. If not, explain why not.
- g. If any cash associated with Rider RRS charges could be included in any sums distributed to FirstEnergy Corp., state whether such cash could increase FirstEnergy Corp's ability to provide equity to FES.
  - i. If not, explain why not.
- h. If any cash associated with Rider RRS charges could be included in any sums distributed to FirstEnergy Corp., state whether such cash could increase FirstEnergy Corp's ability to provide a loan or another debt instrument to FES.
  - If not, explain why not.
- If any cash associated with Rider RRS charges could be included in any sums distributed to FirstEnergy Corp., state whether such cash could affect FirstEnergy Corp's credit rating.
  - i. If not, explain why not.

Response:

a. Objection. The request seeks an improper narrative response. See Penn Cent. Transp. Co. v. Armco Steel Corp., 271 N.E.2d 877 (Montgomery Co., 1971) (improper use of discovery device or interrogatory to require detailed narrative response). Subject to and without waiving the foregoing objection, see Company Witness Mikkelsen's Rehearing Testimony at page 11, lines 17-23.

OMAEG EX. 34

- b. Objection. This request seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. This request also seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry. In addition, this request is vague and ambiguous in its use of "safeguard." Subject to and without waiving the foregoing objections, see the Companies' response to subpart (a). The Companies have not established additional unique procedures with respect to cash management of revenues recovered from Rider RRS. The Companies will manage cash associated with Rider RRS consistent with existing corporate policies.
- c. Objection. This interrogatory mischaracterizes the Companies' testimony. Subject to and without waiving the objection, see Company Witness Mikkelsen's Rehearing Testimony at page 12, lines 1-7.
- d. Objection. This request is vague and ambiguous in its use of "net revenues generated by the Companies" and "other means" and is incapable of a response. This request also seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. In addition, this request seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry.
- e. Objection. This request is vague and ambiguous in its use of "included," "sums distributed to FirstEnergy Corp." and "other means." Subject to and without waiving the foregoing objections, see the Companies' answer to subpart (c) above. Further, there is no prohibition in the Proposal on the Companies' ability to pay dividends to FirstEnergy Corp.
- f. Objection. This request is vague and ambiguous in its use of "included" and "sums distributed to FirstEnergy Corp." Subject to and without waiving the foregoing objections, see the Companies' answer to subparts (a), (c), and (e).
- g. Objection. This request is vague and ambiguous in its use of "included," "sums distributed to FirstEnergy Corp.," "increase" and "ability." This request also seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. In addition, this request seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry. Subject to and without waiving the foregoing objections, see the Companies' answer to subparts (a), (c), and (e).
- h. Objection. This request is vague and ambiguous in its use of "included," "sums distributed to FirstEnergy Corp.," "increase," "ability" and "another debt instrument." This request also seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. In addition, this request seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry. Subject to and without waiving the foregoing objections, see the Companies' answer to subparts (a), (c), and (e).
- i. Objection. This request is vague and ambiguous in its use of "included," "sums distributed to FirstEnergy Corp.," and "affect." This request also calls for speculation. In addition, this request seeks information which is irrelevant and is not reasonably calculated to lead to the discovery of admissible evidence. Further, this request seeks information which is outside the scope of discovery permitted by the Attorney Examiner's June 3, 2016 Entry. Subject to and without waiving the foregoing objections: No. FirstEnergy Corp.'s credit ratings are not affected by whether FirstEnergy Corp. receives dividends from the utility.

Sierra Club Set 14 Witness: Eileen M. Mikkelsen As to Objections: Carrie M. Dunn

Case No. 14-1297-EL-SSO

Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Provide for a Standard Service Offer Pursuant to R.C. § 4928.143 in the Form of an Electric Security Plan

#### RESPONSES TO REQUEST

SC Set 14 – INT-251 Refer to your response to SC-INT-236.

- a. With regards to your response to SC-INT-236(b), please identify the "existing corporate policies" that would apply to the Companies' management of cash associated with Rider RRS.
- b. Referring to your response to SC-INT-236(i), please explain why "FirstEnergy Corp.'s credit ratings are not affected by whether FirstEnergy Corp. receives dividends from the utility."

#### Response:

- a. See SC Set 14-INT-251 Attachment 1.
- b. Objection. This request seeks an improper narrative response. See Penn Cent. Transp. Co. v. Armco Steel Corp., 271 N.E.2d 877 (Montgomery Co., 1971) (improper use of discovery device or interrogatory to require detailed narrative response). Subject to and without waiving the foregoing objections, the financial results of FirstEnergy Corp. are a consolidation of all subsidiaries.

## Cash Management Policies and Procedures

#### **PROCESS OVERVIEW**

The Cash Management Process includes the oversight of corporate bank accounts including cash receipts, disbursements, and concentration. In addition, it is the monitoring of payment flows and the safeguarding of liquidity by effectively utilizing forecasting tools and debt/investment instruments, so that the company can meet payment obligations. The primary objective of Cash Management is to utilize cash as efficiently as possible in a manner consistent with FirstEnergy's overall strategic objectives. The Cash Management process is also focused on resolving cash shortages or surpluses that occur from daily imbalances of cash inflows and outflows.

Cash Management is accomplished within the FirstEnergy Service Company (SERVECO) organization, with authority of the appropriate officers of the participating companies, through the use of Utility Money Pool and Non-Utility Money Pool (the Money Pools). A complete description is contained in the FirstEnergy Merger U-1 Filing.

#### **RESPONSIBILITIES**

**Process Owner:** James Pearson, Treasurer **Process Participants:** FirstEnergy Corp, and its subsidiaries

#### **TECHNOLOGIES UTILIZED**

- SAP Finance (FI) Module
- Web Methods (Communication Software)
- Microsoft Applications (Excel, Access, Word)
- Various Proprietary Banking Systems

## Policies and Procedures and Related Documents

#### POLICIES AND PROCEDURES

#### Cash Oversight (TR-010-010,-020,-030,-040,-050,-060)

The following functions are associated to the Cash Oversight Process:

#### Bank Account Balances (TR-010-010)

To retrieve cash balances from banks, the following steps should be performed:

- Retrieve and import available bank account balance information automatically from main accounts using communication software package
- Retrieve available bank account balance information manually from the Internet, bank software, and/or fax
- Use bank balance information from SAP company ledgers
- Reconcile previous day's actual cash position to bank account information obtained
- Note reconciling differences, if any, and adjust position balance for the imbalance
- Proceed to 'Establish Starting Cash Balance for Main Companies'
- Proceed to 'Cash Concentration'

#### Establish Starting Cash Balance for Main Companies (TR-010-020)

To establish a preliminary cash position for current day, the following are the process steps:

- Use previous day's reconciled final cash position ending balances to establish starting balance for current day cash position
- Resolve any difference between ending cash position balance and bank balance before starting current day's cash position
- Verify that prior day cash activities have been recorded in SAP

#### Cash Concentration (TR-010-030)

Cash concentration is the transfer of funds from outlying depository locations to a central bank account for more efficient management. Cash concentration improves control of the company's funds by minimizing bank balances. The following are the process steps:

- Use information obtained from Bank Account Balances activity
- Determine dollar amount of funds transfer from smaller bank accounts to concentration account. Goal is to maintain minimal balance in accounts without incurring an overdraft charge
- Initiate drawdowns using ACH, wire, or book transfer (transfer funds between accounts within same bank)
- Secondary approval performed by another analyst within Treasury to finalize cash concentration activity

## Policies and Procedures and Related Documents

#### Daily Cash Review - Forecast to Actual (TR-010-040)

Daily cash review is the online summary of all outgoing payments in order to perform a validity check of each proposed electronic transaction. The following are the process steps:

- Retrieve short term and long term debt/investment information for date specified from Excel spreadsheets
- Review payment information from Accounts Payable for reasonableness (this is reviewed 2 days prior to payment)
- Input manual electronic transactions for date specified into banking software
- Make adjustments, deletions, additions, if needed
- When proposed payments have been finalized, include outgoing payment information in Cash Position Activity and perform Actual Cash Payment process

#### Cash Position (TR-010-050)

Cash position summarizes all cash flow activity by category for a specific time period to determine cash position for the day. The following are the process steps:

- Use starting balance information from Establish Starting Cash Balance Activity
- Obtain Wire / ACH information from Daily Cash Review Activity
- Obtain actual available dollars related to remittance processing and field cash reporting through company breakdown reports
- Retrieve opening available and intra-day bank activity from banks using banking software
- Input manual cash items into cash position worksheets (receipts and/or disbursements)
- Include any long term and short term debt/investment activity in position spreadsheets
- Review all inputs to determine completeness
- Calculate current day cash position by legal entity to determine cash needs or excess
- Screen print final position for records
- Calculate current day cash position by consolidated companies to determine cash needs or excess
- Screen print final position for records
- If positions are long, perform test against regulatory limits.
- If successful, proceed to external investment process
- If positions are short, perform test against regulatory limits.
- If successful, calculate consolidated cash positions for grouping

### Policies and Procedures and Related Documents

- Determine if money pool transactions are needed
- If yes, enter consolidated money pool process
- If no, proceed to actual cash payment process

#### Money Pools (TR-010-060)

The Money Pools are set up to provide short-term cash and working capital requirements for the companies participating in the two Money Pool Agreements. It allows companies to lend or borrow, on a short-term basis, from the Money Pools based on company specific fund availability. The Utility and Non-Utility Money Pools have been approved by the SEC. Additionally, state regulatory approvals have been received as required. Utility subsidiaries participate in the Utility Money Pool. The unregulated subsidiaries have a separate Non-Utility Money Pool. Companies participating in the Money Pools can use the Money Pools for meeting daily cash requirements and for investing excess funds, which can be used by other companies requiring additional funds. The following are the process steps:

- Use information obtained from Cash Position activity to determine company specific daily cash requirement
- Determine if there is an external investment maturing or an external loan with possible repayment due
- Determine if there is an Internal investment or loan (Outside of the money pool) that maybe redeemed or have the possibility of repayment
- If Company (Specific) position is short request funds to cover position from Money Pool
- If Company (Specific) position is long, submit funds to Money Pool
- Determine if Company (Specific) movements with Investments and or Loans remains under regulatory requirements
- Determine overall position of the Money Pool after all companies have been made whole with investment and borrowing movements
- Should Money pool be Net Short, borrow cash from external funding Facilities. Go to External Loan Activity to arrange for additional funds
- Should Money Pool be Net Long, invest additional cash per the approved Treasury Investment Policy. Go to External Investments Activity to arrange investment
- Record Money Pool transactions in Cash Position worksheets (done automatically with setting of positions)
- Record Money Pool activity in SAP G/L (General Ledger) by journal entry for each company at the month-end

#### Borrowing/Investments (TR-010-080,010-100)

The following functions are associated to the Borrowing/Investment Process:

## Policies and Procedures and Related Documents

#### External Loans (TR-010-080)

Arrange for additional funds from external source to meet current day obligations. This activity also includes the repayment process of a maturing loan. The following are the process steps:

- Determine if an external loan will be borrowed or repaid
- Determine company that needs to borrow or repay loan
- Determine loan source and terms for borrowing
- If repaying a loan early or within term determine payoff amount
- Contact lender
- Verify maturing amount with the amount contained in Excel Spreadsheets
- Modify maturity amount in spreadsheet if repaying loan early
- Create wire transfer for loan repayment
- Verify booking of wire transaction in Daily Cash Review Forecast to Actual Activity
- Go to Actual Cash Payments Activity to approve and release wire transfer
- Verify funds received from loan taken
- Record daily external loan activity in SAP G/L by journal entry for each company that had loan activity for the day. This will ensure that money movement is picked up in the position and the G/L balance will match the Electronic Bank Statements (EBS) imported the next morning
- Record loan activity in separate spreadsheet

#### External Investments (TR-010-100)

From time to time, FirstEnergy may have excess cash after satisfying all payment obligations for the day and having no immediate use for these funds. FirstEnergy can arrange a short-term investment for these excess funds with an approved financial institution and within the guidelines provided in the approved FirstEnergy Investment Policy. The following are the external investment activities:

- Determine if an external investment will be made or has matured
- Determine which company will make or mature the investment
- Determine investment source and terms for investment
- If maturing an investment early or within term, arrange for receipt of principal plus interest
- Contact broker
- Verify maturing amount with the amount contained in separate investment database and modify maturity amount in spreadsheet if repaying loan early
- Create wire transfer for investment of funds
- Verify booking of wire transaction in Daily Cash Review Forecast to Actual Activity
- Go to Actual Cash Payments Activity to approve and release wire transfer

## Policies and Procedures and Related Documents

- Verify funds received from maturing investment
- Record daily external investment activity in SAP G/L by journal entry for each company that had investment activity for the day. This will ensure that money movement is picked up in the position and the G/L balance will match the EBS imported the next morning
- Record investment activity in Excel spreadsheet

#### Payments (TR-010-160)

ĺ

(

The following function is associated to the Payments Process:

#### Actual Cash Payments (TR-010-160)

Perform final approval process for all Wires / ACH / book transfers batched for the day. Manually handle tax payments if needed. Release and transmit Wires / ACH / book transfers to bank. The following are the process steps:

- View final report or screen listing for all payments proposed for current day
- Research and/or adjust any questionable payments, if needed
- Determine if any payments require additional information and adjust as needed
- Approve, release and transmit Wires, ACH, Book transfers
- Confirm successful import into communication module has occurred
- Confirm with bank all transactions have been received for processing

#### Cash Position (TR-010-180)

The following function is associated to Cash Position Process:

#### Finalize Cash Position (TR-010-180)

Final cash position summarizes all cash flow activity for the current day by company and on a consolidated basis. The following are the process steps.

- Preliminary cash position has been determined and the funding requirements are known
- Actual Cash Payments activity has been completed.
- Capture all current day cash transactions and enter into final cash position
- Ending cash position balance should closely represent what the ending bank account balance will be for the day

Policies and Procedures and Related Documents

#### **INTERFACES**

The Cash Management Process interfaces with other PUHCA processes. They include the following:

- Reporting
- Revenue Processing

#### **FUTURE CONSIDERATIONS**

Process is subject to change. Changes may result from regulatory and /or corporate mandates
