Subject: Oppose the Central Corridor Pipeline Extension Project

Dear Ohio Power Siting Board,

As a resident of Other and concerned citizen, I am writing you to register my opposition to Central Corridor Pipeline Extension Project (Reference No. 16-253- GA-BTX).

Thank you to all of our elected representatives who have taken such an interest in this issue that affects about 14 municipalities.

My wife and I have driven the three suggested routes. There is no good route among those three. Schools, churches, highly trafficked areas, house without much room to install adequately. Why not go through Remington and Indian Hill? There is a lot less housing, traffic, and homes through that area. Quite amazed at Duke's arrogance, lack of honesty, and secrecy. I wonder where these people live and I wonder if the siting board members have a real stake in Duke? I wonder if they ever drive these routes. I am quite surprised at Senator Bill Sites. He has no opinion now? I wonder why. Seems that he collected quite a bit of money from Duke for his election. I guess when he has dinners or just coffee with his donors he does not want to explain why this route is inappropriate.

This pipeline will travel through densely populated areas, including my neighborhood and will pose a danger to residences, schools, businesses and houses of worship.

Unlike delivery pipelines, this pipeline will be under up to 720psi pressure and an accident or rupture could cause injuries, death and destruction of property within a radius of 1/3 mile.

I ask you to oppose this pipeline and encourage both Duke Energy and the Ohio Power Siting Board to reject this pipeline

Thank you for your consideration.

Regards,
John Strathern
