

September 8, 2016

Chairman Asim Z. Haque
Public Utilities Commission of Ohio
180 East Broad Street
Columbus, Ohio 43215

Case no. 16-395-EL-SSO

Dear Chairman Haque:

On behalf of Heapy Engineering, I offer the following in support of Dayton Power and Light.

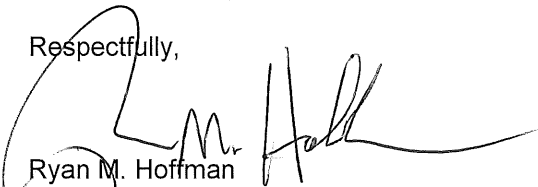

Heapy Engineering is a nationally recognized leader in Sustainability, providing innovative and creative engineering solutions for the Healthcare, Higher Education, Commercial, K-12 and Governmental Markets. At Heapy, we believe energy conservation is central to good engineering. Our headquarters in Dayton, Ohio is the first facility in Ohio to be certified LEED Platinum under the LEED for Existing Buildings Operations and Maintenance rating system from the U.S. Green Building Council. Our company vision and mission statement, respectively, are: *To be a World leader in energy performance in the built environment*, and, *We reduce the energy impact of the built environment*.

We have been a contracted partner of DP&L's Energy Efficiency Programs group since 2010. We provide DP&L with a variety of consulting and field services including measurement and verification of their Business Rebate Programs and associated PJM savings, energy modeling and analysis, rebate incentive level evaluation, and training on various efficiency-related topics.

Heapy Engineering and DP&L have formed an exceptional working relationship that helps DP&L maintain high levels of customer satisfaction, while remaining the low-cost provider of energy efficiency programs in Ohio. Heapy Engineering is proud to promote the Energy Efficiency programs DP&L offers their customers. In 2014, Heapy was awarded the "2014 Outstanding Channel Partner" in the HVAC category based on our level of participation in DP&L's rebate programs.

Heapy Engineering greatly appreciates, and likewise applauds, DP&L's support of our community and their ongoing dedication to helping customers manage their energy use and save money. The energy efficiency programs offered by DP&L are exceptional, and make a tremendous impact on the ability to implement energy saving projects across a wide variety of building types.

Respectfully,

Ryan M. Hoffman
Sustainability & Energy Services Manager
Heapy Engineering
