Comment One: Referring to an industrial wind facility as a farm is inaccurate. Please note the definition of **farm**:

1. (noun) an area of land and its buildings used for growing crops and rearing animals, typically under the control of one owner or manager.

synonyms: ranch, farmstead, plantation, estate, family farm, dairy farm, hobby farm

2. (verb) make one's living by growing crops or keeping livestock. "he has farmed organically for five years"

synonyms: work the land, be a farmer, cultivate the land; rear livestock "he farmed locally"

Comment Two: (F) Noise 2.

There is no mention of using the L90 measurement and, once again, there is no mention of low frequency noise or mitigation of it.
