**Re: Clean Energy Future-Lordstown, LLC,
OPSB Case Nos. 14-2322-EL-BGN and 16-494-EL-BGA**

Dear Ms. McNeal:

On September 27, 2016 Clean Energy Future-Lordstown, LLC (the "Project") and the Staff of the Ohio Power Siting Board ("OPSB" or "Staff") held a preconstruction conference to: 1) commence the remaining construction activities for the generating facility; and 2) commence construction activities on the stormwater pipe located on "Parcel 7," as described by the Project in its Second Amendment Application (Case No. 16-494-EL-BGA). Commencement of civil construction activities for the generating facility was approved at a prior preconstruction meeting.

The Project believes that it is in compliance with all applicable conditions to begin the additional generating facility construction activities.

The Project commenced additional construction activities for the generating facility on October 14, 2016. Below is the anticipated schedule of the upcoming activities for this phase of work:

- Steam Turbine Building Steel Structure – early October
- Steel Structure for the Administration Building – mid-October
- Unit 11 First HRSG module will arrive at site – early December
- Unit 11 GT/Generator will be set on foundation – late December
- Unit 12 First HRSG module will arrive at site – early January

Please do not hesitate to contact me if you have any questions.

Sincerely,

Sally W. Bloomfield
