COMMENTS: IM very concerned about water quality and turbine construction in Lake Erie. Poor environmental studies give little real data. Lake Erie is our fresh water and the leasing of the lake bottom to European inverters is another fact that must be addressed. Bird and bat killings by huge turbines in fresh water is Very difficult to address per Caleb E. Gordon Ph.D. from WEST ENVIROMENTAL & Statistical Consultants .Carcass studies in a turbulent lake will be extremely difficult if not impossible to access. Lake Erie is huge migratory flyway and rest stop for many species .We must protect Lake Erie from attacks by anyone wanting to harm our precious water supply and respect the Migratory Bird Act. Now is not the time to award permits for experimental physical construction in Lake Erie. Save Lake Erie. Sincerely yours, Helen Taft
