Re: Case # 15-1830-EL-AIR

Dear Pucco,

I'm opposed to DP&L's plan to more than double their Customer Service Charge.

I would like to see DP&L increase their renewable energy and energy efficiency programs.

DP&L should be encouraging energy efficiency, NOT punishing customers who reduce their use.

I personally have replaced all my major appliance with new more energy efficient ones to reduce the amount energy I use.

Sincerely,

Judy Yankee

To Whom It May Concern,

Please reconsider increasing our power charges. We are both retired with health issues and our limited budget would not handle a large increase.

Investigation in other avenues are needed. Rethink what you are asking.

Columbus, OH 43215

Dear Public Utilities Commission of Ohio:

Recently it was brought to my attention by the group Ohio Citizen Action that Dayton Power & Light intends to increase a mandatory fixed residential fee from \$4.25 to \$13.73 per month. I ask that you consider their objection to this proposal as it does not provide an incentive to the user to conserve energy.

I encourage you to continue to challenge energy provider requests for rate hikes and to pressure them to seek methods of production that have a minimal impact on the environment.

I should also point out that while I object to substantial rate increases I have been pleased with the service DP&L offers to me as a residential user. They have been promptly responsive to addressing my needs during power outages or issues relating to their power lines running to my house.

Thank you for your consideration of my opinion in this matter.

Sincerely,

A handwritten signature in black ink that reads "Patrick Wilkinson". The signature is fluid and cursive, with the first name "Patrick" and last name "Wilkinson" clearly legible.

To whom it may concern,

As a long time costumer of Dayton Power and Light I have noticed the changes in billing with steadily increasing charges. I would like to learn of DP&L's efforts to engage in more renewable energy programs to truly make an effect on the consumer and environment. The following case number (15-1830-EL-AIR) is of interest as I submit this correspondence.

Thank you,

Eric T. Kockentiet

TO:
Public Utilities Commission
Of Ohio -

We actively strive to conserve energy in our home. We work very hard for our money and to have a higher electric bill when we try our best to conserve energy is unfair to our family.

We are very opposed to DP&L's plan to increase the customer charge by such an extravagant rate. DP&L should be focusing on ways to increase renewable energy & energy efficiency programs.

Why should we be punished for doing our part to conserve energy? What is the purpose of DP&L providing us free kits to help us make our home energy efficient if they will just be turning around and charging a high flat fee regardless how much energy we use or conserve?

Beavercreek, OH 45432

I am writing to express my opposition to Dayton's Application to increase rates in Case no. 15-1830-EL-AIR. Customer should not be forced to compensate DP+L's for its declining revenue. Like any business DP+L should be incentivized to pursue a more efficient business model - namely renewable + efficient energy. Allowing for an arbitrary increase in rates ~~and~~ simply encourages misplaced priorities.

Thank you,
Nathan Cornes

Dear PUC,

I was alarmed when
I learned DP&L
was intending to
increase their
charge to customers
significantly.

Their charge should
always be to secure
energy efficient programs
at user friendly rates

Dear PUCO,

I understand that there is cost to any service provided. But I am opposed to Dayton Power & Light's plan to more than double their customer service charge.

There has to be a more efficient and economic way to deliver power to customers. I would like you to pursue your options, which would encourage energy efficiency while not punishing customers with higher cost.

We have already reduced our use and thermostat setting. When you cut back use and still see your bill increasing its like salt in a wound.

There has to be options that will be better for all of us, and better energy choices that are responsible ones too.

Most of us can not afford an outrageous hike like this.

Thank you,

Karen L Speller
