RE: Case No. 16-2189-EL-REN - DG AMP Solar Prospect – Nameplate Capacity correction

Mark,

The letter is in response to our phone conversation of December 12, 2016.

In Section G.1, I.a, and I.1 of the application, the nameplate capacity was listed as 0.25 MW. However, in section G.1 it was stated that the system has 1,080 - 335 watt panels which would give the system a DC nameplate capacity of 0.3618 MW. The correct nameplate capacity for this application is 0.3618 MW.

Please accept this letter as a revision to Case No. 16-2189-EL-REN DG AMP Solar Prospect.

Please contact me with any additional information needed. Thank you.

Regards,

Janet Ward
