PUCO

Dear PUCO

January 3, 2016

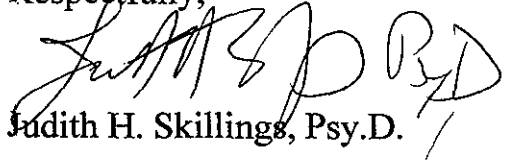

Re: Case # 15-1830-EL - AIR

I'm opposed to Dayton Power and Light's plan to increase the flat rate customer charge by more than three times. They are in financial difficulties because they have ignored the need to develop alternate energy sources for decades. Now they are seeking to shore up this same faulty thinking with a flat fee that punishes the more energy efficient households.

I want to see DP&L increase their renewable energy and energy efficiency programs.

DP&L should be encouraging energy efficiency, not punishing customers who reduce their use.

Respectfully,

  
Judith H. Skillings, Psy.D.

re: case #15-1830-EL-AIR

Dear PUCO,

I would like to see your company invest in renewable energy, including encouraging customers to use less energy whenever possible.

I am also writing to protest against increasing costs to the consumers.

Please be a responsible provider + keep rates low as possible.

These comments are in regard to case # 15-1830-EL-AIR.

Sincerely,  
Jill M. Becker

RE-15-1830-EL ATR

Dear PUCO,

I am opposed to ~~the~~ proposal "customer charge". I am opposed to DPL's plan to increase the customer charge by more than three times, and need so so DPL invest in renewable energy & energy efficiency programs.

Sincerely  
Mark Reynolds  
412 Taylor St

Dear Puro,

I wanted you to know I'm apposed to Dayton Power & Light's plan to more than double their customer service plan.

Lots of folks can't afford such a raise.

Please listen to us:

To: Public Utilities Commission

I want Dayton Power & Light  
to be more active in increasing  
renewable energy, rather than  
raising service charges under the  
current practices.

This will involve editing of  
case number 15-1830 - EL - AIR

As a Senior Citizen I am

Dear Pocu,

Wages are going up at the rate of your expected increase. Doubling your service charge suddenly, suggests you need to play some ~~catchups~~ ~~catchups~~ on capital expenditure. By suddenly doubling your service fee you are shifting that shock to your (possibly inadequate) planning right to your customer base to absorb the hit - customers that do not have as much credit/credit line as (DPTA).

Rather than doubling down on old carbon power we all can see the global shift in 2016 in other countries where solar is viable alternative cost-wise these trends could be supported by the POW. Homes augmented with energy efficiency / also puts a lighter load on the grid. And to that end <sup>pricing</sup> <sub>(pricing)</sub> programs should not be crafted to ~~push~~ push people into more energy consumption. Yes it's ~~profitable~~ profitable for DPTA - but sucks the life out of our earth's natural resources & natural balance of the environment.

Sincerely,

Jordan Bruny

Dear POCU,  
Case # 15-1830-EL-Aur

Life is crazy, people don't care about people any more unless it is for their own. People that we have made rich only care to become richer and leave others in the cold and I am speaking this time about Dayton Power and Light. I oppose their plan to more than double their service to their customers.

DPEL needs to look into increasing their renewable energy and energy ~~efficiency~~ efficiency programs. Working with us as we try to find way to be more efficient and still sleep in the cool of the winter night.

DPEL should be encouraging others to be energy efficient, not causing customers who reduce their use by punishment. because the need warmth.

8:21 PM

Dear PUCO,

I am an Ohio resident who is concerned with the proposed rise in the power rates by Dayton Power and Light. A rise to double the customer service charge is unacceptable. (Case # 15-1830-EL-Air)

I would like for DP and L to seriously consider increasing their renewable energy and energy efficiency programs rather than take the proposed step.

I am a customer who is very energy conscious and feel that you should be encouraging energy efficiency. This solution would be better for our environment and more affordable for your customers.

Thank you for your consideration of my thoughts. I hope that you will seriously consider options rather than simply raising our rates with these fixed rates charges.

Elizabeth B. Tinker

January 3, 2017

Dear Public Utilities Commission of Ohio,

Re: 15-1830-EL-AIR

I was approached by a fellow citizen about Dayton Power and Light. My understanding is that in short order there will be a plan for them to increase, almost doubling the charge to consumers for power charges to homes. I do not welcome this and oppose an increase so high.

I am also told that Dayton Power and Light has the ability to increase their renewable energy and energy efficiency programs. I would like to see this occur, but only if those losing jobs from coal, are swiftly moved into the new renewable energy jobs, without a cut in pay and given a bright future for their families.

Let's not make our current energy more expensive, or increase tax dollars in this endeavor. Let's please find a way to accomplish this very worthwhile goal, with existing funds.

Sincerely,

To: Public Utilities Commission of Ohio  
180 East Broad Street  
Columbus, OH 43215

From: Anne Johnston (private citizen)  
220 So. Winter Street, Apt #2  
Yellow Springs, OH 45387

Regarding: Dayton Power & Light (DPL) has a plan  
to raise customer service charge a very  
large increase.

Case No: 15-1830-EL-AIR

Please be aware that I am against DP&L's  
wanting to increase <sup>by</sup> so much the customer  
service charge - more than twice the amount.  
Instead they can focus on sensible actions:  
efficiency use programs, renewable energy, etc.  
Raising customer rates is the last action they  
should take. Just because it is the easiest action  
to take doesn't mean it is the first action to take.

Yours truly  
Anne Johnston

Public Utilities Commission of Ohio  
180 E. Broad St  
Columbus, OH 43215

Please be aware that I as a public utilities user am unwilling for DP&L to double the service charge that is applied to being on-the-grid with DP&L - this does not mirror the amount of energy + fossil fuel usage I carefully preserve by keeping my usage low even in winter.

The village of YSO should both encourage grid use from newly constructing solar farms + individual solar applications to homes that then do not require grid use @ all.

Thanks for hearing me out on this + your support of preserving global resources including clean air / land usage / climate change reduction, that destroys nature beauty

RE: Case number 15-1830-EL-AIR

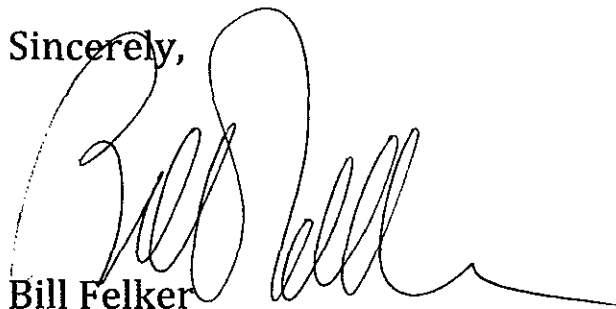

Dear PUCA:

I am against DPL's plan to double customer service charges.

In addition, I want to see DPL increase its use of renewable energy and efficiency programs.

It is time for government agencies and utilities alike to move forward with innovative programs instead of simply raising costs to consumers..

Sincerely,

A handwritten signature in black ink, appearing to read "Bill Felker". The signature is fluid and cursive, with a large initial "B" and "F".

To the Public Utilities Commission of Ohio -

DP+L needs to invest in more  
renewable energy. We can't afford to  
be using nonrenewables and destroying this  
planet. DP+L should be encouraging energy  
efficiency, not punishing customers who  
reduce their use. I'm also opposed  
to their plan to more than double their  
customer service charges.

Thank You,

Dear PUCO -

I am writing because I oppose  
the increase in the customer  
service charge in case number  
15-1830-EL-AIK.

Increasing the cost of using coal  
instead of promoting energy  
that is cleaner and healthier  
seems destructive and greedy.  
Hurting customer and environment  
only leads to a death where  
encouraging "Clean" Energy -  
(there are many options)  
would lead to more customers  
and for a longer term of use.

To whom it may concern:

Citizens of our communities are having trouble meeting basic needs. Our environment is also suffering due to a lack of interest in supporting ecologically friendly power options. These two points are not mutually exclusive. Public utilities need to see what the public they serve need. I am opposed to Dayton Power & Light's plan to more than double customer service charge. I want to see DP+L increase their renewable energy and energy efficiency programs. DP+L should be encouraging energy efficiency, not punishing customers who reduce their use. DP+L should be working alongside their customers to make a better future for us all, not retarding customer efforts and ecological progress.

I write this letter in regards to case number  
15-1838-EL-AIR,

Thank you for your attention,  
Tina Ellenborg-Kimmet
