Exhibit B-2 "Experience & Plans"

Experience

Below are brief biographies of Energy Edge Consulting's officers & key team members.

Brian Walker, President

Brian Walker has sixteen years of experience working in deregulated electricity markets across the country. Immediately prior to Energy Edge Consulting, Brian led Reliant Energy's large and mid commercial and industrial sales efforts in north Texas which generated revenues exceeding \$500 million annually. In this role, Brian was responsible for managing a team of 20 sales professionals and support staff, structuring and negotiating retail electricity contracts, and growing the retail energy provider's presence in the region.

In addition to Brian's knowledge of retail electricity markets, he also has extensive experience in both the wholesale and regulatory sides of the industry. Previously, Brian worked with Reliant Energy's wholesale origination and trading groups and represented the company before numerous regulatory agencies and stakeholder organizations on the west coast. In 2006 Brian was named sales person of the year.

Matt Hobson, Vice President & Secretary

Matt Hobson has fourteen years of experience working with large commercial and industrial clients in managing their energy needs. Prior to Energy Edge Consulting, he worked in Reliant Energy's large commercial and industrial marketing group, where he was a member of Reliant's Complex Commodity Sales Team developing and marketing customized energy products to some of the largest industrial clients in Texas. He was responsible for a business segment that generated over \$150 million in annual revenues.

In addition to his direct client responsibilities, Matt also had management and P&L responsibilities for a team of sales and support employees in Reliant Energy's mid-sized commercial and industrial business. Matt also has extensive experience in demand side management, having developed and implemented Reliant Energy's participation in a key new ERCOT demand response program, EILS.

David Mosley, Director

David Mosley has thirty five years of experience in the energy industry. Prior to joining Energy Edge Consulting, David helped develop and execute Reliant Energy's highly successful large commercial and industrial energy marketing efforts. David has individually executed approximately \$1.4 billion in electricity transactions since Texas deregulated its electricity market in 2002. David has been providing value for clients for many years by utilizing his structuring expertise, as well as his understanding of the significance of electricity load shapes, energy price risk management expertise, and electricity product knowledge.

In addition to his direct client responsibilities at Reliant Energy, David also had management and P&L responsibilities for a team of sales and support employees in Reliant Energy's large commercial and industrial business. He has received numerous awards over the course of his career for his contributions to the energy industry.

Ana Salinas, Manager, Operations & Analytics

Ana Salinas has fourteen years of experience in the deregulated electricity industry in both ERCOT and PJM markets. Prior to joining Energy Edge Consulting as Operations Manager, Ana has held positions in product development, structuring, and marketing. Most recently, she was the Team Lead for the Customer Transaction Desk at Reliant Energy where non-fixed price customers were able to lock in real time prices. Ana and her team managed over \$2 billion in customer transactions on an annual basis.

Plans

Energy Edge provides energy risk management, contract negotiation, and ongoing support services to large commercial, industrial, and institutional energy consumers. Our team has over 130 years of combined experience in deregulated energy markets. We currently serve clients in a variety of industries from manufacturing to restaurants to schools. Since the firm's founding in March 2009, Energy Edge Consulting has represented over 250 business and government entities in the management and purchasing of electricity & natural gas. Combined, these consumers represent over 4,000,000,000 kWh per year of electricity consumption. The firm has provided services to customers in over 15 different utility territories that fall within the MISO, PJM, ERCOT, and WPP regional control areas. The firm takes a very technical approach to energy management and leverages the deep understanding of energy markets of each of its team members to deliver value to clients in energy management.

Typically, Energy Edge puts a services agreement in place with its clients that outlines the scope of services provided to the customer and the fee for said services. The fee is sometimes collected from the customer by the customer's retail energy service provider and remitted to Energy Edge, and sometimes Energy Edge invoices the customer for the fee. Given that Energy Edge has a relatively small number of large clients, inquiries and complaints are handled individually and are afforded a high level of attention by Energy Edge's staff.
