COMMENT DESCRIPTION:

I am fed up with them raising rates while destroying local economy's. This in my opinion is a violation of the anti trust laws. While we may be able to choose who we buy the power from we cannot choose our suppliers so we are held hostage to these rate increases. There is noting wrong with the power plants we currently have and no need to shut them down and build new ones. If this is allowed then we as the consumer should be able to choose which electric company we want as a supplier not just who bills us. This should have been put up to public debate not just pushed through on the down low to where we the consumers are getting screwed yet again. Keep the the Adam's County power plants open and keep our rate reasonable that's what you are there for.
