between moving to a
new location, or staying
in a place that's unsafe.
Make a good decision
please for people who
are entrusting you to
do so. Thank you.

Jen Latessa

P.S. The Duke Energy proposal
labeled my house as commer-
cial (#110). This is evidence of
their lack of care to detail.

OPSB —

The Duke Energy

pipeline that routes
through Blue Ash is
located too close to
residential areas &
sensitive populations.

The dangers of this
pipeline are too great.

As a student of urban
planning, these
injustices are not new.

✓ Please do not allow
sensitive populations

to be subject to the dangers of this oil pipeline. Find a route that does not affect residential populations. This may cost more money initially, but in the long run we can not put a price on the dangers of pipelines in populated areas.

Best,
Julia
Jones

BOOM

TO WHOM IT

MAY CONCERN:

I AM INFURIATED

BY DUKE'S PLANS TO SITE
A TRANSMISSION

PIPELINE IN A RESIDENTIAL
NEIGHBORHOODS IN BLUE

ASH, OHIO. OVER TIME,
SIMILAR TRANSMISSION

INES HAVE PROVEN TO

BE DANGEROUS AND

PRONE TO EXPLOSION

IN AREAS (FLIP)

LIKE RURAL PENNSYLVANIA.
HOWEVER, UNLIKE THESE
OTHER LINES, THIS ONE
IS BEING BUILT IN A
POPULATED AREA, WHICH
HAS THE POTENTIAL FOR
DEVASTATING LOSS OF
LIFE AS THE PIPE
AGES. PLEASE CONSIDER
MOVING THE LINE
TO A RURAL (LESS
POPULATED AREA) RATHER
THAN JUST PUSHING IT
THROUGH IMPOVISED
NEIGHBORHOODS. THANK
YOU FOR YOUR
CONSIDERATION.

BEST,
JULES MICHEL ROSEN
CINCINNATI, OH

BOOM

Dear OPSB —

DUKE's plan to
locate their transmission
pipeline within residential
neighborhoods, such as
Blue Ash and other Cincinnati
areas is worrisome. I am
concerned about the safety
of neighbors in addition to
the real estate value around
the proposed pipeline.

I am also concerned
that alternative routes

will capitalize on the lack of voice
from impoverished areas. These
options do not offer a solution
to the above-mentioned concerns.

I urge you to consider routing
the pipeline through more rural
areas where the pipeline will not
pose as much of a safety concern
and would not have as much
of an economic impact.

Sincerely,
Arzon Rief
