6

Despite a huge public outcry from residents, business owners, and elected officials, Duke Energy still wants to run a massive, high-pressure natural gas pipeline directly through densely-populated neighborhoods. The latest proposal continues to put thousands of homes at risk, along with schools, hospitals, day care centers, and places of worship--all to transport far more natural gas through the area than ever before.

As public servants, please ask yourselves whether this pipeline is truly necessary. Understand the economic and environmental destruction that this project may cause. And above all, please do not ignore the safety risks of such a high-pressure pipeline directly beneath the ground where so many people live, work, and play. Say NO to the Central Corridor Gas Pipeline Extension Project (OPSB case number 16-0253-GA-BTX).
