SERVICE CONNECTION CHARGES

B. APPLICATION (Continued)

1. General (Continued)

- g. When all required service facilities are already in place, a service charge does not apply for a subscriber to connect an item of customer-provided terminal equipment to that subscriber's existing service under the provisions of Part 68 of the FCC Rules and Regulations. If additional facilities are required or requested, the appropriate service charge(s) will apply. When all required service facilities are already in place, a service ordering charge only will apply for service added or changed in connection with existing service. If additional services are required or requested, the appropriate service charge(s) will apply.
- h. Incorporated in this section is the assumption that the subscriber will allow the Company to complete the requested operations in a manner determined by the Company to be reasonable and efficient. When the subscriber insists, after thorough explanation by the company of the additional charges which would be applicable, that the Company carry out additional or extraordinary work which would not otherwise be required to complete the desired operation, charges in addition to those applicable as specified in this section may be applied. Additional work operations such as premises visits made to deliver new telephone number designations or additional service orders processed to effect multiple completion dates requested by the subscriber will be charged for at the levels specified in paragraph C. Other activity necessitated by requests of the subscriber such as work during other than normal business hours will be charged for at levels not to exceed differential costs of labor and material. This provision in no way relieves the Company from the requirement of providing reasonable and efficient service at the charges specified in this Tariff.
- i. If the customer is known to be a credit risk to the Company, payment of service charges may be required before the work is begun.
- j. If an application for residential telephone service is accepted, the Company will offer the option of deferred payment arrangements on telephone installations charges. If the deferred option is chosen, the installation charges shall be spread over a period of three (3) consecutive months.
