Re : Icebreaker Wind Project

Dear sirs

With regard to the above project we confirm that as one of the prospective supplier to the project it would have major benefits for our company and the many personnel that work on our behalf. SQS USA supply inspection and expediting personnel through the USA, North America & also the rest of the world.

Our technical support team will be available to support the procurement activities for the project by visiting the many suppliers used to supply materials & ensuring the equipment purchased is both on schedule & correct to specifications and industry requirements.

By approving the project we will be able to provide work for many of the hundreds of inspection staff we employ throughout the USA / North America and also the staff we will need to employ within our Houston office to support the field personnel.

We hope the approvals are given and that our industry received the much needed boost by the commencement of the project.

If you have any questions please do not hesitate to contact me.

Best regards

John Gilmour  
Senior Vice President of Business Development
