COMPLAINT DESCRIPTION:

I have opposed this pipeline for multiple reasons as referenced in previous letters of opposition, however this latest LIE by Duke energy concerning the 4th informational meeting is possibly the biggest openly deceptive submission to date. Please please have your review board hold Duke accountable for falsifying documentation in their application. The amendment documents how they gave the public all the information they needed... LIE. No questions were allowed. They stated only ~400 people came... LIE. The venue they picked had a very small capacity and they sent the fire Marshall in to turn people away, the parking lot only accommodated 100 cars; the intent was purposeful. They held it in a small private hotel and people were prohibited from peacefully protesting. They stating only receiving 13 emails during a time frame in opposition... maybe that is the truth but only because the public has grown tired of writing and never receiving information. The green route goes 12 feet from my homes foundation, in my yard effectively making my entire one acre yard unuseable and removing 3-100 year old oak trees . I have written them multiple times asking for an explanation for turning from the street into the middle of my yard... zero response. Zero. At the "informational" meeting, They switched back and forth between transmission and distribution pipelines... which one is it?? Either they have hired the dumbest set of project writers and attorneys in Ohio or they are openly trying to confuse and deceive the public. I am begging you Ohio Power Siting Board to please review the deflated impact statements and false information in the application and DEMAND integrity in business practices in Ohio. We are better than that. This pipeline is for Duke profits, puts many residents at risk, destroys home values and communities--- all so Duke can probably hook it to their Atlantic Pipeline project to make money out of OHIO. This project doesn't help Ohio, it helps Duke. Thank you for your consideration.
Candice Overly
