COMMENT DESCRIPTION:

I have insulated my home, I have installed energy efficient appliances & windows, I use LED bulbs & try to conserve electricity any way that I can. I have spent thousands to become as energy efficient as possible. Since all the expensive home energy upgrades & deregulation I have seen my electric bill double from what it used to be. All the various AEP service & misc transmission charges are now more than my old electric bill used to be. I get a good rate on my actual electricity used. \$0.0559 from IGS but the upcharges from AEP are absolutely outrageous. What are they & why do you allow all the various surcharges to be continually added by the utility? Do you guys ever say no? In my

business I pay for maintenance items, upgrades and technical purchases out of my profits. I am not able to pass all the normal everyday costs of doing business on to my customers. They have a choice....with utilities we DO NOT HAVE ANY CHOICES! Customer Charge Retail Stability Rider Deferred Asset Phase In Rider Phase in Recovery Rider Power Purchase Agreement Rided How about true deregulation!!! Stop the monopoly of AEP...let other power generation companies come in & let the free market dictate where the pricing should be. It's time to say NO TO AEP
