Subject: Icebreaker wind project

To whomever it may concern,

Hello, my name is Nick Roppel, I am a local 38 journeyman electrician. I am writing you this email to inform you that I am strongly for the icebreaker wind project. I have currently been in our local for 15 years now and cannot tell you how I believe this will help us create jobs for the betterment of our local.

Thank you,
Nick

Dear Members of the OPSB, I am an electrician and a member of The International Brotherhood of Electrical Workers Local 38. I support the ice breaker wind project and urge the board members to approve the projects application. I live in a community who has in stalled several wind turbines and I have seen the positive effects that clean renewable energy has had in my community. I feel strongly that the Ice Breaker Wind Project will have a positive impact on North East Ohio, by creating jobs,fueling the economy, and creating clean energy. I urge the OPSB to support the project and approve the application. Thank You Frank Perri Sent from my iPhone

RE: 16-1871-EL-BGN Icebreaker Windpower

Dear Members of the OPSB,

I am an electrician and member of The International Brotherhood of Electrical Workers Local 38. I enthusiastically support the Icebreaker Wind Project, and urge you to approve its application. Icebreaker Wind will be the first freshwater offshore wind farm in North America, and only the second offshore wind farm in the United States.

Icebreaker Wind will put Northeast Ohio at the cutting edge of a clean renewable offshore wind industry and create a whole new fresh water wind energy industry in Lake Erie, and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing, and production, providing energy independence and healthier families as a result of the reduced air pollution generated by wind power.

Today, Northeast Ohio is moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Icebreaker Wind will build on this momentum by leveraging our region's strengths in manufacturing and technology innovation to create an offshore wind industry with the potential to create thousands of new jobs and billions of dollars in gross regional product by 2030. The offshore wind industry in Europe has created nearly 80,000 jobs and keeps growing.

I support the approval of Icebreaker Wind's Application and urge you to support its approval.

Sincerely,
Robyn Roub

Subject: Project Icebreaker

It will be an ICEBREAKER of a mistake to not invest in Ohio's economic future.

The great lakes offer so much to northeast Ohio. Fishing, boating, traveling and commerce. Why wouldn't we take advantage of her opportunity to become one of the world's first fresh water wind farm and have it in our own back yard.

Jobs, jobs, jobs. The amount of economic impact on the local community to supply a workforce to run, maintain, and produce this incredible project is worth it alone.

I am urging you to contribute in the progression of the construction of the Icebreaker windfarm.

I have followed this project for years. We are this close. I hope to personally have part in its development and production.

Thank you for investing in mother nature and Ohio's well being.

Dear Members of the OPSB,

My name is Brian P O'Donnell. I am an Ohio resident and a proud member of Electricians Union Local 38 in Cleveland. I am writing in support of the approval of Icebreaker Wind's application and urging you to support the project.

The positive effects that a project of this magnitude will bring to Northeast Ohio are both vast and easily quantifiable. The economic impact through job creation is at the top of this list. These jobs will immediately impact the local community as wages are spent and put back into the economy. The local tax base will also increase at the same time. Then there are the environmental impacts of clean energy. The list could go on and on.

By supporting this project and approving Icebreaker Wind's application the members of the OPSB will be putting Northeast Ohio, and the entire State of Ohio, at the forefront of advancing this new technology while, at the same time, allowing proud Ohio construction workers to become leaders in this new industry.

Kind Regards,

Brian P O'Donnell

Subject: Icebreaker wind project

Dear members of the OPSB,

I would like to encourage you to support the Icebreaker wind project on Lake Erie. The project would create well paying jobs for Northeast Ohio and continue to shed a positive light on the area that's been building in recent years. This project could not only create jobs on the installation of the wind farm, but also possibly in the manufacturing of the technology itself. Thank you in advance for your support.

Subject: WINDMILLS

Hello, I am a member of Local 38 Cleveland Ohio but have had the privilege to work all over the country.

I have worked on a windmill farm in Payne Ohio out of Toledo, and it instantly made me a believer of the benefits and rewards. Each windmill generates about 1-1.5 megawatts of power at the cost of about 1.1 million dollars. Dollar for dollar it costs less to build per megawatt then a gas turbine powerhouse. Typically, a 550 megawatt gas turbine powerhouse will cost about 1-2 billion dollars. Unlike power plants, they are pretty much maintenance free.

I know there are folks out there that want to go back to the horse and buggy because you don't need to wear a seat belt. Let me assure you that this way of thinking is just plain nuts. Let's ALWAYS go forward with progress, future generations are counting on us.

Warm regards, Mike Abram
