COMPLAINT DESCRIPTION:

I currently pay nearly \$12 per month for electric even when i use Zero electricity. This is because I have Net metered solar panel generation system which receives less than 0.07kwh credit for the power i put into the grid. But i pay much more than \$0.07/kwh for the kwh i use. My power often is supplied at a time auxilliary utility generators which have high production costs would be used, but less because of me. My generation reduces consumer cost. Also, my generation goes next door to my neighbors through the grid. That transmission line is inexpensive, saving

consumers money. An increase in minimum payment for utilities is outrageous and unjustified. It is anti-capitalistic and anti-business. If power is generated by me or anyone using solar, wind, etc for less cost than coal/oil nuclear etc it should not be suppressed by existing utility's raising minimum charges. I trust the PUCO to act in the interests of consumers and progressive business and NOT allow any increased minimum charges for Duke, DPL, AEP or any utility.
