COMMENT DESCRIPTION:

In regards to AEPOhio's request to increase the cost of the Customer charge, the PUCO gave AEP an increase from \$3.82 to \$8.40 on Jan 1, 2015 for this same request. Now they are back wanting to go on up to \$18.40 on our dime. This company should never ask for anything with all the riders the PUCO has allowed them to put into effect on practically every bill we receive. Retail stability, deferred asset phase in, phase in recovery, distribution investment, economic development, balancing adjustment, purchased power agreement, universal service fund (for welfare recipients), renewable programs, energy efficiency programs, and peak demand reduction programs. What will they dream up next that will be approved by the PUCO? With the little bit of construction going on in our area ,the majority of the work is being done by contractors with minimal work being done by local crews. It's evident that the PUCO does not audit AEP crews in the field or they would see that the little bit of work load is being done on an overkill process. At least three trucks on every job. To top it off the AEP personnel get bonus checks at the end of the year ,AGAIN ON OUR DIME. You people are allowing the utilities to continually raise rates which is putting those of us on fixed incomes to fall farther behind. I am diabetic and was just told to go on insulin at a cost of \$477 for 90 days. So do I pay for more increases handed out by the PUCO or buy medicine for my 73 yr. old body ???
