

COLE LIGHTING SUBMITTAL

JOB NAME _____**Type** _____**CATALOG NUMBER** _____**Steplites**

2158 SERIES

SPECIFICATIONS

Construction

- Fixture housing is constructed from die-formed 16 gauge electro-galvanized steel finished with a white polyester coating
- Faceplate is cast aluminum with metallic aluminum polyester coating or 3/16" stainless steel with brushed finish
- Faceplate is retained by stainless steel screws
- Diffuser is frosted tempered glass set in silicone sealant
- Reflector is constructed of white die-formed aluminum
- Optional junction box is cast aluminum with polyester coating
- cETLus listed, suitable for wet locations in any wall construction.

Electrical

- Fixture is wired with high performance LEDs or compact fluorescent lamps. Drivers and electronic ballast are universal voltage
- Housing provided with 1/2" conduit knockout on each side, suitable for 4 wire thru-wiring, 2 in 2 out
- Optional junction box allows 8 wire thru-wiring, 4 in 4 out. Provided with two 1/2" tapped conduit entrances in the bottom and one 1/2" tapped conduit entrance in each side.

Mounting

Housing has flange with holes for mounting.

Options

Junction box: Bottom or back mounted as required for feed-thru. Add suffix ☐ -J.

Tamperproof screws: Socket head faceplate screws. Add suffix ☐ -TP.

Dimming: Universal voltage 0-10V driver. Add suffix ☐ -DIM.

LED colors: 4000°K (438 lm), -HO (747 lm). Add suffix ☐ -4K.

Amber. Add suffix ☐ -AMB.

Blue. Add suffix ☐ -BLU.

Voltage: 277 ballast. Add suffix ☐ -277.

Alternate faceplate color: Black or white. Add suffix ☐ -BLK or ☐ -WHT.

Bronze faceplate: Satin finished, clear coated faceplate. Add suffix ☐ -B.

Opal glass diffuser: Tempered. Add suffix ☐ -OPL.

How to Specify

1. Select catalog number with desired features.
2. Add suffixes for options required to meet job conditions.

**FINISH TO BE SELECTED
BY THE ARCHITECT.**

C.W. Cole & Company, Inc.
 2560 N. Rosemead Boulevard
 South El Monte, CA 91733-1593

FEATURES & SPECIFICATIONS

INTENDED USE — Intended for low to medium mounting heights where dust, dirt, humidity or moisture are present. Ideal for canopies, dock areas, wastewater treatment, refrigerated areas, food processing and other non-hazardous environments. Certain airborne contaminants can diminish integrity of acrylic. [Click here for Acrylic Environmental Compatibility table for suitable uses.](#)

CONSTRUCTION — Housing formed from impact resistant, UV stabilized, fiberglass reinforced polyester with cold-rolled steel enclosed wireway. Poured in place gasketing provides a seal between housing and diffuser. Captive, corrosion-resistant cam-action latches secure the diffuser; six on 4' units, and ten on 8' units. Stainless steel latches available.

Finish: Painted parts pretreated with a five-stage iron-phosphate process to ensure superior paint adhesion and corrosion resistance, then finished with a high-gloss, baked white enamel.

OPTICS — High-impact acrylic diffuser with a stippled interior surface to spread lamp image.

PLEASE NOTE: The standard 4' diffuser is 2-1/4" deep, and the standard 8' or 48T8HO diffuser is 3" deep. To order the 4' diffuser so that it matches the depth of the 8' diffuser, order the ARDP option. The 8' diffuser is not available in the 2-1/4" depth.

ELECTRICAL — Thermally protected, resetting, Class P, HPF, non-PCB, UL Listed and CSA Certified ballast is standard.

AWM, TFN, THHN wire throughout, rated for required temperatures.

INSTALLATION — For unit or row installations, surface (ceiling or wall) or suspended mounting. Wall mounting; horizontal orientation only for use in damp locations. Stainless steel surface spring-mounting brackets standard (2 included).

LISTINGS — 120V, 277V and MVOLT are UL Listed and CSA Certified (standard). 347V is CSA Certified (see Options). NOM Certified (see Options). Listed for 25°C ambient and wet locations for covered-ceiling applications. IP65 rated. Optional IP67 rating available (supplied with 8 latches on 4' units and 14 latches for 8' units; covered ceiling not required). Compliance to FDA/USDA requirements and/or NSF splash-zone certification.

WARRANTY — 1-year limited warranty. Complete warranty terms located at

www.acuitybrands.com/CustomerResources/Terms_and_conditions.aspx

Actual performance may differ as a result of end-user environment and application.

Note: Specifications subject to change without notice.

Enclosed and Gasketed Industrial

Specifications	
Length:	50 (127.0) 98 (248.9)
Width:	8-1/8 (20.6)
Fixture depth:	5-5/8 (14.3) (deep lens) 4-3/4 (12.1) (standard lens)

All dimensions are shown in inches (centimeters) unless otherwise noted.

ORDERING INFORMATION

Lead times will vary depending on options selected. Consult with your sales representative.

Example: DMW 2 32 MVOLT GEB10IS

Accessories: Order as separate catalog number.

BCD	Bracket for hanger chain mounting. Two per package ¹¹
HC36	Chain hangers (1 pair, 36" long); Requires BCD
WLF	Wet location fittings (1 pair, not installed, for use with 1/2" rigid conduit)
DMW/VRISMB	Surface mounting brackets (pair) ¹²

Notes

- Not available with 96T8 or 96T8HO.
- 32W T8 and 28 T5 lamps only.
- Must specify GEB10PS ballast.
- Must specify GEB10PS90 ballast.
- ARDP standard on 48T8HO and 8' fixtures.
- Available 347V T8 only.
- Must specify voltage; 120 or 277V only.
- Must specify voltage. Not available with MVOLT.
- For mounting up to 8' specify MS18; for mounting up to 20' specify MS120.
- DL option required for batty packs, sensors, and cord sets that are not wet location listed.
- For stainless steel, specify STS (ex: BCD STS).
- Brackets ship standard with fixture. For replacement purposes only.

DMW Instant, Programmed or Rapid Start

MOUNTING DATA

For unit or row installation, surface (ceiling or wall) or suspended mounting.

DMW — Drill holes through housing and channel at appropriate locations. Includes gasketed wet location fittings on ends for power feeding/mounting. Fitting is threaded for 1/2" rigid conduit (optional WLF for top mounting). Attach to surface using fasteners and sealing washers (by others) appropriate for ceiling materials.

Unit installation — Minimum of two hangers required.

Row installation — Minimum of two hangers required. Recommended 1/2" nipple with union (by others) for DMW.

MOUNTING ACCESSORIES

DIMENSIONS

Inches (centimeters). Subject to change without notice.

A = 11/16 (17) Dia.

ADVENT SPECIFICATION SHEET**HARBOR EXTERIOR WALL
AEW8070****WET****EMR**

Accenting the Harbor half cylinder sconce are two 1/4" x 1/2" vertical and one horizontal decorative bars. The clean lines of this exterior sconce are perfect for multiple applications including offices, retail buildings and health care facilities. Choose from a palette of both painted and metal finishes.

JOB NAME _____

TYPE _____

**Dimensions**

W	H	D	MC
9.0 in	22.0 in	5.0 in	11.0 in
229 mm	559 mm	127 mm	279 mm

Weight

Hanging weight: 25.0 lb (11.4 kg).

Features

- Opal top and bottom lens protects fixture and provides uniform illumination.
- Integral power supply included with low wattage LED lamping. Remote power supply required with high wattage LED lamping.
- VAN option provides solid end caps for a fully enclosed fixture.
- Ballast has minimum start temperature of 0° F, suitable for most exterior applications.
- Interior family fixtures available to carry a consistent lighting design throughout a project.
- Formed opal acrylic lens.

Technical Notes**Electrical**

- ETL listed to UL standards (US and Canada) for use in wet locations.
- Fluorescent versions have integral electronic ballasts utilizing the latest energy-saving technology, providing prolonged lamp life and maintaining consistent color.
- Advent uses strict quality guidelines in LED selection to ensure the white LED's we use meet or exceed ANSI Binning Standards (ANSI C78.733).

Lamping/lamp

- Lamps included, with the exception of T8, T5 and incandescent.
- Published LED luminaire wattages are calculated using a typical power supply efficiency of 89%. Exact wattages may vary based on application.
- Fluorescent lamps are 3500K unless specified.
- L70 life = 50,000 + hours.

Mounting

- Mounts to standard 4" octagonal junction box.

MRW LED

Architectural Wall Sconce

Inverted available with
WLU option only.

Specifications Luminaire

Height: 7-1/4"
(18.4 cm)
Width: 18"
(45.7 cm)
Depth: 9"
(22.8 cm)
Weight: 18 lbs
(8.2 kg)

Optional Back Box (BBW)

Height: 4"
(10.2 cm)
Width: 5-1/2"
(14.0 cm)
Depth: 1-1/2"
(3.8 cm)

Introduction

The classic Architectural Wall Sconce is now available with the latest in LED technology. The result is a long-life, maintenance-free product with typical energy savings of 75% compared to metal halide versions. The integral battery backup option provides emergency egress lighting, without the use of a back-box or remote gear, so installations maintain their aesthetic integrity.

The MRW LED is ideal for replacing existing 50 – 175W metal halide wall-mounted products. The expected service life is 20+ years of nighttime use.

Emergency Battery Operation

The emergency battery backup (ELCW option) is integral to the luminaire - no external housing required! This design provides reliable emergency operation while maintaining the aesthetics of the product.

All ELCW configurations include an independent secondary driver with an integral relay to immediately detect AC power loss. Dual light engines are wired in parallel so both engines operate in emergency mode and provide additional component redundancy. These design features meet various interpretations of NFPA 70/NEC 2008 - 700.16

The emergency battery will power the luminaire for a minimum duration of 90 minutes (maximum duration of three hours) from the time supply power is lost, per International Building Code Section 1006 and NFPA 101 Life Safety Code Section 7.9, provided luminaires are mounted at an appropriate height and illuminate an open space with no major obstructions.

The examples below show illuminance of 1 fc average and 0.1 fc minimum of the single-engine Type IV product in emergency mode.

WST LED 1 10A700/40K SR4
MVOLT ELCW
10' x 10' Gridlines
8' and 12' Mounting Height

NOTES

- MVOLT driver operates on any line voltage from 120-277V (50/60 Hz). Specify 120, 208, 240 or 277 options only when ordering with photocell (PE), fusing (SF, DF), or dual switching (DS).
- May also be ordered separately as an accessory. Ex: WSBBD DDBXD U. Must specify finish.
- Must be ordered with fixture; cannot be field installed.
- Not available with MVOLT option. Button photocell (PE) can be ordered with a dedicated voltage option. Single fuse (SF) requires 120, 277 or 347 voltage option. Double fuse (DF) requires 208, 240 or 480 voltage option.
- Not available with 480V option. Not available with motion/ambient light sensor (PIR).
- Integral battery pack is rated for -20° to 60°C operating temperature. ELCW warranty is 3-year period. Not available with 347V or 480V. Not available with WLU.
- WLU not available with PIR or ELCW.
- Specifies the SensorSwitch SFOD-7-ODP control (photocell included); see Motion Sensor Guide for details. Includes ambient light sensor. Not available with "PE" option (button type photocell). Dimming driver standard. Not available with WLU, VG or WG.
- Provides 50/50 luminaire operation via two independent drivers and light engines on two separate circuits. Not available with one engine, MVOLT, ELCW, WLU, SF, or DF. Must specify voltage; voltage must be the same for both drivers. When ordered with photocell (PE) or motion sensor (PIR), only the primary power source leads will be controlled.

Performance Data

Lumen Output

Lumen values are from photometric tests performed in accordance with IESNA LM-79-08. Data is considered to be representative of the configurations shown, within the tolerances allowed by Lighting Facts.

Light Engines	Drive Current (mA)	Performance Package	System Watts (MVOLT ¹)	Dist. Type	40K (4000K, 70 CRI)				
					Nominal Lumens	B	U	G	LPW
1 (10 LEDs)	700	10A700/-K	24W	SR2	2,005	1	0	1	84
				SR3	2,029	1	0	1	84
				SR4	1,959	1	0	1	82
2 (20 LEDs)	700	10A700/-K	47W	SR2	3,944	1	0	1	84
				SR3	4,028	1	0	1	86
				SR4	3,851	1	0	1	82

1 See electrical load chart for 347/480V system watts.

Lumen Ambient Temperature (LAT) Multipliers

Use these factors to determine relative lumen output for average ambient temperatures from 0-40°C (32-104°F).

Ambient	Lumen Multiplier
0°C	1.10
10°C	1.06
20°C	1.02
25°C	1.00
30°C	0.98
40°C	0.92

Projected LED Lumen Maintenance

Data references the extrapolated performance projections for the **MRW LED 2 10A700** platform in a **25°C ambient**, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate LLF, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other lumen maintenance values, contact factory.

Operating Hours	0	25,000	50,000	100,000
Lumen Maintenance Factor	1.0	0.94	0.88	0.77

Electrical Load

Light Engines	Drive Current (mA)	System Watts	Current (A)					
			120	208	240	277	347	480
1	700	24W	0.24	0.14	0.12	0.1	-	-
		29W ¹	-	-	-	-	0.09	0.07
2	700	47W	0.44	0.27	0.23	0.20	-	-
		53W ¹	-	-	-	-	0.17	0.12

1 Higher wattage is due to electrical losses from step-down transformer.

FEATURES & SPECIFICATIONS

INTENDED USE

The classic architectural shape of the MRW LED was designed for applications such as hospitals, schools, malls, restaurants, and commercial buildings. The long life LEDs and driver make this luminaire nearly maintenance-free.

CONSTRUCTION

The single-piece die-cast aluminum housing integrates secondary heat sinks to optimize thermal transfer from the internal light engine heat sinks and promote long life. The driver is mounted in direct contact with the casting for a low operating temperature and long life. The die-cast door frame is fully gasketed with a one-piece solid silicone gasket to keep out moisture and dust, providing an IP65 rating for the luminaire.

FINISH

Exterior parts are protected by a zinc-infused Super Durable TGIC thermoset powder coat finish that provides superior resistance to corrosion and weathering. A tightly controlled multi-stage process ensures a minimum 3 mils thickness for a finish that can withstand extreme climate changes without cracking or peeling. Standard Super Durable colors include dark bronze, black, natural aluminum, sandstone and white. Available in textured and non-textured finishes.

OPTICS

Precision-molded acrylic lenses are engineered for superior distribution, uniformity, and spacing in wall-mount applications. Light engines are 4000K (70 CRI). The MRW LED has zero uplight and qualifies as a Nighttime Friendly™ product, meaning it is consistent with the LEED® and Green Globes™ criteria for eliminating wasteful uplight.

ELECTRICAL

Light engine(s) consist of 10 high-efficacy LEDs mounted to a metal core circuit board and integral aluminum heat sinks to maximize heat dissipation and promote long life (100,000 hrs at 25°C, L77). Class 2 electronic driver has a power factor >90%, THD <20%. Easily-serviceable surge protection device meets a minimum Category B (per ANSI/IEEE C62.41.2).

INSTALLATION

A universal mounting plate with integral mounting support arms allows the fixture to hinge down for easy access while making wiring connections.

LISTINGS

CSA certified to U.S. and Canadian standards. Light engines are IP66 rated; luminaire is IP65 rated and suitable for wet locations when mounted with the lenses down. WLU option offers wet location listing in "up" orientation. Rated for -30°C minimum ambient.

DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at www.designlights.org to confirm which versions are qualified.

WARRANTY

Five year limited warranty. Full warranty terms located at www.acuitybrands.com/CustomerResources/Terms_and_conditions.aspx.

Note: Actual performance may differ as a result of end-user environment and application. All values are design or typical values, measured under laboratory conditions at 25 °C. Specifications subject to change without notice.

Introduction

The classic Architectural Wall Sconce is now available with the latest in LED technology. The result is a long-life, maintenance-free product with typical energy savings of 75% compared to metal halide versions. The integral battery backup option provides emergency egress lighting, without the use of a back-box or remote gear, so installations maintain their aesthetic integrity.

The MRW LED is ideal for replacing existing 50 – 175W metal halide wall-mounted products. The expected service life is 20+ years of nighttime use.

DESCRIPTION

The IOTA **IIS-125-SM** is a UL Listed stand-alone modified sine wave output inverter designed to provide power to designated emergency lighting fixtures. In a power loss situation, the IOTA **IIS-125-SM** will supply **125W** of power from the onboard battery supply. The IOTA **IIS-125-SM** works in conjunction with incandescent, LED, and fluorescent lamp and fixture types and will automatically run switched, normally-on, or normally-off designated emergency fixtures. The **IIS-125-SM** is ideal for applications requiring an emergency source for lighting arrangements that utilize multiple lamp and fixture types. The **IIS-125-SM** features a surface mount design and comes with a three-year warranty and seven-year pro-rata battery warranty.

SPECIFICATIONS

Input Voltage (Dual) 120/277V, 60Hz
Input Rating (bulk) 150 Watts
Output Voltage (Dual) 120/277V, 60Hz
Output Power 125 Watts (@ .9 leading to .9 lagging PF)
Lamps Operated LED, Fluorescent, Incandescent
Transfer Time less than 50 milliseconds
Emergency Operation 90 minutes
Voltage Regulation (emergency) +/- 10%
Frequency Regulation (emergency) +/- 3%
Load Power Factor Range9 leading to .9 lagging
Operating Temp 20° to 30° C
Battery Valve Regulated Lead Acid (VRLA)
Weight 46.0 lbs.
Approval UL 924 Listed

FIXTURE TYPES

LED
Fluorescent
Incandescent

FEATURES

- Emergency lighting supplied from one convenient source
- Operates incandescent, LED, and fluorescent fixtures including fixtures with dimmable fluorescent ballasts
- Surface mounting design
- Includes momentary contact test switch, yellow ready indicator, green inverter-on indicator, and red charging indicator
- Dual voltage 120/277 60Hz
- Replaceable output fuse protection
- High efficiency modified sine wave inverter
- Variable-rate, temperature-compensated charger
- Valve Regulated Lead Acid (VRLA) battery provides long life and is maintenance free
- Line voltage allows for remote mounting of emergency fixtures at distances up to 1000 feet
- Low Battery Voltage Disconnect
- Line Latch Protection
- Flying Leads for operating switched fixtures
- Meets or exceeds all National Electrical Code and Life Safety Code Emergency Lighting Requirements
- Durable 18-gauge steel housing design with white semi-gloss powder-coat paint finish
- 3/7 Pro-Rata Warranty

CONSTRUCTION

- 18-gauge steel housing

IIS-125-SM SAMPLE SPECIFICATION

Emergency lighting shall be provided by inverter unit equipment designed to operate designated incandescent, fluorescent and LED fixtures on emergency power at their full nominal lumen rating during the full 90-minute emergency discharge cycle. System output will be rated at 125 watts for 90 minutes and provide fused output connections to the load. The system's voltage rating shall be field selectable 120 or 277 VAC input/output.

The inverter unit shall allow for connected emergency fixture(s) to be normally on, normally off, switched or dimmed without affecting lamp operation during a power failure. Upon utility power loss, the inverter unit shall deliver 100% of its rated output to the emergency fixtures regardless of the local switch or dimmer position, and will provide power to emergency fixtures at distances of up to 1000 feet.

The housing shall be designed for surface mount installation requirements and manufactured using 18-gauge steel with a white hammer semi-gloss scratch-resistant baked-on powder coat paint finish.

The unit's electronics shall include a self-contained inverter section with a fully automatic, thermal-compensating variable-rate battery charger, AC lockout feature, low battery voltage disconnect, DC overload, short circuit and brownout protection as standard. The unit shall utilize a sealed lead calcium battery with a 10-year design life. The inverter system shall be UL 924 Listed and labeled. The unit shall be covered under a 3-year warranty on the electronics and battery and a 7-year pro-rata warranty on the battery. It shall meet or exceed the requirements of UL 924, NFPA 101 Life Safety Code, NFPA 70 National Electrical Code, OSHA and State and Local codes.

The inverter unit shall be IOTA Engineering model IIS-125-SM.

TYPICAL WIRING

FLYING LEADS

The additional input leads of the IIS inverter allow for use of switched fixtures on the emergency circuit. When a loss of AC power occurs, the fixtures on the emergency circuit will be powered by the IIS Inverter supply, regardless of switch position.

COOPER LIGHTING - METALUX®**DESCRIPTION**

The energy efficient BE Series features decorative non-luminous end caps for more direct task lighting. The BE with an acrylic prismatic refractor provides an attractive ambience without increasing brightness. BE luminaires offer up, down or combination lighting. The BE Series features wall washing upright, multi-level switching and convenience outlets as available options.

The BE Series features efficiency in a low profile wall bracket. The Series is an excellent choice for dressing rooms, lavatories, hospital and nursing homes, stairways and task lighting.

Catalog #	Type
Project	
Comments	Date
Prepared by	

SPECIFICATION FEATURES**Construction**

Housing die formed code gauge prime cold rolled steel. Channel cover secured by quarter-turn fasteners for easy wiring access. Up, down or combination lighting with 3 or 4 foot fixtures. Decorative opaque injection molded end plates.

Electrical

Ballast are CBM/ETL Class "P" and positively secured by mounting bolts. Pressure lock lampholders. UL/CUL listed. Suitable for damp locations.

Finish

Painted after fabrication. Electrostatically applied baked white polyester powder enamel finish. Multistage cleaning cycle, iron phosphate coating with rust inhibitor. ConveyORIZED application and baking timing accurately controlled at an elevated temperature.

Frame/Shielding

100% virgin acrylic prismatic diffuser. Front of diffuser has inside linear prisms and bottom has pyramidal prisms for low brightness control. Diffuser slides forward for easy installation and maintenance. Uplight diffuser prismatic acrylic.

HAILEY LED

1.25", 2.25", 3.25"

Round Linear LED

RAS | STK | CSS

HAILEY 125 CSS-R

RAS

STK

HAILEY LED combines elegance and efficiency within 1.25", 2.25" and 3.25" housing profiles of heavy duty extruded aluminum.

Variable mounting orientations make HAILEY LED highly adaptable for any interior setting. Rotating functionality (combined with arm, cable or stack mounting) will allow 361° lockable aiming of the lighting optic towards any ceiling, wall or work-plane.

Continuous run installations deliver nearly seamless lines of efficient illumination. Precision-engineered connecting hardware remains invisible within the smooth extruded aluminum housing to insure a smooth, sleek appearance. Choose from a selection of Frosted White, Frosted Clear or Linear Prismatic acrylic lenses.

HAILEY LED: sophistication, versatility and efficiency combined to elevate your specification. Available in 2' to 8' nominal lengths.

 UL and c-UL listed for dry and damp locations.

Made in the USA

FIXTURE SPECIFICATIONS**Construction**

Heavy gauge round extruded aluminum housing. 1/4" thick precision-machined aluminum end-caps. Extruded curved acrylic lenses specifically engineered to heat expand into exact position eliminating light leak.

Finishes

(SC) Satin Clear anodized is standard finish. Other powder coat finishes available. Consult factory for details.

Fixture Length

Fixtures are available in 2', 3', 4', 6' and 8' nominal lengths (6' and 8' not available for 125). Continuous run mounting available featuring internal adjoining mounting hardware enabling straight and precise rows. See installation section for more details.

Mounting Options

(CSS) Cable Suspension System field-adjustable 1/8" aircraft cable, (STK) Stack mount with straight or bent arm options extending as single-sided or double-sided from the stack housing. (RAS) Rotational Arm System accessory provides 361° directional and lockable aiming with all mounting styles. See ordering guide for possible configurations.

LED Light Engine System

LED Light Engines are available as HLO (High Lumen Output) and SLO (Standard Lumen Output) providing efficient illumination. CLO (Custom Lumen Output) allows for end user specified lumen output or tailored wattage consumption for certain models. Consult factory for details.

Dimming

Dimming is available with a variety of control protocols and options. Consult factory for availability and specifications.

Acrylic Lens Options

(FW) Frosted White, (FC) Frosted Clear and (LP) Clear Linear Prismatic.

Custom and Mods

We proudly specialize in manufacturing custom and modified luminaires and have the ability to modify most of our standard fixtures. Please contact factory with any inquiries.

8' to 35' SOFT SQUARE NON-TAPERED ALUMINUM 4-Bolt Anchor Base

Job Name: _____		Client Name: _____	
Job Location - City: _____	State: _____	Created By: _____	Date: _____
Product: _____	Quote: _____	Customer Approval: _____	Date: _____

SPECIFICATIONS

Pole - The pole shaft is extruded from seamless alloy aluminum.

Pole Top - A pole top tenon is provided for top mount luminaire and/or bracket. A removable pole cap is available for poles receiving drilling patterns for side-mount luminaire arm assemblies.

Handhole - A covered handhole with hardware and grounding provision are provided.

Base Cover - Optional Dart Square - 2T cast aluminum and decorative base covers available as special order.

Anchor Base - The anchor base is cast from 356 alloy aluminum. The completed assembly is heat-treated to a T6 temper. Tamper resistant aluminum nut cover discs are included with anchor base unless otherwise specified.

Anchor Bolts - Anchor bolts conform to ASTM F1554 Grade 55 and are provided with two hex nuts and two flat washers. Bolts have an "L" bend on one end and are galvanized a minimum of 12" on the threaded end.

Finish - The standard finish for the pole assembly and components is satin brushed, natural anodize, duranodic or polyester powder applied coating in accordance with Valmont's Specifications. Additional finish options available upon request.

Design Criteria - Please reference Design Criteria Specification for appropriate design conditions.

Poles - Aluminum

- EPA represents the Effective Projected Area of each luminaire. Designs are limited to top mount or side-mount luminaires. Variations from sizes above are available upon inquiry at the factory. Satisfactory performance of poles is dependent upon the pole being properly attached to a supporting foundation of adequate design.
- Structure weight is a nominal value which includes the pole shaft and base plate.
+ Pole includes factory installed vibration damper.

Cree Edge™ Series

LED Area/Flood Luminaire

Product Description

The Cree Edge™ Series has a slim, low profile design. Its rugged cast aluminum housing minimizes wind load requirements and features an integral, weathertight LED driver compartment and high performance aluminum heat sinks. Various mounting choices: Adjustable Arm, Direct Arm, Direct Arm Long, or Side Arm (details on page 2). Includes a leaf/debris guard.

Applications: Parking lots, walkways, campuses, car dealerships, office complexes, and internal roadways

Performance Summary

Patented NanoOptic® Product Technology

Made in the U.S.A. of U.S. and imported parts

CRI: Minimum 70 CRI

CCT: 4000K (+/- 300K), 5700K (+/- 500K) standard

Limited Warranty*: 10 years on luminaire/10 years on Colorfast DeltaGuard® finish

*See www.cree.com/lighting/products/warranty for warranty terms

Product Specifications

CONSTRUCTION & MATERIALS

- Slim, low profile, minimizing wind load requirements
- Luminaire sides are rugged die cast aluminum with integral, weathertight LED driver compartment and high performance heat sinks
- DA and DL mount utilizes convenient interlocking mounting method. Mounting is rugged die cast aluminum, mounts to 3-6" (76-152mm) square or round pole and secures to pole with 5/16-18 UNC bolts spaced on 2" (51mm) centers
- AA and SA mounts are rugged die cast aluminum and mount to 2" (51mm) IP, 2.375" (60mm) O.D. tenons
- Includes leaf/debris guard
- Exclusive Colorfast DeltaGuard® finish features an E-Coat epoxy primer with an ultra-durable powder topcoat, providing excellent resistance to corrosion, ultraviolet degradation and abrasion. Black, bronze, silver, and white are available
- **Weight:** See Dimensions and Weight Charts on pages 1 and 22

ELECTRICAL SYSTEM

- **Input Voltage:** 120-277V or 347-480V, 50/60Hz, Class 1 drivers
- **Power Factor:** > 0.9 at full load
- **Total Harmonic Distortion:** < 20% at full load
- DA and DL mounts designed with integral weathertight electrical box with terminal strips (12Ga-20Ga) for easy power hookup
- Integral 10kV surge suppression protection standard
- To address inrush current, slow blow fuse or type C/D breaker should be used
- **Maximum 10V Source Current:** 20 LED (350mA): 10mA; 20 LED (525 & 700mA) and 40-80 LED: 0.15mA; 100-160 LED: 0.30mA

REGULATORY & VOLUNTARY QUALIFICATIONS

- cULus Listed
- Suitable for wet locations
- Enclosure rated IP66 per IEC 60529 when ordered without P or R options
- Consult factory for CE Certified products
- Certified to ANSI C136.31-2001, 3G bridge and overpass vibration standards when ordered with AA, DA and DL mounts
- 10kV surge suppression protection tested in accordance with IEEE/ANSI C62.41.2
- Meets FCC Part 15 standards for conducted and radiated emissions
- Luminaire and finish endurance tested to withstand 5,000 hours of elevated ambient salt fog conditions as defined in ASTM Standard B 117
- DLC qualified. Exceptions apply when ordered with full backlight control or 3MP optic with 20 LEDs. Please refer to www.designlights.org/QPL for most current information
- Meets Buy American requirements within ARRA

* Electrical data at 25°C (77°F). Actual wattage may differ by +/- 10% when operating between 120-480V +/- 10%

Recommended Cree Edge™ Series Lumen Maintenance Factors (LMF) ¹					
Ambient	Initial LMF	25K hr Projected ² LMF	50K hr Projected ² LMF	75K hr Calculated ³ LMF	100K hr Calculated ³ LMF
5°C (41°F)	1.04	0.99	0.97	0.95	0.93
10°C (50°F)	1.03	0.98	0.96	0.94	0.92
15°C (59°F)	1.02	0.97	0.95	0.93	0.91
20°C (68°F)	1.01	0.96	0.94	0.92	0.90
25°C (77°F)	1.00	0.95	0.93	0.91	0.89

¹ Lumen maintenance values at 25°C are calculated per TM-21 based on LM-80 data and in-situ luminaire testing

² In accordance with IESNA TM-21-11, Projected Values represent interpolated value based on time durations that are within six times (6X) the IESNA LM-80-08 total test duration (in hours) for the device under testing ((DUT) i.e. the packaged LED chip)

³ In accordance with IESNA TM-21-11, Calculated Values represent time durations that exceed six times (6X) the IESNA LM-80-08 total test duration (in hours) for the device under testing ((DUT) i.e. the packaged LED chip)

Photometry

JOB: MU Gunlock Athletic Center
Oxford, OH

BID DATE: 10/29/2015

ENGINEER: Prater Engineering

We are pleased to quote you on the following equipment for the above job subject to approval. Quantities listed are not guaranteed and should be verified. Prices will be adjusted accordingly. This quotation is subject to change without notice and void after 30 days unless otherwise stated below. All Contracts or Orders are subject to acceptance by Blackmore & Glunt, Inc. and are contingent upon non-occurrence of strikes or other delays beyond our control. In addition to prices named herein, you are to pay any applicable sales taxes. This quotation is not eligible for credit card purchase.

Pricing does not include Seismic Certifications or Centers of Gravity unless otherwise stated.

Pricing does not include Motor Starters and/or Variable Frequency Drives with any equipment unless specifically listed.

Terms and Conditions of Purchase

ATTACHMENT "A"

Rev 6/27/08

1. **INTEGRATION:** This Purchase Order (sometimes referred to as a "Purchase Contract"), including all writings attached hereto and writings incorporated herein by reference, if any, is intended by Buyer and Seller as the final, complete and exclusive statement of all of the terms of their agreement respecting the goods identified in this Purchase Order.
2. **NO MODIFICATION:** This Purchase Order may not be amended or modified except in writing signed by both the Buyer and Seller.
3. **NOTICE OF OBJECTION:** Notice is hereby given pursuant to Section 2-207 of the Uniform Commercial Code ("Code") of Buyer's objection to all terms and conditions in addition to and different from these Terms and Conditions which may be contained on the face or reverse side of any quotation, proposal, written acceptance or order confirmation which may be issued by Seller.
4. **VARIATION BY AGREEMENT:** Any of these Terms and Conditions which may conflict with any provision of the Code shall constitute a variation by agreement and take precedence over such provision.
5. **CASUALTY TO GOODS:** Should loss or damage to the goods or any part thereof occur before Buyer takes delivery and possession at the destination stated in this Purchase Order, Seller shall replace the goods or such part thereof as Buyer demands at the destination at no additional cost to the Buyer.
6. **NON-CONFORMING GOODS:** Buyer shall have the absolute right to reject any and all goods which fail in any respect to strictly conform to the requirements of this Purchase Order which right may be exercised by Buyer at any time regardless of any inspection, taking possession of, and payment for such goods by Buyer, none of which acts shall constitute acceptance of such goods by Buyer. Goods which fail to strictly conform to the requirements of this Purchase Order may be accepted by Buyer only by a writing signed by Buyer expressly stating Buyer's acceptance of such goods. Seller shall retain risk of loss for all non-conforming goods and Buyer may, at its option, remove and/or return all rejected goods at Seller's sole cost and expense.
7. **WARRANTY:** Seller warrants the goods will be as specified in the Purchase Order and/or Attachment B of this Agreement, and if no warranty is stated therein, that all goods / equipment will be free from defects in, design, materials or workmanship. Seller shall provide at its cost an in-place repair or replacement of any goods found to be nonconforming and/or defective within one (1) year from date of initial operation or eighteen (18) months from date of shipment, whichever period first expires.
8. **TIME OF ESSENCE:** Time is of the essence in this Purchase Order. All dates and times stated herein by which Seller shall ship and deliver the goods, submit samples, models, drawings and specifications to Buyer, and comply with any Special Instructions shall be strictly adhered to by Seller. Should Seller fail to so adhere to any such date and time requirement or should Buyer deem itself insecure as to Seller's ability to so adhere or otherwise perform its obligations under this Purchase Contract, Buyer shall have the right to require Seller, at Seller's sole cost and expense, to work or cause to be worked overtime or premium time hours and/or to ship the goods by the most expeditious means available as determined solely by Buyer.
9. **TERMINATION:** Buyer shall have the right to terminate this Purchase Order, in whole or in part, at any time, whether for default or without cause. In the event of default the Seller shall be entitled to three days written notice to cure such default, and failing the accomplishment of such a cure, by a second notice immediately terminating Seller's right to proceed. In the event of a non-cause termination a written termination notice shall be given to the Seller and Seller shall immediately cease work hereunder on receipt of such notice. If the goods identified in this Purchase Order are specially manufactured goods, and provided that Seller is not in breach of any duty or warranty of this Purchase Order, Buyer shall pay Seller all actual costs of manufacturing all conforming finished goods in Seller's possession or in shipment and goods in process of manufacture as of the date of Seller's receipt of notice of termination. If the goods are stock goods, rather than specially manufactured goods, and provided Seller is not in breach of any duty or warranty hereunder, Buyer shall only pay to Seller its reasonable re-stocking cost(s). In no event shall Buyer pay Seller or be liable to Seller for loss of any shop absorption, anticipated profits or consequential or incidental damages. In the event this Purchase Order is terminated for default, which shall include, but is not limited to, failure to maintain a solvent financial status, failure to perform or to maintain the ability to perform as required under this Purchase Order and failure to discharge or bond off any mechanics filed by Seller or its lower tier vendors with respect to the Seller's goods and services hereunder on any property of the Indemnified Parties, Seller shall pay all costs, expenses and attorney's fees incurred by the Buyer with respect such default and default termination.
10. **PAYMENT TERMS:** Payment terms shall be Net 45 days from date of delivery, less holdbacks as defined within the Purchase Order schedule of values for items including but not limited to check, test, startup, commissioning, and agreed retention (if any).
11. **DEPOSIT AND CANCELLATION FEES:** To be set forth within the Purchase Order and/or Attachment B of this Agreement.
12. **CHANGES:** Buyer shall have the right to order changes at any time and from time to time in and to the quantity(ies), specifications, drawings, requirements and time for delivery of and for the goods identified in this Purchase Order, and Seller shall comply with all such written orders issued by Buyer. Should any such order(s) cause an increase or decrease in the Purchase price of the goods or the time for Seller's performance of any duty or warranty hereunder, the price and/or time shall be equitably adjusted. No increase in the purchase price of the goods or the time for Seller to perform hereunder shall be binding on Buyer unless and until such change(s) is accepted by Buyer in writing.
13. **INFRINGEMENT PROTECTION:** Seller warrants that it is fully vested with the right to sell and deliver the goods identified in this Purchase Order and that neither the sale of the goods nor their use by Buyer or persons in privity with Buyer shall infringe any patent, license or copyright. Seller shall defend, save harmless and indemnify all entities listed as "Buyer" in this Purchase Order and persons in privity with all entities listed as "Buyer" in this Purchase Order from any and all claims, demands, judgments, liabilities, costs, fees and expenses, including attorneys' fees, arising out of and in connection with any breach of this warranty and any allegation that the sale and/or use of the goods identified in this Purchase Order infringes any patent.

Turner INTERNATIONAL
CORPORATION
ESTABLISHED 1957 **Logistics**
Terms and Conditions of Purchase
ATTACHMENT "A"

Rev 6/27/08

14. **DUTY TO COOPERATE AND INDEMNIFY:** Seller shall fully cooperate with Buyer in prosecuting or defending against any claim(s) against or by any third party(ies) the subject matter of which has to do with the goods identified in this Purchase Order. Additionally, with respect to bodily injury and property damage, the Seller shall, to the maximum extent allowed by law, defend, indemnify and hold harmless the Buyer, the Project site owner and the ultimate user of the goods and their representatives, agents and employees (collectively, the "Indemnified Parties") from and against claims, damages, losses, costs and expenses, including, but not limited to, attorneys' fees, arising out of, resulting from or connected with supply, use or operation of the goods or any defect or deficiency therein including any claim, damage, loss or expense attributable to bodily injury, sickness, disease or death, or to injury to or destruction of property.
15. **COMPLIANCE:** Seller shall fully comply with all laws, rules, ordinances and regulations applicable to and affecting the manufacture, sale, shipment and delivery of the goods identified in this Purchase Order.
16. **NO ASSIGNMENT:** Neither this Purchase Order nor any duty of Seller hereunder may be assigned or delegated without the prior written consent of the Buyer. This provision shall not preclude Seller from procuring mass-produced components and sub assemblies from its long term customary suppliers.
17. **GOVERNING LAW:** This Purchase Order shall be governed by the laws of the state in which the project for which the goods are to be installed.
18. **RIGHTS CUMULATIVE:** These Terms and Conditions are not intended and shall not in any way be construed to limit or restrict, Buyer's rights and remedies at law and in equity, all of which rights and remedies are fully reserved by Buyer. Any failure or forbearance by Buyer to enforce any of these Terms and Conditions or any of its rights and remedies at law or in equity shall not constitute and shall not be asserted by Seller as a waiver or relinquishment by Buyer of any of its rights and remedies under this Purchase Order, at law and/or in equity.
19. **ETHICS:** Buyer has a longstanding reputation for honesty and integrity in its business dealings and for its corporate policies promoting lawful and ethical behavior. Buyer is committed to upholding that reputation and has adopted a Standard of Business Conduct Policy Statement which governs the actions of all of its employees. Pursuant to that Policy Statement, Buyer's employees are prohibited from accepting bribes or kickbacks in any form and, further, are prohibited from accepting goods or services provided by a Seller for the personal benefit of the employee, his or her relatives, or any entity in which the employee or his or her relatives has a personal interest. This prohibition includes, but is not limited to, work performed on an employee's residence and applies regardless of whether the beneficiary of the goods or services pays for them. Therefore, if the Seller offers or provides a bribe or kickback to any employee, or offers or provides goods or services to any employee, his or her relatives, or any entity in which the employee or his or her relatives has a financial interest, the Seller will be considered to be in material breach of this Purchase Contract. Seller undertakes the commitment to advise Buyer of any action by any entity or person associated with the project that Seller believes violates any applicable law, rule or regulation. Seller's violation of any of the foregoing shall be considered as Seller's failure to perform its obligations under the terms and conditions of this Purchase Contract. Such failure shall be considered adequate and justifiable grounds for Buyer to effectuate its rights and remedies under the provisions of Article 9 of this Purchase Contract.

Turner Logistics
Insurance Requirements – Vendor Only
ATTACHMENT “A-1”

Before commencing Work on any Turner Logistics’ project site (including, but not limited to delivery, start-up, testing, commissioning, warranty repair, etc.) this Supplier shall procure and maintain, at its own expense, the following insurance coverages (the “Required Insurance”):

1. WORKERS’ COMPENSATION in accordance with the laws of the State in which the work is situated, and EMPLOYERS’ LIABILITY INSURANCE in the amount of \$1,000,000.
2. COMMERCIAL GENERAL LIABILITY with minimum limits of \$2,000,000 each occurrence/\$2,000,000 general aggregate/\$2,000,000 products and completed operations, subject to the following:
 - a. Limits may be satisfied by the use of a primary and excess policy if needed. All policies including excess policies shall be endorsed to provide that the coverage is primary and non-contributory to any insurance or self-insurance maintained by any additional insured.
 - b. Coverages shall be on the current ISO Occurrence Form and shall include premises operations, blanket contractual liability (for this Purchase Contract), broad form property damage, personal and advertising injury, independent contractor liability, mobile equipment, elevators, damage from explosion, collapse and under-ground hazards (No “XCU” exclusions are acceptable), and cross-liability and severability of interest clauses. This insurance shall include Products and Completed Operations coverage (including any product manufactured or assembled) which Subcontractor agrees to maintain for the period of time until claims are barred under the statute of repose in the state in which the project is located.
 - c. Additional Insured – Vendors using both CG 20 10 10 01 and CG 20 37 10 01, or equivalent naming Turner Logistics, Turner Construction Company, the owner of the project site and such other entities as may be reasonably requested by Turner Logistics, their respective officers, directors, partners, members and employees, as additional insureds. The project/job description and/or description of operations on all certificates, endorsements and other insurance documentation shall read “All Work Performed for the Additional Insureds.”
 - d. The Supplier shall be responsible for, and agrees to pay and/or reimburse Turner Logistics and/or any additional insured, any deductible or self-insured retention under the policies.
 - e. Supplier hereby waives all rights of recovery from Turner Logistics and the additional insureds, including but not limited to rights of subrogation, with respect to any matter, claim or suit that is to be covered by insurance to be maintained by Supplier.
 - f. No exclusionary language or limitations relating to: (1) residential, condominiums, multi-family or multi-unit dwellings; (2) liability arising from terrorism; (3) liability arising from pollution, mold or fungus; or (4) liability arising from the use of EIFS, or similar products.
3. AUTOMOBILE LIABILITY: \$1,000,000 combined single limit for bodily injury and property damage including Owned, non-owned and hired vehicles.

Insurance carriers must have at least a “Best Rating” of “A-” and a Financial Size Category” of VIII” or better as set forth in the most current edition of Best Key Rating Guide, and shall otherwise be acceptable to Turner Logistics. Insurance carriers must be admitted in the State of New York and admitted in the state in which the Work is being performed.

Concurrently with the execution of the Purchase Contract, Supplier shall file with Turner Logistics original certificates of insurance and endorsements showing the Required Insurance to be in force. Certificates of insurance such as “ACORD 25” alone, without the requisite endorsements, are not acceptable to satisfy the provisions of the Required Insurance. All insurance documentation evidencing the Required Insurance shall be sent to:

Turner Logistics
4 Skyline Drive
Hawthorne, NY 10532

SUPPLIER SHALL NOT BE PAID FOR ANY WORK UNLESS AND UNTIL INSURANCE DOCUMENTATION PROPERLY COMPLETED AND EXECUTED HAS BEEN DELIVERED TO AND APPROVED BY TURNER LOGISTICS.

The insurance requirements set forth herein shall in no way limit Supplier’s liability arising out of the work performed under the Purchase Contract or related activities including liability (a) under any indemnification provisions or (b) under any other provisions of the Contract Documents or at law). If Supplier fails to procure, maintain or pay for the Required Insurance, Turner Logistics shall have the right (but not the obligation) to secure same in the name of and for the account of Supplier, in which event, Supplier shall pay the cost thereof and shall furnish upon demand, all information that may be required to procure such insurance. Turner Logistics shall have the right to back-charge Supplier for the cost of procuring such insurance. The failure of Turner Logistics to demand certificates of insurance and endorsements evidencing the Required Insurance or to identify any deficiency in Supplier’s coverage based upon the evidence of insurance provided by Supplier shall not be construed as a waiver by Turner Logistics of Supplier’s obligation to procure, maintain and pay for the Required Insurance. The failure of Supplier to fully and strictly comply at all times with the insurance requirements set forth herein shall be deemed a material breach of the Purchase Contract, and, in addition to other remedies Turner Logistics may have, Supplier shall be liable for all amounts which would have been payable pursuant to the Required Insurance.

The Required Insurance set forth in this insurance section is independent from all other obligations of Supplier under this Purchase Contract, including, without limitation, all indemnification provisions, and shall apply whether or not required by any other provision of this Purchase Contract.

IN THE EVENT THAT THE LAW OF THE STATE IN WHICH THE PROJECT IS LOCATED (OR OTHER APPLICABLE LAW) LIMITS THE ADDITIONAL INSURED COVERAGE THAT TURNER LOGISTICS MAY REQUIRE FROM SUPPLIER, THEN SUPPLIER SHALL BE REQUIRED TO OBTAIN ADDITIONAL INSURED COVERAGE TO THE FULLEST EXTENT OF COVERAGE AND LIMITS ALLOWED BY APPLICABLE LAW AND THIS CONTRACT SHALL BE READ TO CONFORM TO SUCH LAW.

Date: 12/7/2015
Revised Date: PO Issue Date

**SCOPE OF WORK – AHU/DOAS/PDHU
MIAMI UNIVERSITY – Gunlock Family APC
ATTACHMENT “B”
Assigned PO# - 151367-4500003802**

I. General Provisions:

A. Contract Documents:

1. Drawings as prepared by the HOK, Dated: 7/31/2015 .
2. Specifications as prepared by the HOK, Dated: 7/31/2015 .
3. Portions of work as it pertains to below equipment identified within the following "Related Specification Sections":
 - a. General Divisions:
 - i. 01000 General Requirements
 - b. General Division Sections :
 - i. 230100 HVAC General Requirements
 - ii. 230105 HVAC General Provisions
 - iii. 230110 HVAC Manufacturer's Drawings
 - iv. 230593 Testing, adjusting and Balancing
 - c. Product Related Specification Sections:
 - i. 237500 Air Handling Units
 - ii. 239013 Variable Frequency Drives

Insert Supplemental Instructions such as addenda and RFI's here. **Addendum #1 as of 12-7-2015**

Overlapping or conflicting requirements shall be submitted in writing to Turner Logistics for determination but the more restrictive will apply. The vendor shall submit overlaps or conflicts as soon as they are uncovered.

B. Shipping & Schedule Requirements:

1. Equipment shall be delivered FOB Jobsite. Equipment shall be released for fabrication to meet this delivery date. Vendor shall provide notification if there is any impact to delivery date.

Equipment Tags	Qty.	Required Release Date	ROJ
AHU-1	1	12/23/2015	1 st quarter 2016
AHU-2	1	12/23/2015	1 st quarter 2016
AHU-3	1	12/23/2015	1 st quarter 2016
DOAS-1	1	12/23/2015	1 st quarter 2016
PDHU-1	1	12/23/2015	1 st quarter 2016

2. Equipment shall be shipped with firmly attached, clearly visible shipping labels that indicate:
 - name of manufacturer,
 - equipment model number,
 - equipment serial number;
 - purchase order number and
 - equipment ID as tagged in contract documents.
3. Vendor shall include the cost to properly seal and protect the equipment during shipment/transit. Exposed physical utility connections (flanges, pipe ends, etc.) shall be isolated for transport from ambient influences with appropriate blinds, caps or weatherproofing materials.
4. Vendor shall coordinate with Turner Construction Company's Project Team and installing/receiving Subcontractor the

shipping sequence and provide all **final** weights and dimensions of any shipping splits for rigging purposes prior to shipping such equipment. Provide 14-day advance notice to Turner Construction Company Project Team.

5. Equipment manufacturer shall provide all necessary lifting eyes as required to rig equipment in place and provisions to lift into place by crane as required.
6. Provide 48-hour delivery call ahead to **Turner Logistics Manager (Ben Young, Ohio-Field Manager 513-615-0506)**. Failure to notify Turner Logistics could result in storage back charges and/or additional costs to the equipment manufacturer or vendor. Delivery hours are **Tuesday through Thursday, between 8:00AM and 2:00PM**.

C. Submittal/Training Requirements:

1. Vendor shall submit an electronic copy of all factory test reports to the **Turner Logistics Manager (Ben Young, Ohio-Field Manager 513-615-0506)** prior to shipping the equipment, certifying that the units meet the specified performance.
2. Vendor shall provide one (1) copy of the following with their bid submission to the **Turner Logistics Manager (Ben Young, Ohio-Field Manager 513-615-0506, byoung@tcco.com)** for pre-approval:
 - + Shop drawings/Engineering submittals.
 - General equipment layout drawings
 - Bill of Materials
 - + .pdf / .dwg drawings
 - + Sample warranty certificate.
 - + Installation checklist.
 - + A complete C/D/E document for section 237500, 239013 (see word Document)
 - + C – meaning Comply with the specifications
 - + D – Meaning Deviate from the specifications. For clarity this means that the specification can be obtained, but not to the letter of specifications. D – must be explained in the C/D/E Document
 - + E - Meaning Exception from the specifications. For clarity this means that the specification can NOT be obtained and is not included. E – must be explained in the C/D/E Document.

120 hours after NOTICE OF INTENT TO AWARD, vendor shall provide ten (10) copies of the required submittal documents to Turner Logistics Manager (Ben Young, Ohio-Field Manager 513-615-0506, byoung@tcco.com)
3. Engineer/Architect reviewed submittals: Allow four (2) weeks (including mailing processing) for return.
4. O&M Manuals, commissioning, training and start-up schedules including all other remaining submittals shall be issued within four (2) weeks of delivery
5. Warranty certificate and/or commissioning report, as required, shall be issued within one (1) week of completion of start-up/testing/field services.
6. Training and Owner's Acceptance shall be determined upon the project schedule. This date is subject to change.

**D. Project Coordination:**

1. Equipment Supplier shall provide a single point of contact to serve as the project manager for this purchase contract.
2. Project contacts:

Title	Name	Address	Telephone	Email
Turner Project Superintendent				
Turner Project Engineer				
TL Logistics Manager	Ben Young	250 W. Court Street Suite 300 Cincinnati, OH 45202	513-615-0506	byoung@tcco.com
TL Project Engineer	Tamecka StClair	250 W. Court Street Suite 300 Cincinnati, OH 45202	513-639-2201	lstclair@tcco.com
TL Supply Chain Product Manager	David Meyer	4 Skyline Drive Hawthorne, NY 10532	914-593-6540	dsmeyer@tcco.com
TL Accounting Department	Kathy Mitchell	4 Skyline Drive Hawthorne, NY 10532	914-593-6525	kmitchell@tcco.com

E. Schedule of Values:

1. Standard schedule of values:

Confirmed Delivery of Equipment	90% net 45 days
Owner Acceptance of Equipment	10% net 45 days

2. Applications for payment shall be mailed to 4 Skyline Drive, Hawthorne NY 10532, or emailed to tlaccounts payable@tcco.com.

F. Sales Tax:

1. Sales and Use Tax shall not be included. A Resale certificate shall be provided by Turner Logistics.

G. Warranty:

1. Provide Parts Warranty for 1-year from Owner's Acceptance, 11/1/2016
2. Provide extended Compressor Parts warranty as per specifications
3. Installing contractor to provide labor warranty per specifications.

Project Specific Scope of Work:

Vendor shall provide equipment per plans and specifications including but not necessarily limited to the following:

1. The vendor is to provide a BAS communication interface card with this unit. The communication shall be BacNet.
2. Service disconnect (not including VFD) shall be provided by electrical contractor if required by code.
3. Multiple point power connection are required. For example, but not limited to, lights, receptacles, heat wheels, electric heat, etc.
4. All unit controls shall be factory provided. ACTUATORS are provided and installed by the temperature controls contractor.
5. Gas regulator shall be by the installing contractor. Vendor to provide gas pressure and volume requirements.
6. Vendor is required to ship TWO SETS of filters to the project at the CONCLUSION of the project. Filters shipped with the units will not be counted towards the TWO SETS required at project requirements.
7. Vendor to provide spare belts at project conclusion as indicated in the specifications.
8. Unit shall be proposed / fabricated per the contract drawing dimensions.
9. If the unit is shipped in section splits the factory wiring shall be fabricated so as to only have field connections when the unit is assembled, unless the vendor includes field labor to make final connections between shipping splits.
10. Variable frequency drives shall comply with the project specifications and shall not be substituted.
11. Vendor, upon start up is to check gas pressure and calibrate the burner and make adjustments to provide the correct

combustion rate.

H. Negotiations and Clarifications:

1. Addendum #2 has a cost of \$11,000 to increase motor horsepower. This is NOT INCLUDED in the base contract cost and can be accepted up until release at the stated cost.

Definitions:

LEAD – To take charge of and provide necessary labor, materials, testing and coordination among all parties listed. Entity has first and final responsibility that the task is completed.

Assist – To provide support or assistance to the LEAD party. This includes, but is not limited to providing documents to allow the LEAD entity to ensure task completion.

Furnish – To provide materials.

Install – To provide labor and associated miscellaneous items required to install the item.

10/26/15

Project: Miami U Grunlock APC (Innovent AHUs) rev1 Add # 1

ElitAire is pleased to offer the following proposal for the above-mentioned project. Specific important inclusions, exclusions, and clarifications are detailed in this proposal. All equipment includes industry standard parts warranty ending 12 months after equipment startup not to exceed 18 months after shipment.

Important Information

Tag	Qty	Model	Unit Dimensions (inches):			Weight (lb)
			Length	Width	Height	
AHU-1	1	ERU-OU-WH-21200-FF-DX-HG-HP-460	229	116	135	15900
AHU-2	1	ERU-OU-WH-16000-FF-WH-DX-HG-HP-460	264	104	129	14800
AHU-3	1	CAHU-6700-FF-DX-HG-HP-460	364	65	68	8600
DOAS-1	1	ERU-OU-WH-9800-FF-WH-DX-HG-HP-460	278	80	119	12000
NDHU-1	1	ERU-OU-PL-2900-DX-EH-HG-FF-WC-460	274	44	100	5500

Net 45 days

~~Net 30 days~~ - subject to credit approval. No retainages allowed unless expressly agreed to in writing. Refer to the attached Terms and Conditions.

Validity: Pricing is valid for 60 days from the original date of quote. Pricing shall remain valid for equipment shipped within 120 days from date of acceptance. Refer to the attached Terms and Conditions.

Shipment: 12-14 weeks after release based on typical factory loading. Shipment dates are estimates only. F.O.B. Innovent factory. Refer to the attached Terms and Conditions.

For shipments OUTSIDE of the US borders including ocean freight shipments, freight is allowed to the border crossing or shipping docks closest to the manufacturing facility in which the equipment is produced. Coordination of shipment to the final destination point and any associated fees to get equipment to final destination is the responsibility of others. Shipments to mainland Canada are exempt from this policy.

Start-up:

Factory start up is included for all units, unless otherwise noted. Included with the factory start up is an Innovent provided labor warranty for a duration of sixty days from the date of complete mechanical equipment start up. Labor warranty will cover labor provided to diagnose, service, or repair a major mechanical failure. Not included in this labor warranty will be routine service items including, but not limited to typical wear items such as: filter replacements, sheave adjustments, belt replacements, etc.

---- A pre start up checklist shall be provided by the installing contractor to Innovent confirming major items on site are complete including, but not limited to, duct connections, electrical power, water connections, water balance for heat pump units, etc.

---- The completed pre start up checklist must be provided to Innovent a minimum of two 2 weeks prior to any requested and coordinated factory start up.

ElitAire Responsibility Matrix

Equipment	Startup Services	Labor Warranty	VFDs	Disconnects
AHU-1 thru 3, DOAS-1, NDHU-1	YES	NO	YES	YES

AHU-1, 2 and 3

Construction

1. Unit shall be suitable for Indoor installation not on a curb.
2. Welded structural steel base with integral lifting lugs.
3. 2" double-wall steel casing, 22 ga. G90 Galvanized exterior walls, 22 ga. G90 Galvanized interior walls on supply, 22 ga. G90 Galvanized interior walls on exhaust..
4. Casing exterior finish not painted.
5. Floor material 18 ga. G90 Galvanized. Floor finish None.
6. 2" thick 2 lb/ft³ Polyurethane foam insulation.
7. Double-wall insulated doors with stainless steel piano hinges.
8. Casing construction is per Innovent standard construction. Any questions please contact Innovent.
9. Unit to ship in one piece unless otherwise noted.

Supply Air Stream Components

1. MIXING BOX

- A. Fresh air--Inlet duct connection sleeve.
- B. Galvanized steel outside air damper, Parallel galvanized airfoil blades.
- C. Recirc air--Inlet duct connection sleeve.
- D. Galvanized steel recirc air damper, Parallel galvanized airfoil blades.
- E. Accessories:
 1. Floor duct safety grating
- F. Controls:
 1. Damper actuator - modulating with end switch
 2. Damper actuator - modulating with end switch

2. MIXED AIR

3. PANEL FILTER

- A. 2 inch, MERV 8, Panel panel filters, front access rack.
- B. Spare filter media sets (Quantity 2)
- C. Controls:
 1. Dirty filter indicator switch

4. CARTRIDGE FILTER

- A. 12 inch, MERV 13, cartridge filters in a front access rack.
- B. Spare filter media sets (Quantity 2)
- C. Controls:
 1. Dirty filter indicator switch

5. FAN

- A. Plenum type blower
- B. 3 phase TEFC, Premium efficient blower motor.
- C. Blower and motor shall be mounted on a unitary base with 1" SPRING seismic isolators.
- D. Accessories:
 - 1. Tool lockable access door
 - 2. Stands to Raise Fans
 - 3. Shaft Grounding rings on motors 10 HP and larger.

6. FAN MOTOR HEAT

7. DX COIL

- A. DX coil, ARI rated, 3/8" diameter 0.016 thick copper tubes, 0.008 thick aluminum fins, 16 ga galv steel casing, and copper connections. stainless steel IAQ drain pan.

8. HGR COIL

- A. A hot gas reheat coil shall be provided with a three-way, modulating valve.

9. OUTLET

- A. Outlet duct connection sleeve.
- B.

Exhaust Air Stream Components

10. HEAT PUMP SECTION

- A. Integral water source heat pump (WSHP) consisting of: hermetic scroll compressors, air-refrigerant coil, water-refrigerant coil, 4-way reversing valve, suction accumulator, liquid line filter-driers and sumpheaters.
- B. Heat pump units cannot be used for temporary heating or cooling.
- C. A DDC controller will be provided for each circuit. The controller will perform the following functions: control the head pressure valve, limit compressor cycle times, control the 4-way reversing valve, log alarms and protect the compressors.
- D. Air handling units with integral refrigeration components requiring piping splits shall be fully factory piped, charged, tested, and evacuated prior to shipping. After testing is complete, refrigeration system shall be split for shipping, provided with nitrogen charge, and lines capped. Refrigerant for field charging shall be supplied and installed by installing contractor.
- E. Factory water piping provided: Innovent will provide an inlet strainer, flow switch and P/T ports attached to each water/refrigerant HX (one provided for each circuit).

F. **Factory Water Piping:** The factory will provide and install the main header (on any unit with multiple circuits), all circuit piping, and all water piping specialties required for functional operation. **The head pressure valves (one provided for each circuit) are provided by Innovent and factory installed.** All factory water piping must be insulated in the field by the installing contractor after final water balancing and test out.

G. **Accessories:**

1. Heat Pump
2. Water Piping

11. **INLET**

A. Inlet duct connection sleeve.

12. **FAN**

- A. Plenum type blower
- B. 3 phase TEFC, Premium efficient blower motor.
- C. Blower and motor shall be mounted on a unitary base with 1" SPRING seismic isolators.
- D. **Accessories:**
 1. Tool lockable access door
 2. Shaft Grounding rings on motors 10 HP and larger.

13. **OUTLET**

- A. Outlet duct connection sleeve.
- B. Galvanized steel outlet damper, Parallel galvanized airfoil blades.
- C. **Controls:**
 1. Damper actuator - modulating with end switch

Electrical

1. Unit shall be suitable for 460/3/60 electrical power.
2. Non-fused disconnect, single power point connection, NEMA 3R control panel, all power wiring enclosed in conduit. Unit shall be ETL listed as a complete package under UL 1995.
3. Supply fan motor suitable for operation with VFD. VFD with manual bypass, shall be Provided by and installed by Innovent.
4. Exhaust fan motor suitable for operation with VFD. VFD with manual bypass, shall be Provided by and installed by Innovent.
5. Electrical wiring/controls shall be factory tested before shipment.

Controls

1. Unit manufacturer provided complete DDC system factory programmed to accomplish the specified sequence of operation.
2. DDC control system shall be Bacnet MSTP compatible.
3. Accessories:
 - A. Phase/voltage protection (Qty 1)

Misc.

1. Unit Splits: Qty (0)
2. A refrigeration safety controller is included to ensure safe operation of the refrigeration system. A sequence of operation, BOM and wiring schematic for this controller is available upon request. This controller is not customizable or optional.
3. Shrink Wrap
4. 5 Year Compressor Parts Warranty

Comments

1. For DDC controls provided and installed by Innovent, AFMS and CO2 devices are not included unless specifically listed.
2. This quote does not include start-up or owner training services.
3. This quotation assumes all Innovent equipment will be released for production at the same time for delivery at the same time. Partial shipments will incur extra charges.
4. Valves for coils, unless specifically stated otherwise, are not included in this quotation.
5. Casing construction is per Innovent standard construction. Any questions please contact Innovent.
6. Unit to ship in one piece unless otherwise noted.
7. Factory start-up requires 2-3 weeks notification for scheduling.
8. Innovent's standard one year PARTS ONLY warranty is included.

DOAS-1**Construction**

1. Unit shall be suitable for Indoor installation not on a curb..
2. Welded structural steel base with integral lifting lugs.
3. 2" double-wall steel casing, 22 ga. G90 Galvanized exterior walls, 22 ga. G90 Galvanized interior walls on supply, 22 ga. G90 Galvanized interior walls on exhaust..
4. Casing exterior finish not painted.
5. Floor material 18 ga. G90 Galvanized. Floor finish None.
6. 2" thick 2 lb/ft³ Polyurethane foam insulation.
7. Double-wall insulated doors with stainless steel piano hinges.
8. Casing construction is per Innovent standard construction. Any questions please contact Innovent.
9. Unit to ship in one piece unless otherwise noted.

Supply Air Stream Components**1. INLET**

- A. Inlet duct connection sleeve.
- B. Galvanized steel inlet damper, Parallel galvanized airfoil blades.
- C. Controls:
 1. Damper actuator - 2 position

2. PANEL FILTER

- A. 2 inch, MERV 8, Panel panel filters, front access rack.
- B. Spare filter media sets (Quantity 2)
- C. Controls:
 - 1. Dirty filter indicator switch

3. CARTRIDGE FILTER

- A. 12 inch, MERV 13, cartridge filters in a front access rack.
- B. Spare filter media sets (Quantity 2)

4. HEAT WHEEL

- A. Aluminum heat wheel with 3A desiccant sieve coating.
- B. Heat wheel integral purge section.

5. WINTER WHEEL PERFORMANCE

6. MIXING BOX

- A. Fresh air--Inlet duct connection sleeve.
- B. Galvanized steel outside air damper, Parallel galvanized 3-V blades.
- C. Recirc air--Inlet duct connection sleeve.
- D. Galvanized steel recirc air damper, Parallel galvanized 3-V blades.
- E. Accessories:
 - 1. Floor duct safety grating
- F. Controls:
 - 1. Damper actuator - modulating with end switch
 - 2. Damper actuator - modulating with end switch

7. FAN

- A. Plenum type blower
- B. 3 phase TEFC, Premium efficient blower motor.
- C. Blower and motor shall be mounted on a unitary base with 1" Seismic SPRING isolators.
- D. Accessories:
 - 1. Tool lockable access door
 - 2. Shaft Grounding rings on motors 10 HP and larger.

8. FAN MOTOR HEAT

9. DX COIL

- A. DX coil, ARI rated, 3/8" diameter 0.016 thick copper tubes, 0.008 thick aluminum fins, 16 ga galv steel casing, and copper connections. stainless steel IAQ drain pan.

10. HGR COIL

- A. A hot gas reheat coil shall be provided with a three-way, modulating valve.

11. OUTLET

- A. Outlet duct connection sleeve.

Exhaust Air Stream Components

12. HEAT PUMP SECTION

- A. Integral water source heat pump (WSHP) consisting of: hermetic scroll compressors, air-refrigerant coil, water-refrigerant coil, 4-way reversing valve, suction accumulator, liquid line filter-driers and sumpheaters.
- B. Heat pump units cannot be used for temporary heating or cooling.
- C. A DDC controller will be provided for each circuit. The controller will perform the following functions: control the head pressure valve, limit compressor cycle times, control the 4-way reversing valve, log alarms and protect the compressors.
- D. Air handling units with integral refrigeration components requiring piping splits shall be fully factory piped, charged, tested, and evacuated prior to shipping. After testing is complete, refrigeration system shall be split for shipping, provided with nitrogen charge, and lines capped. Refrigerant for field charging shall be supplied and installed by installing contractor.
- E. Factory water piping provided: Innovent will provide an inlet strainer, flow switch and P/T ports attached to each water/refrigerant HX (one provided for each circuit).

F. Factory Water Piping: The factory will provide and install the main header (on any unit with multiple circuits), all circuit piping, and all water piping specialties required for functional operation. The head pressure valves (one provided for each circuit) are provided by Innovent and factory installed. All factory water piping must be insulated in the field by the installing contractor after final water balancing and test out.

G. Accessories:

1. Heat Pump (3x1)
2. Water Piping

13. INLET

A. Inlet duct connection sleeve.

14. PANEL FILTER

- A. 2 inch, MERV 8, Panel filters, side access rack.
- B. Spare filter media sets (Quantity 2)
- C. Controls:
 1. Dirty filter indicator switch

15. OUTLET

- A. Outlet duct connection sleeve.
- B. Galvanized steel outlet damper, Parallel galvanized 3-V blades.

16. FAN

- A. Plenum type blower
- B. 3 phase TEFC, Premium efficient blower motor.
- C. Blower and motor shall be mounted on a unitary base with 1" Seismic SPRING isolators.
- D. Accessories:
 1. Tool lockable access door
 2. Shaft Grounding rings on motors 10 HP and larger.

17. OUTLET

- A. Outlet duct connection sleeve.
- B. Aluminum outlet gravity damper, extruded aluminum blades.

Electrical

1. Unit shall be suitable for 460/3/60 electrical power.
2. Non-fused disconnect, single power point connection, NEMA 3R control panel, all power wiring enclosed in conduit. Unit shall be ETL listed as a complete package under UL 1995.
3. Supply fan motor suitable for operation with VFD. VFD with manual bypass, shall be Provided by and installed by Innovent.
4. Exhaust fan motor suitable for operation with VFD. VFD with manual bypass, shall be Provided by and installed by Innovent.
5. Heat wheel motor provided with VFD. VFD shall be factory wired and installed.
6. Electrical wiring/controls shall be factory tested before shipment.

Controls

1. Unit manufacturer provided complete DDC system factory programmed to accomplish the specified sequence of operation.
2. DDC control system shall be Bacnet MSTP compatible.
3. Accessories:
 - A. Phase/voltage protection (Qty 1)

Misc.

1. Unit Splits: Qty (0)
2. A refrigeration safety controller is included to ensure safe operation of the refrigeration system. A sequence of operation, BOM and wiring schematic for this controller is available upon request. This controller is not customizable or optional.
3. Shrink Wrap
4. 5 Year Compressor Parts Warranty

Comments

1. For DDC controls provided and installed by Innovent, AFMS and CO2 devices are not included unless specifically listed.
2. This quote does not include start-up or owner training services.
3. This quotation assumes all Innovent equipment will be released for production at the same time for delivery at the same time. Partial shipments will incur extra charges.
4. Valves for coils, unless specifically stated otherwise, are not included in this quotation.
5. Casing construction is per Innovent standard construction. Any questions please contact Innovent.
6. Unit to ship in one piece unless otherwise noted.
7. Factory start-up requires 2-3 weeks notification for scheduling.
8. Innovent's standard one year PARTS ONLY warranty is included.

NDHU-1**Construction**

1. Unit shall be suitable for Indoor installation not on a curb..
2. Welded structural steel base with integral lifting lugs.
3. 2" double-wall steel casing, 22 ga. G90 Galvanized exterior walls, 0.040" Aluminum interior walls on supply, 0.040" Aluminum interior walls on exhaust..
4. Casing exterior finish painted Innovent standard gray .
5. Floor material 0.080" Aluminum. Floor finish None.
6. 2" thick 2 lb/ft³ Polyurethane foam insulation.
7. Double-wall insulated doors with stainless steel piano hinges.
8. Casing construction is per Innovent standard construction. Any questions please contact Innovent.
9. Unit to ship in one piece unless otherwise noted.

Supply Air Stream Components**1. INLET**

- A. Inlet duct connection sleeve.

2. PANEL FILTER

- A. 2 inch, MERV 8, Panel panel filters, side access rack.
- B. Spare filter media sets (Quantity 2)
- C. Controls:
 - 1. Dirty filter indicator switch

3. HEAT EXCHANGER

- A. Cross flow flat plate aluminum heat exchanger .
- B. aluminum heat exchanger drain pans.
- C. Galvanized steel Heat exchanger face and bypass dampers with Opposed galvanized 3-V blades.
- D. Controls:
 - 1. Damper actuator - modulating with end switch
 - 2. Damper actuator - modulating with end switch

4. DX COIL

- A. DX coil, ARI rated, 3/8" diameter 0.016 thick copper tubes, 0.008 thick aluminum fins, 16 ga galv steel casing, and copper connections. aluminum IAQ drain pan.

5. MIXED AIR**6. FAN**

- A. Plenum type blower
- B. 3 phase TEFC, Premium efficient blower motor.
- C. Blower and motor shall be mounted on a unitary base with 1" Seismic SPRING isolators.
- D. Accessories:
 - 1. Hi-pro polyester coating
 - 2. Tool lockable access door
 - 3. Stand to Raise Fan
 - 4. Shaft Grounding rings on motors 10 HP and larger.

7. ELECTRIC HEAT

- A. An finned tube electric heater shall be provided with SCR vernier control.

8. HGR COIL

- A. A hot gas reheat coil shall be provided with a three-way, modulating valve.
- B. Accessories:
 - 1. Epoxy Coating

9. OUTLET

- A. Outlet duct connection sleeve.

Exhaust Air Stream Components**10. INLET**

- A. Inlet duct connection sleeve.

11. V-BANK FILTER

- A. 2 inch, Washable, Aluminium panel filters, side access rack.
- B. Controls:
 - 1. Dirty filter indicator switch

12. INLET

- A. Inlet duct connection sleeve.
- B. Aluminum inlet damper, Parallel aluminum airfoil blades.
- C. Accessories:
 - 1. Recirculation damper.
- D. Controls:
 - 1. Damper actuator - modulating with end switch

13. FAN

- A. Plenum type blower
- B. 3 phase TEFC, Premium efficient blower motor.
- C. Blower and motor shall be mounted on a unitary base with 1" Seismic SPRING isolators.
- D. Accessories:
 - 1. Hi-pro polyester coating
 - 2. Tool lockable access door
 - 3. Stand to Raise Fan
 - 4. Shaft Grounding rings on motors 10 HP and larger.

14. OUTLET

- A. Outlet duct connection sleeve.
- B. Aluminum outlet gravity damper, extruded aluminum blades.

15. WCCU SECTION

- A. Integral water cooled condensing (WCCU) section consisting of: hermetic scroll compressors with suction and discharge service valves, sight glass, anti-short cycling control, high and low pressure limits; water to refrigerant condenser coil.
- B. Air handling units with integral refrigeration components requiring piping splits shall be fully factory piped, charged, tested, and evacuated prior to shipping. After testing is complete, refrigeration system shall be split for shipping, provided with nitrogen charge, and lines capped. Refrigerant for field charging shall be supplied and installed by installing contractor.
- C. Factory water piping provided: Innovent will provide an inlet strainer, flow switch and P/T ports attached to each water to refrigerant condenser coil (one provided for each circuit).
- D. Factory Water Piping: The factory will provide and install the main header (on any unit with multiple circuits), all circuit piping, and all water piping specialties required for functional operation. The head pressure valves (one provided for each circuit) are provided by Innovent and factory installed. All factory water piping must be insulated in the field by the installing contractor after final water balancing and test out.
- E. Accessories:
 - 1. Water Piping

POOL UNIT DATA

0.

Electrical

1. Unit shall be suitable for 460/3/60 electrical power.
2. Non-fused disconnect, single power point connection, NEMA 3R control panel, all power wiring enclosed in conduit. Unit shall be ETL listed as a complete package under UL 1995.
3. Supply fan motor suitable for operation with VFD. VFD with bypass, shall be Provided by and installed by Innovent.
4. Exhaust fan motor suitable for operation with VFD. VFD with bypass, shall be Provided by and installed by Innovent.
5. Electrical wiring/controls shall be factory tested before shipment.

Controls

1. Unit manufacturer provided complete DDC system factory programmed to accomplish the specified sequence of operation.
2. DDC control system shall be Bacnet MSTP compatible.
3. Accessories:
 - A. VFD cabinet heating and ventilation kit (Qty 2)
 - B. Phase/voltage protection (Qty 1)

Misc.

1. Unit Splits: Qty (0)
2. A refrigeration safety controller is included to ensure safe operation of the refrigeration system. A sequence of operation, BOM and wiring schematic for this controller is available upon request. This controller is not customizable or optional.
3. Shrink Wrap
4. 5 Year Compressor Parts Warranty
5. 10 Year Parts Warranty on Plate HX

Comments

1. This quote does not include start-up or owner training services.
2. This quotation assumes all Innovent equipment will be released for production at the same time for delivery at the same time. Partial shipments will incur extra charges.
3. Casing construction is per Innovent standard construction. Any questions please contact Innovent.
4. Unit to ship in one piece unless otherwise noted.
5. Valves for coils, unless specifically stated otherwise, are not included in this quotation.
6. Factory start-up requires 2-3 weeks notification for scheduling.
7. Innovent's standard one year PARTS ONLY warranty is included.

Notes/Exclusions to spec section 237500

- Section 2.06.A. Hi pro polyester coating and air dried Heresite coating not included. Hi pro polyester coating on pool unit fan only (NDHU-1).
- Section 2.08.A. AHU-1 and AHU-3 do not have Heat Wheels, so no RA filters are included
- Section 2.08.B. The schedule calls for MERV 13 final filters, which is what we provided before, and the scheduled pressure drops and fan BHPs are based on MERV 13. The pool unit, NDHU-1, only has MERV 8 OA filters.
- Section 2.08.C. The pool unit, NDHU-1, has washable aluminum RA filters, so no spares are included
- Section 2.09.A. The DX coils use 0.008" thick fins, not 0.006".

Exclusions to spec section 250001

--- none

Pricing Information

All prices exclude sales tax

Base bid total net cost based on Add #1 Drawings

\$598,500.00

Add for motor HP revisions required for forthcoming Add # 2 revisions

Add \$11,000.00

This amount is NOT part of the BASE CONTRACT.
It will be a PO MOD if Addendum #2 is accepted.

Purchase orders to multiple entities may be required. Please contact your ElitAire sales representative prior to order issuance for details. Pricing is valid for 60 days.

This proposal includes equipment that is to function as part of an overall mechanical system. This proposal **DOES NOT INCLUDE** services to ensure the functionality and/or warranty of the overall mechanical system.

Only those startup and labor warranty services listed will be provided. Diagnosis and/or warranty identification services are not included and will be billable if requested.

Sincerely,
Christian Holden
Sales Engineer

**INSTALLING SUBCONTRACTOR REQUIREMENTS
REGARDING PRE-PURCHASED EQUIPMENT**

The Provisions/Scopes of Work that apply to the Equipment that is to be Pre-purchased and furnished by TURNER LOGISTICS/BUILDING OWNER are as follows:

The successful Contractor is responsible for the coordination, installation, and all other miscellaneous provisions including, but are not limited to the following:

- Review of all submittals for purposes of coordination with your own work as well as work of others. Notify Turner / TURNER LOGISTICS in writing of any concerns related to this coordination including, but not limited to: location of connections, interfaces with other equipment, number of splits, loose shipped components, size, weight and dimensions of equipment, power requirements, special shipping considerations for rigging, etc.
- The subcontractor must coordinate with the design engineer, field staff and Turner Logistics all concerns with regards to the submittals from the manufacturer. This requirement includes, but is not limited to: pipe size connections, pipe location connections electrical connection location and type of connection, drain routing, any cement pouring concerns, "left-hand"/"right-hand", split considerations or obstructions, etc. that will affect the later installation of Turner Logistics/Owner pre-purchased equipment, etc.
- The subcontractor must notify field staff and Engineer of their concerns and what changes will need to be made. This is necessary before release of equipment can take place. Subcontractor must review "Release to Fabrication matrix" (a one page document that lists MEP equipment and their respective required delivery dates) and must notify the job staff of any changes in required delivery dates.
- Any labor or field costs associated with improperly reviewed submittals by the subcontractor are not chargeable to TURNER LOGISTICS, TURNER, A/E or the Owner.
- Installing contractor is responsible for coordination with all notations in approved submittals that are made by the Engineer.
- Coordinate equipment in terms of piping, electrical, room layout, and clearance requirements. Prior to shipment, verify that final coordination will still accept the pre-purchased equipment that has been approved by the Engineer.
- Witness delivery of equipment to rigger's yard and / or at jobsite. Inspect all equipment prior to unloading and identify in writing and damage observed. Notify TURNER / TURNER LOGISTICS immediately upon discovery of any and all manufacturing flaws, missing components or damaged parts.
- Coordination of freight claims is the responsibility of the receiving/installing contractor; this includes documentation, pictures, and anything and all things necessary to submit and be compensated for the claim from damage during shipment. Once the equipment is removed from the transporting vehicle, any damages not reported are the responsibility of the installing contractor.

Turner - Logistics

- Include storage (per manufacturer's recommendations) on site for all pre-purchased items that are not installed upon arrival.
- Include insurance for equipment while stored on site. Insurance claim deductibles, if any, are the responsibility of the installing contractor.
- Include additional weather protection (in addition to any provided by manufacturer) as required when exterior yard facilities are used.
- Include cleaning of equipment as required before installation and turn-over of such equipment (i.e. - road salt, foreign debris, construction dust).
- Coordinate delivery to the jobsite. Provide hoisting and rigging of equipment into place at jobsite.
- Any installation that requires "shimming", because of installation tolerances, within the guidelines outlined by the manufacturer of the equipment supplied will be the responsibility of the installing contractor.
- Provide proper maintenance of equipment while in use during construction (i.e. - not limited to, temporary construction filters, filter replacement, greasing of bearings, maintaining belts, etc.). Provide all maintenance as required by manufacturer or per the project specification - whichever is more stringent.
- Subcontractor shall review the projects equipment specifications associated with this equipment, including all referenced sections, and include within their price, the furnishing and installing all components not provided by the equipment manufacturer that are required to provide a complete and operational equipment and/or integrated systems. These items include, but are not limited to:
 - Junction boxes, raceway, supports, seismic work, starter/disconnects, roof curbs, vibration isolators, wiring & conduit, controls, identification, insulation, spacers, fittings, gaskets, lugs, bus bar, nuts, bolts, fuses, washers, interface wiring & components, communication interfaces, etc.
- In the event that the Owner/Turner Logistics furnished equipment is not operating correctly, the subcontractor shall support all efforts to diagnose and correct any and all "issues" which may appear during construction as well as during the warranty period. Actual responsibility for paying for corrective measures shall be determined after a thorough review of the "issue" and all understanding of its causes. The subcontractor shall be expected to provide immediate action in assisting project team with establishing corrective measures; this includes providing labor on site.
- During installation and prior to startup, the installing contractor is responsible for diagnosing potential equipment related failures just as though they had purchased equipment.
- ANY vendor start-up costs required prior to the ability to perform a COMPLETE start up (i.e. temporary start up to provide heating or cooling prior to when the project is actually ready) where the building is enclosed, temperature and building controls completed and functional will be at the cost of the installing contractor.

- "It is the responsibility of this installing contractor to coordinate and provide all equipment control set points for the motor / equipment provided in this package to properly maintain, protect and control the equipment as per manufacturer specifications and project design. Vendor is to provide a complete list of coordinated settings for each external controller such as, but not limited to: VFDs, Soft Start Controllers, etc., provided by the vendor. Prior to equipment startup, the installing contractor is to have researched, coordinated and provided the physical input for ALL programmable settings within the controllers. For external controllers provided by others, a published list of programmable control points will be issued to this vendor for their use in assisting with programming the external controllers.
- During the construction period, if construction filters are needed for air handling equipment, these must be provided by the installing subcontractor. Two (2) sets of filters, provided by the vendors, are NOT to be used during construction.
- Perform work and provide assistance during balancing and start-up, commissioning and training. This includes start-up for temporary use as well as final acceptance at the end of the project. Provide documentation of these exercises.
- Installing contractor will allow a window of 8 hours for each AHU / DOAS / PDHU to arrive in full because some items are from an outside vendor supplied to the manufacturer and may ship direct from the outside vendor. Each truck shall be unloaded within 2 hour from arrival at the project site or rigging yard. Truck wait time charges past 2 hours will be the responsibility of the installing contractor. The sections that arrive prior to completion must have complete care and custody by the installing contractor. The installing contractor may, at their own cost, have the AHU / DOAS / PDHU delivered at a rigger's yard, specified and contracted to by the installing contractor.
- Coordination of replacing any "missing" or "damaged" equipment not reported to TURNER / TURNER LOGISTICS is the responsibility of the awarded electrical and mechanical installing subcontractors. Turner Logistics will provide names/contact information if needed.
- The awarded electrical and mechanical contractor will fill out all necessary freight claim forms and submit for record to trucking company/carrier of pre-purchased equipment.
- Coordination Study and Arc Flash study will be provided by the electrical equipment vendor if required by the specifications. Electrical installing contractor to provide all conductor lengths, conductor type, conduit type, utility transformer information, contributing motor load information, etc to allow the study to be performed.
- Installing contractors are responsible for assembly of ALL shipping splits and ship loose items pertaining to the pre-purchased equipment that is being provided / installed. This includes, but is not limited to, electrical connections, starters, VFD's, control circuits, flashings (if exterior), gasketing, linkages, etc.

Parts Warranty will be provided by the vendor for a period of one year after acceptance by owner's acknowledgement and acceptance of completed functional testing. This parts warranty is for the repair and replacement of defective parts / components factory installed in the equipment provided by the vendor. This warranty IS NOT to diagnose problems associated with the SYSTEM operation or abuse during construction.

The installing contractor shall include any and all diagnosing of potentially "failed" or deemed "not working/malfunctioning" equipment during construction and the 1 warranty period. If it is determined that there is a manufacturer's defect in the equipment, Turner Logistics will provide complete assistance with its related Vendor Partner.

Labor Warranty will be provided by the installing contractor for the length of time specified in the contract documents. This labor warranty shall include the removal and replacement of factory installed and field shipped loose items provided by the vendor.

UNIFORM SALES & USE TAX CERTIFICATE—MULTIJURISDICTION

The below-listed states have indicated that this form of certificate is acceptable, subject to the notes on pages 2 - 4. The issuer and the recipient have the responsibility of determining the proper use of this certificate under applicable laws in each state, as these may change from time to time.

Issued to Seller : ElitAire, Inc.

Address: 11325 Reed Hartman Highway, Cincinnati, Ohio 45241

I certify that: _____ is engaged as a registered

Name of Firm (Buyer): <u>Turner Logistics L.L.C</u>	Wholesaler _____
Address <u>4 Skyline Drive</u>	Retailer _____
<u>Hawthorne, NY 10532</u>	Manufacturer _____
	Seller (California) _____
	Lessor (see notes on pages 2 - 4) _____
	Other (Specify) <u>Resale</u>

and is registered with the below listed states and cities within which your firm would deliver purchases to us and that any such purchases are for wholesale, resale, ingredients or components of a new product or service¹ to be resold, leased, or rented in the normal course of business. We are in the business of wholesaling, retailing, manufacturing, leasing (renting) the following:

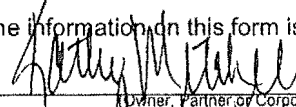

Description of Business: Purchase for Resale Engineered Mechanical & Electrical Equipment and Architectural Products

General description of tangible property or taxable services to be purchased from the seller: _____
