Re: 16-1871-EL-BGN Icebreaker Windpower

Dear Members of the OPSB,

I have been a Union Carpenter and a member of Local 323 for 44 many years. I've seen good times and bad in our State and in Northeast Ohio. When we have our eye on the future we are successful. But when we don't, our jobs vanish, our kids leave for better opportunities and we all suffer.

Today we are moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Whether you see it from the highways, the lake or overhead, it's hard not to be impressed with the stunning skyline of Cleveland and the renaissance across Northeast Ohio. As we've learned, we must grab new opportunities and give them the support they need to thrive.

Icebreaker Wind opens the door to a whole new industry in our region. The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence, clean air and healthier families throughout the Great Lakes.

I support Icebreaker Wind's application and urge you to support its approval.

Sincerely,

2017 MAY 26 PM 3:39

Comment:

Say "NO" to windmill construction in

Lake Erie along PA shoreline because of lasting

negative effects on the water, the windmills very

short life span, & the deadly ^{Chinese sourced} chemical that's present

in each constructed windmill. No study has been done
on the effects on the Lake Erie waters of citizens.

Comment:

Wind turbines should not
be put in Lake Erie. They do
only harm to the environment,
animal/human health, drinking
water quality, the economy E.T.C.
