

THE PUBLIC UTILITIES COMMISSION OF OHIO

IN THE MATTER OF A REQUEST FOR
AN UPGRADE AT THE AKRON BARBERTON
CLUSTER RAILWAY CROSSING AT
CLEVELAND ROAD IN RAVENNA, PORTAGE
COUNTY.

CASE NO. 17-1066-RR-STP

FINDING AND ORDER

Entered in the Journal on June 7, 2017

I. SUMMARY

{¶ 1} The Commission approves the request to upgrade the warning devices at the Cleveland Road grade crossing in Ravenna, Portage County, subject to the Commission's ongoing jurisdiction and oversight.

II. DISCUSSION

A. *Applicable Law*

{¶ 2} R.C. 4905.04 provides that the Commission has statutory authority to regulate and promote the welfare and safety of railroad employees and the traveling public.

{¶ 3} R.C. 4907.471 provides that the Commission is responsible for evaluating public grade crossings to determine the need for installing active warning devices and apportioning the cost thereof.

{¶ 4} R.C. 4907.471 also provides that the Commission is responsible for the administration and implementation of the State Grade Crossing Protection Fund, established to help defray a portion of the public's share of the cost of upgrading warning devices at Ohio's highway-railroad grade crossings.

{¶ 5} Pursuant to Ohio Adm.Code 4901-1-30, any two or more parties may enter into a written stipulation concerning issues of fact.

{¶ 6} Akron Barberton Cluster Railway (ABC) is a railroad as defined in R.C. 4907.02 and subject to the jurisdiction of the Commission under R.C. 4905.04.

B. Procedural Background and Other Details

{¶ 7} On April 14, 2017, Staff filed a memorandum indicating that Staff and ABC entered into a subsidy stipulation (stipulation), whereby ABC will replace all warning devices at the Cleveland Road grade crossing (DOT#262577H) in Ravenna, Portage County. Staff explains that on December 5, 2016, an on-site field review indicated that street improvements proposed for 2017 would involve moving the existing warning devices. Consequently, it was decided to replace all of the warning devices. Staff has agreed to use a combination of new and refurbished materials for the upgrade. Upon approval of the plans and estimates by the Commission, construction may commence.

{¶ 8} The following is a summary of the conditions agreed to by the parties and is not intended to replace or supersede the stipulation. Under the stipulation:

- (a) Within 12 months from the date of the Commission Finding and Order adopting the stipulation, ABC will complete the installation of lights and gates at the Cleveland Road grade crossing in Ravenna, Portage County, using new and refurbished materials;
- (b) The parties agree to comply with the terms of the stipulation and the Finding and Order adopting the stipulation;
- (c) The Commission will provide funds from the State Grade Crossing Protection Fund to cover the Commission's cost of the project.
- (d) The local highway authority shall furnish advance warning signs and pavement markings as specified in the Manual on Uniform Traffic Control Devices and assume all costs to maintain such signage and markings in the future.

- (e) The costs of the project shall be apportioned between ABC, which is responsible for maintenance and for costs exceeding \$196,000, and the Commission, which will provide funding up to \$196,000.

{¶ 9} While actual project design and cost estimates are not yet complete, predesign estimated costs for the project are to be apportioned as follows:

Party to Agreement	Share of costs
ABC	Costs exceeding \$196,000, plus maintenance
Commission	Funding up to \$196,000

{¶ 10} Staff requests a Commission order that adopts the stipulation, directs ABC to submit plans and estimates to the Commission within 90 days, and requires completion of the project within one year.

{¶ 11} Upon review of the stipulation, the Commission finds that the terms and conditions therein insure the timely protection of the public at the crossing and provide a reasonable basis for apportioning costs thereof. Therefore, the stipulation should be approved and, accordingly, the cost of the project should be allocated as set forth therein.

{¶ 12} By September 7, 2017, ABC should submit to Staff the site plans and cost estimates for the project. Within seven days thereafter, ABC should file a letter in this docket advising that the site plans and cost estimates have been submitted to the Commission. Following submission and approval of the site plans and cost estimates, unless otherwise directed, ABC is hereby authorized to acquire project materials and to commence work as detailed in the letter of construction authorization. ABC should notify Staff at least five working days before the date work is scheduled to begin at the project site so that arrangements can be made for inspections. In addition, ABC should notify Staff of any

changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans and estimates, and secure approval before the work is performed. ABC should complete the project by June 7, 2018. The Commission will issue no further construction authorization in this matter.

{¶ 13} Within 120 days of the issuance of this Finding and Order, ABC shall file a notice in the docket that it has initiated discussions with Ohio Edison Company (OEC) and any other applicable utility with regard to the grade crossing project to ensure that electric service will be available to enable the grade crossing improvements to be constructed and placed in service within the deadline specified by the Commission. Such filing shall identify the steps that ABC has taken with OEC and any other applicable electric utility, the government entity, and the local highway authority to have electric service available during the construction and cut-in phases of the project. ABC shall serve a copy of the docketed notice upon OEC and any other applicable utility. To ensure that the deadline is met, ABC and OEC shall timely inform the Commission in writing of any issues regarding the availability of electric service.

{¶ 14} In order to expedite the activation of the warning devices, the Commission no longer requires railroad companies to delay such activation pending the final inspection by Staff. However, ABC should notify Staff 30 days before the projected date of completion. At the time Staff makes its final inspection of the devices and finds that the installation has been completed and the warning devices have been put in service, Staff should file a memorandum in this docket indicating that the installation has been completed and the warning devices have been put in service.

{¶ 15} With the intention of promoting increased public safety during the pendency of this project, the Commission urges the appropriate local government agency to make an immediate assessment of interim physical improvements which would enhance driver awareness at the project crossing. The Commission may provide assistance in funding improvements such as rumble strips, illumination, signs, or other safety enhancements at

the project location. Applications for such funding should be made to the Commission's Transportation Department, Railroad Division, which shall review all proposals. In the event the department finds the improvements appropriate, the department director is hereby authorized to execute a contract with the local government agency and obligate up to \$5,000 from the State Grade Crossing Safety Fund for such improvements at the crossing. However, the local government agency should not initiate any improvements until a contract has been executed.

III. ORDER

{¶ 16} It is, therefore,

{¶ 17} ORDERED, That the subsidy stipulation be adopted and approved. It is, further,

{¶ 18} ORDERED, That, by September 7, 2017, ABC submit to the Commission's Railroad Division site plans and cost estimates for the project, and by September 14, 2017, file a letter in this docket advising that site plans and cost estimates have been submitted to the Commission. It is, further,

{¶ 19} ORDERED, That, following approval of the site plans and cost estimates, ABC proceed with and complete the project by June 7, 2018. It is, further,

{¶ 20} ORDERED, That by October 7, 2017, ABC file notice that it has initiated with OEC and any applicable utility, the process to ensure that electric service will be available at the involved grade crossing as set forth in Paragraph 13. It is, further,

{¶ 21} ORDERED, That ABC notify Staff at least five working days before the date work is scheduled to begin at the project site so that arrangements can be made for any inspection. It is, further,

{¶ 22} ORDERED, That ABC timely notify Staff of any changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans and estimates, and shall secure approval before the work is performed. It is, further,

{¶ 23} ORDERED, That ABC notify the Commission and ORDC 30 days before the projected date of completion. It is, further,

{¶ 24} ORDERED, That, at the time Staff or ORDC makes its final inspection and finds that the installation at the grade crossing is complete and the warning devices have been put in service, Staff will file a memorandum in this docket indicating that the installation is complete and the warning devices have been put in service. It is, further,

{¶ 25} ORDERED, That a copy of this Finding and Order be served upon ABC, OEC, and any other interested person of record.
