Re: 16-1871-EL-BGN Icebreaker Windpower

Dear Members of the OPSB,

I am an apprentice in The United Brotherhood of Carpenters and a member of Local 435. I look forward to being part of the Construction of the Icebreaker Windfarm. It will be a great opportunity to have a good paying job right here in my own backyard.

I am writing to ask you to support Icebreaker Wind's application for approval to move forward with its project to build six wind turbines in Lake Erie north of Cleveland. This project will open the door to thousands of new jobs and will allow me to stay close to home, raise my family and be part of building an exciting future for Northeast Ohio and the entire Great Lakes region.

Building a freshwater wind energy industry will help insure a strong economic future as well as producing cleaner air, healthier families and thousands of jobs for our region's future.

Sincerely, Michael Perry  
MP

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I have been a Union Carpenter and a member of Local 435 for 1 many years. I've seen good times and bad in our State and in Northeast Ohio. When we have our eye on the future we are successful. But when we don't, our jobs vanish, our kids leave for better opportunities and we all suffer.

Today we are moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Whether you see it from the highways, the lake or overhead, it's hard not to be impressed with the stunning skyline of Cleveland and the renaissance across Northeast Ohio. As we've learned, we must grab new opportunities and give them the support they need to thrive.

Icebreaker Wind opens the door to a whole new industry in our region. The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence, clean air and healthier families throughout the Great Lakes.

I support Icebreaker Wind's application and urge you to support its approval.

Sincerely,

CHRIS STINESPRING
