COMMENT DESCRIPTION:

I wanted to make my feelings known on the legislation energy companies are pushing to have more fixed rates for everyone across the board. This type of change would hurt the poorest among us the most and should not be considered. To be clear I am against this type of change and will research anyone associated with passing this bill and will make my feelings know at the ballot box.

COMMENT DESCRIPTION:

RE: 17-32-EL-AIR I am not in favor of boosting electric rates. I live in a condo and have both electric and natural gas service. I am an elderly disabled Senior on a fixed income. I am already at a disadvantage with the base rates on both being fixed costs. I use very little electric and gas but have higher bills than if I had just all electric, as I did in my previous condo. I live alone and conserve energy. I'm below the usage for my type of housing, very efficient compared to similar according to Duke. Any rate increase hurts all Seniors on fixed incomes. Duke has mentioned meter reading. I have a smart meter, they do not come out to read it. They are saving money with this. I feel they're trying to recoup all the money they had to pay out because of their special deals with big companies. Do not grant them a rate increase!
