Re: Cultural Resources Desktop Review
Lemoyne to Midway 138 kV Reconductoring Project
American Transmission Systems, Inc.
Burns & McDonnell Project #95826

Dear Mr. Humphrys:

Burns & McDonnell Engineering Company, Inc. (Burns & McDonnell) was retained by American Transmission Systems, Incorporated (ATSI), a FirstEnergy company, to perform a cultural resources desktop review for the proposed Lemoyne to Midway 138 kilovolt (kV) transmission line reconductoring project (Project) located in Henry, Lucas, and Wood Counties, Ohio (Figure 1). On November 28, 2016, a review of National Register of Historic Places (NRHP) properties, archaeological sites, historic structures, and cemeteries was conducted through the Ohio State Historic Preservation Office (OHPO) online mapping system (Table 1).

Within 1,000 feet of the centerline of the Project, no NRHP properties, 1 cemetery, 20 archaeological sites, and 15 historic structures are recorded (Figure 2). None of the cultural resources are within the 100-foot wide construction corridor.

Sincerely,

A handwritten signature in black ink that reads "Kimberly House". The signature is written in a cursive, flowing style.

Kimberly House
Cultural Resource Specialist
