PUCO

Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH 43215
AEP case number 16-1852-EL-SSO

To Whom it May Concern:

It has come to my attention that due to poor decisions and lack of emphasis on renewable energy resources, the customer charge on our monthly electric bill will increase considerably. I urge the PUCO to acknowledge the impact such an increase will have on Ohio's families. Although my family resides in a relatively comfortable neighborhood, unnecessary and unforeseen hikes in our expenditures can throw off the delicate balance of our family budget. We are not independently wealthy; rather, we try to budget carefully and hope for the best when emergencies arise. We cannot afford random and unnecessary increases to our monthly bills. If we are expected to be responsible and spend within our means, why shouldn't our energy providers also be held accountable? We have upgraded appliances and our HVAC to be more energy-efficient—what has AEP done? How is the PUCO reducing our dependence on fossil fuels in Ohio? Conscionable Ohioans are interested in clean and efficient energy, with an emphasis on renewable resources such as solar energy. I would like to encourage our PUCO and AEP to vigorously pursue such options for our communities, while keeping costs low. Coal is not the answer for our state or our country, and it has been in decline for years. Invest wisely, make responsible choices and eliminate superfluous charges for our families.

Sincerely,

Beth A. Polen

Columbus, Ohio 43215

AEP case number 16-1852-EL-SSO

I am writing you with a concern for my family pertaining the proposed rate increase of our AEP electric bill. My family is on a very fixed budget, due to my husband being disabled and no longer able to work. Then I am a nursing school student that is only able to work part time in order to attend school. This family also has two other children attending college and one still in high school. With this being said, you can see why I am concerned about a rate increase. I know there are other family in the same position or worse off with their finances.

With the rate increase, there will not be any extra money to save for newer more energy efficient appliances. Family's struggle now to keep a roof over head and food on the table, they do not need to figure out how they are going to pay for yet another utility bill. There are more ways to use renewable energy. Ohio is approaching the colder season and we rely on energy to keep us warm. Ohio residents do not need to struggle to pay for that warmth.

Ohio needs to invest into more environment friendly resources. We should be utilizing the solar power that is free and environmentally friendly. There are wind turbines that can be utilized and methane gas from our landfills need to be put to good use instead of wanting to charge consumers more money for the same old system. We cannot rely on coal any more it is harming our environment and it can run out. Please reconsider raising the price of the utilities you provide as we are not able to pay such an increase.

Thank you,

Kira M Evans

Canton OH 44718

AEP

16-1852 - EL-0550

Regarding the proposed increase in the AEP customer charge I am very much against this at this time. As it is we are barely able to afford our utility expenses now. Any increase will result in a large burden that we may not be able to overcome.

A handwritten signature in black ink, appearing to be "G. H. Ho", with a long horizontal flourish extending to the right.

Canton OH 44718

To the Public Utilities Commission of Ohio,

This in regard to AEP case number 16-1852-EL-SSO.

Please do not increase upfront mandatory fixed fees. This is too much of a hardship for those on fixed incomes. It's not fair to have a flat charge no matter how much energy we use.

Monica Coventry

To The Public Utilities Commission of Ohio:

This is in regard to AEP case number 16-1852-EL-SSO

My family is on a budget like most families. When our electric bill goes up it affects the entire family.

When rate increase is not due to amount of electricity my family uses then this rate is out of my control.

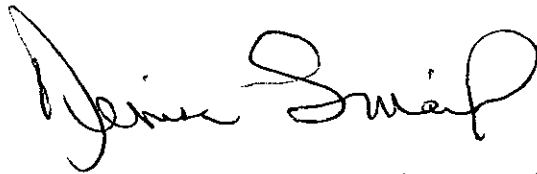

Why should hard working Ohioans pay more for their electric so the shareholders make bigger profits?

When my house needs upgrades or energy efficient appliances, no one else contributes to help fund the projects or items so why should we pay more.

We have upgraded all lighting in our home to energy efficient light bulbs. Refrigerator/freezer is energy efficient. The furnace/air conditioning has been upgraded to a dual stage/variable speed with a DC motor (more energy efficient and a lot less electricity). And we have not seen a decrease in electricity usage/cost since all of this has been done.

AEP expects us to pay more for electricity to help subsidize their plants and to make greedy shareholders happy.

I hope you listen to the people in this matter

To the Public Utilities Commission,

I am greatly concerned that AEP
is proposing to raise our rates. I would
say most people cannot add that
much to their budget a month. I am
a senior citizen and unemployed at
this time. There is no income to
basically double my payment. Perhaps
they need to see where AEP can
cut costs especially in administrative
expenses. Cut their budget.

Thank you,

AEP CASE # 16-1852-EL-SSU

To Whom IT May Concern:

Please be advised, I am opposed to the proposed increase in AEP mandatory residential fixed fees or "customer charges." This proposed increase is unnecessary and eliminates the choices of many AEP customers. Many customers are unable to sustain budgets when significant increases of this nature occur. Further, mandatory charges of this type eliminate funding from consumer households that might be better put to use by purchasing energy efficient appliances or by investing in alternative energy choices.

To whom it may concern,

We as a family believe that our environment and wildlife are among our most precious treasures. We are committed to keeping our country's air, water, and land clean and safe. By working together, we can leave our planet in a better state than we found it.

Using energy efficient utilities would only increase the results to save our planet. By increasing the charges to our electricity will not only hurt everyone financially but it will also discourage others to try harder to be more efficient. What's the point if we try hard and get charged MORE for it. Having large fixed fees will reduce what we can save from making our investments elsewhere in more efficient utilities. This takes away our choice and opportunity to make a difference in a world that is continuously diminishing its resources.

We are committed to making the not only a better place but to also last longer for generations to come. Please consider dropping the fixed fees. Every small step counts.

Sincerely,
Concerned Citizen

I am a retired senior citizen and only have my Social Security check to live on, therefore I budget. My daughter's husband died in 2013 and she moved back in with me, I am 95 years young. Any increase in our utilities put a huge burden on us, even though we share expenses.

I just purchased a new upright freezer and made my decision based on the energy savings and what the emissions due to our air. The Global problem is getting out of hand and something must be done on each of our parts.

I am a big fan of using solar energy for getting electric and any thing you can do to save our planet is top of the list too. We need to conserve our resources, we are old school, we don't have it, then we don't spend it.

Sincerely,

Craig M. Moore

TO K/C E B

Case Number # 16-1852-EL-SSO

We have chosen AEP as our main utility Company because they have always been a reputable, stable, Family home orientated, and affordable Company to use.

I have noticed (we have noticed) The prices keep accumulating. We have talked about switching Companies because of that fact.

We do everything in our power to keep costs down ... We work hard for a living and try to keep our a/c down and heat/dn. We should not have to worry about that! Not to mention ... unplugging appliances ... Turn off lights, Watch how many dishwashings you do ... and The laundry ... Washing machine ... Dryer ... and Showers?!?! We need them daily!

We have bought all light bulbs energy saving.. All appliances ... Stove, Refrigerator, Microwave Washer, Dryer etc ... All energy efficient??!!

What more can we do as consumers?! As Americans?! IT'S A Ripoff = I will → change from AEP / They have let us down!!

AEP Case No. 16-1852-EL-SSO

As is the AEP Charges are too high. The proposed increase in fixed residential Fee will put our household budget out of sync. An increase in AEP fixed charges will mean making reductions either in Budget for Groceries, Medicines or college fee for children. Please do not increase the AEP fixed fee.

RE: AEP Case # 16-1852-EL-SSO

To whom it may concern,

I understand that AEP is considering nearly more than doubling our monthly customer charge. As a family of five, I feel that this increase is excessive and damaging to my family's budget. We have a son with special educational needs and every penny that we can put toward those additional expenses is money well spent. While the current charge may only amount to \$10-20 per month, those expenses add up and over the course of the year represent hours of tutoring that he will not be able to receive. That is a sacrifice that we wish to not have to make.

Please pressure AEP to reconsider this extreme increase in this rate so that families like mine, who already carefully monitor their budgets, can continue to invest in the things which make the most long term impact in the lives of our children.

Many thanks,

New Philadelphia OH 44663

Realizing that our community 8/16/17
wants to make a "Customer Charge"
~~that~~ really hurts because we are
already paying enough. My bill went
up 3\$ just this summer with out
the 119% increase. I'm already
struggling to keep afloat. With a passing
in the family recently its hard to
financially meet our ~~the~~ bills. Barely
managing to make by the last
thing my family needs is for
the AEP Case 16-1852-EL-550
to pocket more money be cause
they are struggling. I'm sure there
is other options and financial cuts
they can make to afford what
they need.

To Public Utilities Commission concerning AEP Case 16-1852-EL-SSO

As a senior who had to retired due to illness and has a spouse working part time to keep up with the increasing cost for our basic needs, an increase the AEP is proposing would put a severe dent in my budget. We are already had a loss of income when I became ill in 2003, my needs are 24 hour a day on oxygen, I have difficulty breathing and therefore we have to run air on the hot humid days. My electric bill has already went from \$70 a month when I first moved to this location and now since we are both here and with my needs which use electric my bill run nearly \$200 or more which I have purchase several energy efficient appliances and my spouse rarely uses the dishwasher to try to lower bill with not much success. I would hate to get to the point where we would not have the ability to pay such large bills. I hope you will consider no large increase for them. We have to cut corners and I believe they should have to find more efficient ways too.

Sincerely,

A handwritten signature in cursive script that reads "David C. Beckley". The signature is written in dark ink and has a fluid, somewhat stylized appearance with a long, sweeping tail on the final letter.

Dear Public Utilities Commission of Ohio:

I'm writing this letter in reference to AEP Case number 16-1852-EL-SSO. My family is on a very tight budget and a large increase in our power bill will be a major hardship for us. The majority of my family is on expensive medicine and an increase in mandatory residential fixed fees, could take from our medical budget.

Additionally, I would much rather see Ohioans spend money on high efficiency appliances and renewable energy sources such as solar panels than give AEP even more money to continue using non-clean energy sources. Ohioans should be focusing on being as efficient as possible and heading in the direction of using more clean energy sources.

Sincerely,

A handwritten signature in black ink, appearing to read "Larry Kilpatrick", with a horizontal line underneath the name.

8/16/17

To: Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH 43215

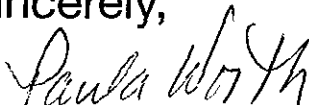

Please consider the impact that coal is having on our environment, our lives, our children's lives and future generations when voting on the proposed AEP increase, case number 16-1852-EL-SSO.

It's important to support clean energy and not fossil fuel energy that will harm our environment with toxic waste, dirty air and water pollution. The proposed AEP customer charge increase that would help to support the use of coal is supporting energy that is toxic to our environment and to us in many ways. We must use clean energy sources for our needs.

The proposed rate increase would also hurt our family financially and add to the difficulties of raising our family.

Our family is asking the commission to support investment in clean energy and to keep our energy costs down.

Thank you.

Sincerely,

To whom it may concern:

I believe a fixed cost that does not add value to the product is just profit taking by AEP. Therefore this fixed cost should not be increased. Green sources of electricity are being used more and more by AEP so the cost of electricity should be coming down as coal is being phased out.

Sincerely,

Tammi Trachsel
918 2nd St. S.W.
New Phila, OH 44663

AEP case number 16-1852-EL-SSO

To whom it may concern:

I have college age kids and the way they abuse electric power this company (AEP) should not need any increase. I should be entitled to a bulk rate discount as should others with teens in their household.

I believe this increase is not warranted due to the fact that even though ~~you~~^{AEP} still uses coal in Ohio for electricity, that use is becoming less & less almost daily due to the purchase of electricity by AEP from green sources at a lower price, and creation of AEP's own green sources, phasing coal out almost entirely sometime in the near future.

Regards, Sincerely,

Dear Public Utilities Commission,

This letter is to oppose AEP case number 16-1852-EL-SSO. As a young couple who just purchased our first home in 2016, we are used to seeing increases in utility bills when moving from an apartment to a home. However, if our AEP bill were to increase by 119%, not only would this put complications on our current lifestyle, but our future plans as well. Our dream is to start a family very soon, but if our AEP bill (which we have no abilities to reduce or control) was to double, our budget would not adequately support our dream and therefore cause us to wait longer to start our family. We all know that life is too precious, and we don't want to wait any longer, but please know that by allowing AEP to increase their rates would significantly impact our lives and what we have been working so hard to achieve.

Sincerely,

Jacob Christ

RE: AEP Case # 16-1852-EL-SSO

To whom it may concern,

I understand that AEP is considering nearly more than doubling our monthly customer charge. As a family of five, I feel that this increase is excessive and damaging to my family's budget. We have a son with special educational needs and every penny that we can put toward those additional expenses is money well spent. While the current charge may only amount to \$10-20 per month, those expenses add up and over the course of the year represent hours of tutoring that he will not be able to receive. That is a sacrifice that we wish to not have to make.

Please pressure AEP to reconsider this extreme increase in this rate so that families like mine, who already carefully monitor their budgets, can continue to invest in the things which make the most long term impact in the lives of our children.

Many thanks,

Jeff Hilperts

RE: AEP Case # 16-1852-EL-SSO

To whom it may concern,

My daddy tells me that AEP is considering nearly more than doubling something called our monthly customer charge. My brother has special educational needs and every penny that our parents can put toward his additional expenses is money well spent. While the current charge may only amount to \$10-20 per month, those expenses add up and over the course of the year represent hours of tutoring that Shep will not be able to receive.

Please don't let AEP make that change to our bill.

Many thanks,

Britton Hilperts
7609 Adcock Road
Westerville, OH 43082

Dear Commission Representative:

A huge monthly increase in our power bill will adversely affect our family's budget. Increasing our monthly expenses for more expensive power will limit our ability to purchase energy saving light bulbs, more energy efficient appliances, and even solar panels on our roof. Our AEP case number is 16-1852-EL-SSO.

Teresa Midkiff

Attn: Public Utilities Commission of Ohio
16-1852-EL-550

My husband and I live conservatively in an all electric, two-story home with 3 teenagers. You can imagine in the winter our electric bill is sometimes as much as a mortgage payment. During the summer months, it drops to as much as a car payment.

It is during those summer months that with what we save enables us to take family vacations, weekend getaways, and some nice dinners out.

A fixed rate will only enhance the chances of us ever getting to do anything besides work. We only want to pay for what it is our family uses... We don't want to pay for everyone else that can't afford it. We are preached to to, even as we were young children to save energy by shutting lights out, no running water while brushing your teeth, running the dishwasher

after 7, not running in and out
and leaving the thermostat alone.
What would we be teaching our
children with a fixed rate?

It's Your job to protect our air,
+ our waters. dumping hazardous
chemicals into them is not the answer.
Charging customers for your mistakes
is not either. We want clean air
and clean water. We want energy
efficient appliances. Your big fixed
rate fees will not allow us to
save for any of that.

CASE# 16-1852-EL-SSO

August 16, 2017

Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH. 43215

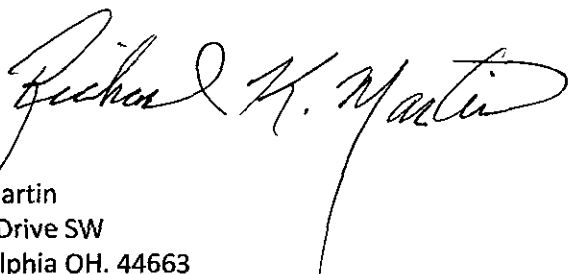

Dear Sirs:

My I live on a very fixed income. I literally watch every penny we spend to assure we have enough to make it through each month. .

Please do not allow American Electric Power to increase mandatory residential fees. With the increases in healthcare, prescription medicine, groceries, etc., this would just add to our hardship.

Thank you.

Sincerely,

Richard K. Martin

Case# 16-1852-96-550

August 16, 2017

Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH. 43215

Dear Sirs:

My husband and I live on a very fixed income. We literally watch every penny we spend to assure we have enough to make it through each month. After I retired following 45-years of working as an Executive Assistant, I was surprised that my Social Security was reduced significantly because I had worked for nine years at a State University while my daughter's were attending college. I had no idea that I would be penalized like that, and it's been a hardship.

Please do not allow American Electric Power to increase mandatory residential fees. With the increases in healthcare, prescription medicine, groceries, etc., this would just add to our hardship.

Thank you.

Sincerely,

Sheila R. Martin

Case# 16-1852-EL-SSO

AEP case number: 16-1852-EL-SSO

Please do not raise our electric bill. Using coal as an energy source is not only unsustainable, but it is also damaging our environment and planet all together. Not only does it damage our planet, but it also damages your own health if exposed to the gasses released from burning the fossil fuel. There are much better options to obtain energy that is sustainable, but it becomes free to harness such as solar, wind and hydroelectric power. I know it may seem expensive to convert to "going green" but it is not impossible to accomplish and it all starts with one or just a few people to speak up and generate the idea into reality. Think about it. Converting to renewable sources of energy has many perks... It's clean, renewable, still makes you money, and it is a great way to gain followers and attention to your company and overall movement into "going green". So think about the idea of switching from coal to other sources of energy. All it takes is for one person to make a difference and that one difference matters. Be the difference that sparks a change in the way our planet is using energy and make the world we live in a better place for the present and the future.

Thank you,

Tanner Fowler

Case # 16-1852-Q-580

AEP case # 16-1832-EL-SSD

TO Public Utilities Commission;

The fixed rate charges are proposed at a ridiculous rate. My electric bill is outrageous! I need to get new windows, doors and some other energy saving improvements for a 46 year old home, yet I can barely pay my electric bill.

AEP is not moving in a positive direction for the future or the present. As a concerned citizen I request that the Public Utilities Commission need to eliminate fixed rate charges.

Thank you

To Whom it May Concern:

Please do NOT consider fixed rate charges in Ohio. I am opposed to AEP case # 16-1852-EL-SSO, as it will especially impact low and middle class citizens of this state.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ginger Coss', written in a cursive style.

AEP Case #16-1852-EL-SSO

Dear Sir or Madam:

I am a consumer of electricity for myself and family. We always conserve and try to always use electricity effectively and responsibly. I cannot agree or go along with an adjustment and a fixed fee is appropriate or sensible when we try so hard to be good consumers of electricity. I have a new home that was expensive to construct and uses the available cost-effective technology to conserve and be a responsible consumer. Additional fees only hamper and lower my ability to stay within my budget - when I have tried so hard to contain them. Thank you for your consideration.

Regards
J. Ross

As a customer of AEP, I disagree with any and all rate hikes proposed by the company. I feel even more strongly about this if the proposed hike is an effort to clear bad debt off of the books stemming from poor or failing business ventures.

To whom it may concern:

Involving AEP case number 16-1852-EL-SSO, I strongly oppose any increase in price made by American Electric Power or any other utility company that will affect my monthly budget, which is stretched far enough as it is.

Sincerely,

A handwritten signature in cursive script that reads "BRichards".

Please reconsider the proposed increase in the monthly customer charge. This increase will adversely affect our household budget, especially as we transition to a fixed retirement income. This increase in mandatory residential fixed fees will take a chunk out of our monthly financial planning.
