Subject: Icebreaker Wind 16-1871-EL-BGN Icebreaker Windpower

The Icebreaker Wind project has been moving forward for well over five years and is now about to become a reality. It is one of the most significant renewable wind power projects ever developed in North America. We absolutely have to support this project since it is the first fresh water wind "farm" ever developed. When and not if this is successful, it can open the door for thousands more fresh water turbines in the Great Lakes. It will help make this region the leader in renewable energy. The world is watching us so lets demonstrate our leadership.
