Notice of Proposed Wind-Powered Utility Facility

Icebreaker Windpower, Inc. is proposing to construct a wind-powered electric generation facility in Lake Erie, Cuyahoga County, Ohio (Icebreaker Wind). The energy generated will deliver power to the existing Cleveland Public Power electric grid, the 138-kilovolt Lake Road Substation. The proposed facility is a 6-turbine demonstration wind facility 8-10 miles off the shore of Cleveland, Ohio, located on approximately 4 acres of leased land, with a total project generating capacity of 20.7 megawatts. An approximately 11.8-mile long transmission cable route would transmit the electricity to the main-land substation. The purpose of Icebreaker Wind would be to demonstrate the use of offshore wind energy in a freshwater environment. The project would generate renewable power that emits no air or climate pollutants and no mercury.

The following map shows the proposed layout of the Icebreaker Wind facility.

Icebreaker Wind has filed an application with the Ohio Power Siting Board (OPSB) for a certificate to construct, operate, and maintain the proposed facility in OPSB Case No. 16-1871-EL-BGN; the application is currently pending before the OPSB.

A local public hearing where the OPSB will accept written or oral testimony from any person will commence at 6:00 p.m. on November 8, 2017, at the Cleveland City Council Chambers, Cleveland City Hall, 2nd Floor, 601 Lakeside Ave. Cleveland, OH 44114. An initial public notice regarding the proposed facility and local public hearing was published in The Plain Dealer on August 26, 2017.

This foregoing document was electronically filed with the Public Utilities

Commission of Ohio Docketing Information System on
