Re: Proposed Wind Turbines for Greenwich Township

I (Sharon) grew up and am part owner of a farm and land in Greenwich Township. Our family has owned, enjoyed, and taken pride in our family farm for nearly 100 years. We, like many other farm families in the area, love the quiet countryside and the beauty God has given us there.

We (Fred and Sharon) are deeply concerned about the changes that would occur with the proposed windpark being built there. We recently drove through parts of Indiana and Illinois where miles of these machines are located. Our thoughts were that the wind turbines looked like "alien beings" marching across the land. Some were located right next to homes. We spoke to people who live there, and their insight was very discouraging. One farm wife, near tears, stated they had taken the beauty of her farm land away.

The lights, sound, and sight of these giant machines will definitely spoil the natural beauty that we currently enjoy. We feel not enough is known about what may happen to these wind turbines in the future as they fall into disrepair or are abandoned. The property values of our land will decrease. We feel the concerns outweigh the benefits. We hope others will take time to consider the negative changes this wind park would bring to Greenwich Township.

Sincerely,

Fred E. Ramsey

Think Greenwich,

Would you buy this house?

Would you like to try to sell this house?

Say **NO** to wind turbines.
