COMMENTS: I would urge the siting board to vote against Project Icebreaker in Lake Erie off the shore of Cleveland, Ohio.

As an avid boater in the area, this wind farm would create a navigation obstacle on Lake Erie. I understand these wind Turbines require a lot of maintenance and that the lake makes that more difficult to do. I am not against alternative power sources, but put them on land where they are easier to maintain and don't ruin Lake Erie.

COMPANY_NAME: Icebreaker Wind Project

CASE_NUMBER: Case no. 16-1871-EL-BGN Icebreaker

COMMENTS: I recently learned of this project and want to register my disapproval.

I am a boater on Lake Erie out of Eastlake, OH. I feel the addition of windmills to the lake will pose several problems for boaters and non-boaters alike.

The lake offers a wonderful view from shore. Stunning sunsets. Imagine a few hundred windmills sticking up spoiling this natural beauty.

Boaters will find the windmills a hazard to navigation. Many accidents have occurred over the years, especially at night. I personally know boaters who have collided with the breakwall and large commercial navigation bouys at night. The windmills will make this far worse due to their number and location.

Wind energy is not viable without government subsidy. The machinery is unreliable...look at the number of windmills regularly not spinning some time. Let's not put a permanent mark on put lake for this.
