I am writing in support of the citizens in beautiful Champaign County. I lived in Champaign county for 39 years. While a resident I was against the wind turbines and still oppose this invasion of the natural beauty of the county. We downsized our home in June 2017 and moved to Greene county to be closer to our daughter. I state this because in the process of selling our home, we were so thankful to be out of the area where the turbines are set to be built. I feel bad for my friend whose home is in the middle of the turbine project. She is devastated. They would like to move but the turbines are such a negative to the value of their home. We were able to move before a wind farm made any impact on our home. I had heard of possible wind farm development in our former area, western Champaign County, and glad we sold before any serious developmental talks began. My husband and I do not oppose green technology. I have often thought, why can't they just take 1% of the money it takes to build a turbine and put a small turbine on every property. I've seen these small turbines on barns, not much bigger than an old windmill water pump. I guess a simple solution sounds too crazy, but what's normal about tearing up rich farmland, affecting people's sleep with turbine noise, and shadow flickers? Nothing. Please put an end to the money grabbing wind farms. As a tax payer, I don't want them to receive a dime of my tax money.

Sincerely, Jane Puckett
