### **Description Information**

I am a farmer in this community, and my family has been doing this work for generations. Farming isn't an easy profession, and many of us are worried about how we are going to keep the agricultural tradition alive. One thing that can help is a bit more economic security for our families. The Republic Wind project (case number: 17-2295-EL-BGN) could provide that kind of security. It won't impact our farming operation, but it will help bring a new stream of constant, reliable revenue to our family. This will help us keep our farm, and it will give my kids a reason to stay here. The way I see it, wind energy is just another crop I can grow on this land. My land is my opportunity to produce something to benefit society, while supporting my family. The Republic Wind farm will allow me to continue working my land so I can keep doing both. I ask that members of the Ohio Power Siting Board support this project and support our farmers.

**Description Information**

As a member of the community, I fully support Republic Wind (case number: 17-2295-EL-BGN) and urge members of the Ohio Power Siting Board to as well. Republic Wind is a major investment in Sandusky and Seneca Counties that will help improve the community for decades to come. Over a 30-year period, the project will deliver over \$50 million in local payments to improve our schools, roads, and entire community. Once completed, Republic Wind will produce clean, low-cost electricity to power approximately 59,000 homes. Its not often a local community gets an opportunity like this. Thats why I support Republic Wind and urge that the Ohio Power Siting Board move this project forward.

### **Description Information**

One of the most important investments we can make is our children. Our kids deserve a high-quality education, and having good schools with adequate resources are pillars to success. That's why I support Republic Wind (case number: 17-2295-EL-BGN). Unfortunately, one of the biggest challenges our schools face is insufficient funding. Luckily, our county has the opportunity right now to get a new, dedicated stream of revenue from the Republic Wind farm. When completed, Republic Wind will deliver about \$36 million to local schools. These resources could be used to hire more teachers, update our equipment, or help fund new facilities. This is a tremendous opportunity for our community. I ask that members of the Ohio Power Siting Board support Republic Wind and support our local schools.

Republic Wind is a major investment in Sandusky and Seneca Counties that will help improve the community for decades to come. Over a 30-year period, the project will deliver over \$50 million in local payments to improve our schools, roads, and entire community. Once completed, Republic Wind will produce clean, low-cost electricity to power approximately 59,000 homes. Its not often a local community gets an opportunity like this. Thats why I support Republic Wind and urge that the Ohio Power Siting Board move this project forward.

### **Description Information**

One of the most important investments we can make is our children. Our kids deserve a high-quality education, and having good schools with adequate resources are pillars to success. That's why I support Republic Wind (case number: 17-2295-EL-BGN). Unfortunately, one of the biggest challenges our schools face is insufficient funding. Luckily, our county has the opportunity right now to get a new, dedicated stream of revenue from the Republic Wind farm. When completed, Republic Wind will deliver about \$36 million to local schools. These resources could be used to hire more teachers, update our equipment, or help fund new facilities. This is a tremendous opportunity for our community. I ask that members of the Ohio Power Siting Board support Republic Wind and support our local schools.

### **Description Information**

I am a farmer (along with being an elected official) in this community, and my family has been doing this work for generations. Farming isn't an easy profession, and many of us are worried about how we are going to keep the agricultural tradition alive. One thing that can help is a bit more economic security for our families. The Republic Wind project (case number: 17-2295-EL-BGN) could provide that kind of security. It won't impact our farming operation, but it will help bring a new stream of constant, reliable revenue to our family. This will help us keep our farm, and it will give my kids a reason to stay here. The way I see it, wind energy is just another crop I can grow on this land. My land is my opportunity to produce something to benefit society, while supporting my family. The Republic Wind farm will allow me to continue working my land so I can keep doing both. I ask that members of the Ohio Power Siting Board support this project and support our farmers.
