**PIR 2364 GRANT AVENUE & 9<sup>TH</sup> STREET**  
**CUYAHOGA FALLS, SUMMIT COUNTY, OHIO**  
**PIPELINE REPLACEMENT PROJECT**

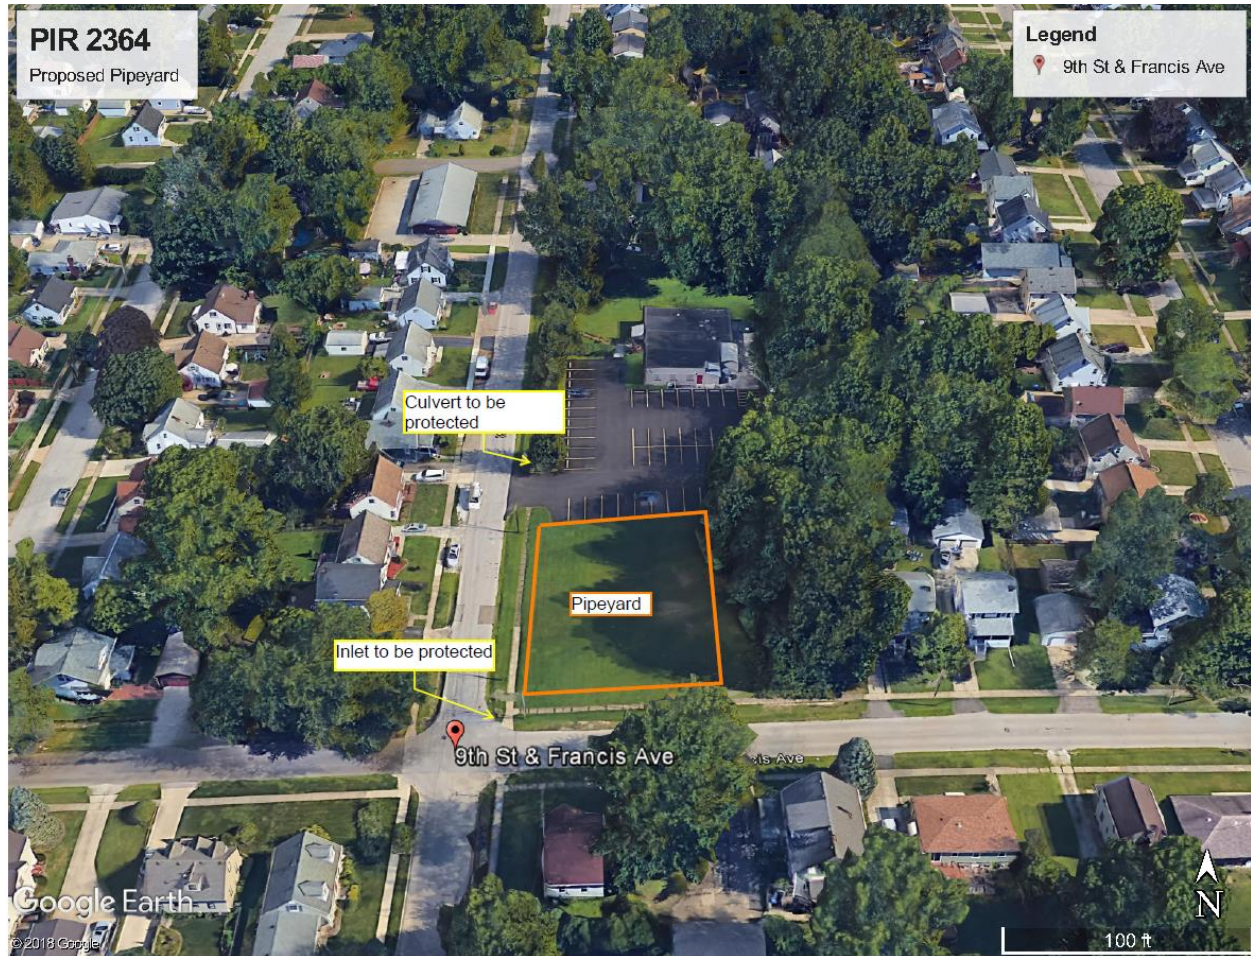

The following information is being provided in compliance with Condition No. 3 of the February 13, 2018 Ohio Power Siting Board (“OPSB”) Staff Report of Investigation, and as agreed to by Dominion Energy Ohio’s (“DEO”) Supplement to Construction Notice filed February 15, 2018.

Condition No. 3 states:

Prior to construction, the Applicant shall submit to Staff, for review and confirmation that it complies with this condition, a project construction plan that provides the specific locations of its laydown areas and is responsive to ODNR concerns about state listed species and ecological areas of significance. If the specific laydown locations chosen appear to have additional adverse impacts, the Applicant shall either propose different specific locations without such impacts, or refile its application.

DEO has now selected its construction contractor, Don Wartko Construction (“Wartko”). Wartko has selected a laydown area that is located at the Italian American Club (northeast corner of 9<sup>th</sup> Street and Francis Avenue) in Cuyahoga Falls, Summit County, Ohio as shown on the map below.

**CASE NO. 17-2337-GA-BNR**  
**PIR 2364 GRANT AVENUE & 9<sup>TH</sup> STREET**  
**CUYAHOGA FALLS, SUMMIT COUNTY, OHIO**  
**PIPELINE REPLACEMENT PROJECT**

Photos and a map are attached for the proposed laydown area located at Italian American Club (northeast corner of 9<sup>th</sup> Street and Francis Avenue).

The lot is mowed grass and has no environmental resources of concern. One inlet is located at the intersection of 9<sup>th</sup> Street and Francis Avenue and a culvert is located on 9<sup>th</sup> Street near the driveway entrance; both areas may need protected throughout use of the pipe yard. Gravel topdressing may also be needed throughout use of the yard to prevent sediment tracking onto the parking lot and road. As long as typical best management practices (“BMPs”) (street cleaning, gravel topdressing and sediment control devices) are utilized, no environmental issues are expected.
