NOTICE OF PROPOSED MAJOR UTILITY FACILITY

Harrison Power Transmission, LLC is proposing to develop, build, and operate the 138 kV Harrison Power Transmission Line (the Transmission Line), an approximately 4.5 mile transmission line to be located in Harrison County, Ohio.

The proposed Transmission Line will connect the proposed natural gas-fired Harrison Power Plant to the electric grid at the existing American Electric Power Nottingham Substation in Athens Township, Harrison County, Ohio. The Nottingham Substation is located approximately 4.5 miles southwest of the Harrison Power Plant, which is to be located in the Village of Cadiz in the Harrison County Industrial Park.

The proposed Transmission Line will consist of approximately 30 tower structures and will traverse previously disturbed area used for surface coal mines that has been reclaimed to vegetated rolling hillsides. The route for the proposed Transmission Line largely follows existing rights of way for electric transmission or natural gas pipelines. A map showing the Preferred and Alternate routes for the Transmission Line is attached with this notice.

Harrison Power Transmission, LLC has filed with the Ohio Power Siting Board (Board or Power Siting Board) an application for a Certificate of Environmental Compatibility and Public Need to construct the Transmission Line in Case No. 17-2084-EL-BTX, which is now pending before the Board. Copies of the Application were served upon the Mayor of the Village of Cadiz, the Harrison County Commissioners, the Cadiz Township Trustees, the Harrison County Community Improvement Corporation, the Harrison Soil and Water Conservation District, the Athens Township Trustees, and the Harrison County Regional Planning Commission. A copy of the Application was also provided to and is available for public review at the Puskarich Public Library.

The Board follows the following criteria for reviewing an application for a major utility facility:

- (1) The basis of the need for the facility if the facility is an electric transmission line or gas pipeline;
- (2) The nature of the probable environmental impact;
- (3) That the facility represents the minimum adverse environmental impact, considering the state of available technology and the nature and economics of the various alternatives, and other pertinent considerations;
- (4) In the case of an electric transmission line or generating facility, that the facility is consistent with regional plans for expansion of the electric power grid of the electric systems serving this state and interconnected utility systems and that the facility will serve the interests of electric system economy and reliability;
- (5) That the facility will comply with Chapters 3704., 3734., and 6111. of the Revised Code and all rules and standards adopted under those chapters and under

sections 1501.33, 1501.34, and 4561.32 of the Revised Code. In determining whether the facility will comply with all rules and standards adopted under section 4561.32 of the Revised Code, the board shall consult with the office of aviation of the division of multi-modal planning and programs of the department of transportation under section 4561.341 of the Revised Code.

- (6) That the facility will serve the public interest, convenience, and necessity;
- (7) In addition to the provisions contained in divisions (A)(1) to (6) of this section and rules adopted under those divisions, what its impact will be on the viability as agricultural land of any land in an existing agricultural district established under Chapter 929. of the Revised Code that is located within the site and alternative site of the proposed major utility facility. Rules adopted to evaluate impact under division (A)(7) of this section shall not require the compilation, creation, submission, or production of any information, document, or other data pertaining to land not located within the site and alternative site.
- (8) That the facility incorporates maximum feasible water conservation practices as determined by the board, considering available technology and the nature and economics of the various alternatives.

The public will be given an opportunity to comment on the proposed Facility. The public hearing for this proceeding shall consist of two parts:

- 1. A local public hearing, pursuant to R.C. 4906.08(C), where the Board shall accept written or oral testimony from any person, commencing on July 19, 2018, at 6:00 p.m., at the Puskarich Public Library, 200 East Market Street, Cadiz, Ohio 43907.
- 2. An adjudicatory hearing to commence on August 1, 2018, at 10:00 a.m., 11th floor, Hearing Room 11-D, at the offices of the Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215.

Petitions to intervene in the adjudicatory hearing will be accepted by the Board up to 30 days following publication of the notice required by Ohio Admin. Code 4906-3-09, or by July 17, 2018, whichever is later. However the Board strongly encourages interested persons who wish to intervene in the adjudicatory hearing to file their petitions as soon as possible. Petitions should be addressed to Docketing Division, Ohio Power Siting Board, 180 East Broad Street, Columbus, Ohio 43215 and cite the above-listed case number.
