

Public comment 17-2295-EL-BGN

I am a resident of seneca county, A tax paying voter of ohio, and i oppose the republic wind farm llc (case number 17-2295-EL-BGN) project. I have educated myself on the issue and have come to the conclusion that the project will have a lasting negative effect on me, my family, and my community for generations. the cost to our community outweighs any speculative benefits. Seneca county is part of scenic ohio and not an industrial zone. I ask that you do not approve this or any industrial wind project in ohio, until the growing health,safety,and trespass zoning issue associated with industrial wind projects are properly addressed. This project and any industrial wind project should be subject to all local township laws before approval. I have chosen to stand with the growing majority in seneca county against these invasive industrial wind projects

Being a small landowner to an adjacent proposed industrial wind turbine in the footprint of the pilot Republic Wind , I oppose this project. My concerns range from the health of both human and wildlife, property values and rights, setback regulations and other adverse effects.
