

**BEFORE
THE PUBLIC UTILITIES COMMISSION OF OHIO**

In the Matter of the APN Starfirst	)	
LP, 2017 Renewable Portfolio	)	Case No. 18-0480-EL-ACP
Standard Status Report	)	

Staff Findings and Recommendations

I. Statutory Background

Amended Substitute Senate Bill 221, of the 127th General Assembly (2008 Ohio Laws S221, effective July 31, 2008), established Ohio's renewable portfolio standard (RPS) applicable to electric distribution utilities and electric service companies. The RPS is addressed principally in Ohio Revised Code (R.C.) 4928.64, with relevant resource definitions also contained within R.C. 4928.01(A).

According to R.C. 4928.64(B)(2), the compliance obligations for **2017** are as follows:

- Renewable Energy Resources = 3.5% (includes solar requirement)
- Solar Energy Resources = **0.15%**

The Public Utilities Commission of Ohio (PUCO or Commission) further developed rules to implement the Ohio RPS, contained within Ohio Administrative Code (Ohio Adm.Code) 4901:1-40.

Ohio Adm.Code 4901:1-40-05(A), states:

Unless otherwise ordered by the commission, each electric utility and electric services company shall file by April fifteenth of each year, on such forms as may be published by the commission, an annual alternative energy portfolio status report analyzing all activities undertaken in the previous calendar year to demonstrate how the applicable alternative energy portfolio benchmarks and planning requirements have or will be met. Staff shall conduct annual compliance reviews with regard to the benchmarks under the alternative energy portfolio standard.

Ohio Adm.Code 4901:1-40-05(C), states:

Staff shall review each electric utility's or electric services company's alternative energy portfolio status report and any timely filed comments, and file its findings and recommendations and any proposed modifications thereto.

The findings and recommendations in this document pertain to the company's compliance status. This document does not address such matters as cost recovery or status relative to the statutory 3% cost provision.

II. Company Filing Summarized

APN Starfirst LP (APN Starfirst or Company) filed its RPS compliance status report for the 2017 compliance year on March 23, 2018. In its compliance filing, APN Starfirst proposed a baseline of 158,495 megawatt-hours (MWHs) which it indicated was an average of its annual Ohio retail electric sales for 2014, 2015 and 2016. Applying the statutory benchmarks to its proposed baseline, APN Starfirst calculated its 2017 compliance obligations to be as follows:

- 238 Solar MWHs
- 5,310 Non-Solar MWHs

The Company indicated that it had obtained the necessary renewable energy credits (RECs) and solar RECs (S-RECs) to satisfy its 2017 compliance obligations. The Company further indicated that it had transferred the necessary RECs and S-RECs to its PJM EIS Generation Attributes Tracking System (GATS) reserve subaccount for Ohio compliance purposes.

III. Filed Comments

No persons filed comments in this proceeding.

IV. Staff Findings

Following its review of the annual status report and any timely comments submitted in this proceeding, Staff makes the following findings:

- (1) APN Starfirst is an electric services company in Ohio with retail electric sales in the state of Ohio during 2017, and therefore the Company had an RPS obligation for 2017.¹

¹ APN Starfirst LP, is certified to provide power marketer services in Ohio; see PUCO Case No. 13-1653-EL-CRS

- (2) The baseline proposed by APN Starfirst is reasonable, and given the proposed baseline and the 2017 statutory benchmarks, APN Starfirst accurately calculated its RPS compliance obligations.
- (3) The Company has transferred 5,350 RECs and 270 S-RECs to its GATS reserve subaccount for 2017 Ohio compliance purposes.
- (4) Following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its non-solar² obligation for 2017. The RECs that the Company transferred to its GATS reserve subaccount were sourced from generating facilities certified by the Commission and were appropriately associated with electricity generated between August 1, 2008, and December 31, 2017.
- (5) Following a review of the Company's reserve subaccount data on GATS, Staff confirmed that the Company satisfied its solar obligation for 2017. The S-RECs that the Company transferred to its GATS reserve subaccount were sourced from generating facilities certified by the Commission and were appropriately associated with electricity generated between August 1, 2008, and December 31, 2017.
- (6) Given the Company's 2017 compliance obligations and the Company's 2017 retirements, the Company retired an excess of 40 RECs and 32 S-RECs.

V. Staff Recommendations

Following its review of the information submitted in this proceeding and other relevant data, Staff recommends the following:

- (1) APN Starfirst is found to have satisfied its 2017 RPS compliance obligations.
- (2) Because APN Starfirst retired more RECs and S-RECs than was necessary to satisfy its 2017 RPS compliance obligations, Staff recommends that the excess detailed above in Finding 6 be applied administratively to the Company's 2018 compliance obligation provided such application is consistent with 4901:1-40-04(D)(3), Ohio Adm.Code.

² Staff uses "non-solar" in this context to refer to the total renewable requirement net of the specific solar carve-out. Staff acknowledges that there is not a specific "non-solar" requirement in the applicable statute.

- (3) For future compliance years in which the Company is utilizing GATS to demonstrate its Ohio compliance efforts, the Company initiates the transfer of the appropriate RECs and S-RECs to its GATS reserve subaccount between March 1st and April 15th so as to precede the filing of their Ohio annual compliance status report with the Commission.
