Decker	Noelle	noelledecker@hotmail.com	740-398-4115	Dear PUCO, For many years I served as a representative payee for individuals that survived off of Social Security income. I can tell you that it is a meager amount in comparison to the true cost of living in the United States. These people were individuals who could not work otherwise. Some were elderly; some developmentally disabled and some who suffered from extreme mental illness. These are the most vulnerable people that exist in our society; who are not capable of earning any other form of income, through no fault of their own. I can tell you that this program assisted nearly

Coincidentally, my father's cousin was visiting when the stroke occurred. Without the landline, my great-aun'ts niece would not have been able to call 911 for help. My husband is a retired minister, having served rural churches in Illinois, Indiana and Ohio. He has witnessed numerous incidents in which an older, as well as a younger disabled person, fell, had a seizure, a heart attack, and other medical emergencies where they could not physically walk to a neighbor for help. Disabled persons, of ALL AGES, are equally vulnerable. These people NEED A LIFELINE and AT&T IS IT, like it or not. Years ago when their landline commercials were more prevalent, they prided themselves on their 'service to the greater

			9378641545	PUCO Voters I am not a senior citizen nor do I currently have loved ones who would be affected by allowing ATT to drop out of the Lifeline Program in Ohio....Yet! None the less, voting to allow ATT to drop out of this program is simply an irresponsible move. The senior citizens of Ohio have spent 20 to 30 years of their lives trying to make Ohio a better place...20 years prior to that learning how to do so! Upon retirement, some of these folks have the financial ability to contract such services. But the majority of these folks, being on a fixed income, cannot afford such services unless they are tied to their phone service. If one looks at mission statements of ATT and PUCO, we see that ATT states in their social responsibilities section of their website: "We're working to improve lives every day through support for our local communities." PUCO's mission statement states: "Our mission is to assure all residential and business consumers access to adequate, safe and reliable utility services at fair prices, while facilitating an environment that provides competitive choices." and you further state that you will accomplish this by: "Mandating the availability of adequate, safe and reliable utility service to all business, industrial and residential consumers." I realize these statements can be interpreted in ways that exclude the LifeLine Program. They even likely did not take it into account since the mission statements were probably developed before the LifeLine Program existed...I don't know. However, the PUCO mission statement
