Subject: Comment on Case No. Case No. 18-0501-EL-FOR for Renewable Energy
Date: Wednesday, October 10, 2018 11:32:28 PM

Dear PUCO Docketing Division,

The science has demonstrated that burning coal leads to death as a result of respiratory illnesses. Burning less coal in Ohio means saving lives. Please support renewable energy in Ohio.

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Douglas Calem

Dear PUCO Docketing Division,

I am especially passionate about this petition and AEP's efforts to provide cleaner air across the state. I lost my father to lung cancer in 2005 as a young child, and wish every day that I could have had him in my life as an adult. I understand that air quality has a direct impact on pulmonary health and that cleaner air could decrease the likelihood of lung diseases across the state. I strongly support this urgent need for a renewable energy program.

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Dear PUCO Docketing Division,

Renewable energy is the best way forward. This will bring jobs for Ohioans, help the environment to heal, and help create a sustainable future. The environment is the most important treasure that we have. Between fracking in Wayne National Forest (and all of South Eastern Ohio, causing devastating effects) and algae blooms in Lake Erie, I have been ashamed at how our state has behaved. Let's put Ohio at the forefront of innovation in sustainable technology. Up with solar power, down with fossil fuels (literally, let's keep them down where they belong)!

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). To: [Puco Docketing](#)
Subject: Comment on Case No. Case No. 18-0501-EL-FOR for Renewable Energy
Date: Wednesday, October 10, 2018 8:54:32 PM

Dear PUCO Docketing Division,

Ohio has been moving backwards when it's come to renewable energy sources. I grew up in Toledo, have lived in Columbus and Dayton, and have worked and hiked across the state. Instead of focusing on renewables and innovation in our energy sector, it seems our state has prioritized the interests of the coal industry and out-of-state fracking companies over our people and precious environment. My home community of Waterville was shaken and stunned when an unpopular and dangerous Nexus pipeline and compressor was approved to run right next to the most densely populated areas of Waterville and Whitehouse (including major schools), under productive agricultural fields, nature reserves and the Maumee river, and through the Lake Erie watershed. Michigan residents who underwent a similar imposition warned us that the jobs would be temporary and filled by outsiders, i.e., people who don't care about our community - they complained of trash, drugs use, and sex crimes stemming from the worker camps. Houses went up for sale. I worry for my parents' safety - the drinking water, the air quality, the danger of their house being in the acute danger zone of the new compressor. They worry they won't be able to sell their house next year, which they've been planning to do since before the Nexus project was approved. The community felt shut out of the decision-making process, as there was one, rushed public meeting that was intentionally not advertised, at a point in the approval process when it didn't matter anyway. My community was duped and the city council and Nexus were able to claim they allowed public opinion. As citizens we should be part of the decision making from the very beginning, without tricks and shadowy agreements. Many people still wonder and have no answer as to how such an unpopular intrusion was approved, and you can be sure this ruins trust.

In the 21st century, we should be well beyond these dangerous shenanigans. We need to put Ohioans and our local ecosystems first - above outside interests, and above financial gain. We need to stop falling for short-term schemes and create a state-wide foundation so that future generations have cleaner, safer energy and a thriving environment. We ought to be setting an example - why aren't we?? We are one of the custodians of the Great Lakes, and the heart and crossroads of our country. Ohioans deserve safe, well-paying jobs that benefit our state. I sincerely hope you see the importance and urgency of these renewable projects, and I also hope to see more of them in the near future.

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

We need more renewable energy sources, but this is a good start!

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

David Brightman

Dear PUCO Docketing Division,

In light of the recent news that climate change will continue to bring more severe storms, flooding, and drought, the time to act is now. Our earth is too breathtakingly beautiful to destroy just so we can power up our machines. Let's be smart and harness our electricity through renewables such as solar!!

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Dear PUCO Docketing Division,

We are long overdue for a shift away from energy sources that have clearly done too much damage to our environment already. President Trump thinks "clean coal" is simply that they wash the coal before burning it - it's up to everyone else to do their part and not let such ignorance destroy what is left of our environment.

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Dear PUCO Docketing Division,

When I was a child I believed I would grow up to have any future I wanted to have. It was bright and full of opportunity. Now, 8 years out of college, I am crushed under the weight of knowing that the planet as we know it may not be habitable for my children and children's children. Every decision is no longer about the future, or about what will make us happy, but about how we will survive. This is the only course forward; it is the only way out. Please make the responsible decision for all our futures. It has been put off by past generations for too long.

Dear Chairman Haque and PUCO Commissioners,

Dear PUCO Docketing Division,

With the obvious climate change increase worldwide in storms, wildfires, droughts, floods etc. it is simply insane to not switch to non-carbon energy sources as quickly as possible. Not only should clean energy sources be approved, but ALL subsidies for carbon based fuels be redirected toward clean energy sources.

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Date: Thursday, October 11, 2018 9:11:32 AM

Dear PUCO Docketing Division,

Please push this renewable energy project forward for the future generations

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Lorna Armstrong

Dear PUCO Docketing Division,

It is so hard to flip a light switch and know that I am helping to belch coal smoke into our atmosphere. I conserve energy in dozens of ways. It is part of my life and what I teach others. It is overtime to move to clean energy. Solar power is a clear cut answer to a serious need. As coal fired plants close and natural gas moves in, it is time to skip forward and prepare for cleaner energy without fossil fuels. I have gardened for dozens of years, intimately involved with seasonal cycles, I see clearly the planet warming. Frosts stop earlier in the spring and oh so much later in the fall. My growing season has expanded and my summers are hotter than ever. Thank God that here in Ohio I don't contend with massive storms, flooding, and wildfires, yet. Do the switch to solar. I will gladly pay higher prices for energy. We need to care about what happens in this world.

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). Subject: Comment on Case No. Case No. 18-0501-EL-FOR for Renewable Energy
Date: Thursday, October 11, 2018 6:05:30 AM

Dear PUCO Docketing Division,

Please allow for this funding. We do as a planet do not have time to be anything other than more sustainable. I am a mother of two who cannot bear the thought of a different world for my children. We do not have time to waste. The more people changing, such as AEP, the higher the hope we have to continue. Please allow for this. My deepest concern,
Chelsey Miller

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.

Ohio has fallen behind neighboring states like Michigan and Indiana. You can help to change that by supporting these projects and helping Ohio to become a clean energy leader in the region.

I urge you to find that there is an urgent need for the AEP renewable energy projects and to approve them.

Sincerely,

Chelsey Miller

Date: Thursday, October 11, 2018 5:23:06 AM

Dear PUCO Docketing Division,

As a 23-year resident of Appalachian Ohio, I understand the importance of energy to the livelihoods of the region. This installation will support these livelihoods through the creation of skilled manufacturing work, even as it diversifies Ohio's energy production. At the same time, it will improve our environmental quality in terms of air, water, and long-term climate. I would be proud to know that my state is leading the transition to renewable energy, and look forward to seeing the benefits of this project throughout my lifetime.

Dear Chairman Haque and PUCO Commissioners,

I am writing to urge you to support AEP's proposed renewable projects (and ask that my comment be docketed in Case No. 18-0501-EL-FOR). We need the jobs that these projects will bring to our communities, we want cleaner air and water for our families, and we want to benefit from the lower energy costs that come with renewable development.
