**DOMINION ENERGY OHIO’S  
SECOND SUPPLEMENT TO LETTER OF NOTIFICATION**

---

On October 9, 2018, the Ohio Power Siting Board Staff issued its Staff Report, which contains the seven conditions listed below:

- (1) The pipeline shall be installed on the route presented in the application, which includes installation of the pipeline under roadside culverts via conventional or directional boring, and open cut trenching around the culvert on Buckland-Holden Road. If the Applicant, in consultation with the Auglaize County Engineer's Office, determines that another installation method or route would be preferable in vicinity of existing culverts, the Applicant shall make an appropriate certificate application with the Board at that time.
- (2) Prior to the commencement of construction activities in areas that require permits or authorizations by federal or state laws and regulations, the Applicant shall obtain and comply with such permits or authorizations. The Applicant shall provide copies of permits and authorizations, including all supporting documentation, to Staff within seven days of issuance or receipt by the Applicant.
- (3) Prior to commencement of any construction, the Applicant shall prepare a residential landscape restoration plan that addresses impacts to mature residential screening vegetation. Where appropriate, the plan shall focus on the installation of new compatible vegetation. The Applicant shall consult with affected property owners in the development of this plan and provide the plan to Staff for review and confirmation that it complies with this condition.
- (4) The Applicant shall adhere to seasonal cutting dates of October 1 through March 31 for removal of any trees greater than three inches in diameter, unless coordination with the Ohio Department of Natural Resources (ODNR) and the U.S. Fish and Wildlife Service allows a different course of action.
- (5) Prior to construction, the Applicant shall submit to Staff, for review and confirmation that it complies with this condition, a project construction plan that provides the specific locations of its laydown areas and is responsive to ODNR

concerns about state listed species and ecological areas of significance. If the specific laydown locations chosen appear to have additional adverse impacts, the Applicant shall either propose different specific locations without such impacts, or refile its application.

- (6) The Applicant shall provide to Staff for review a frac-out contingency plan detailing monitoring, environmental specialist presence, containment measures, clean-up, and restoration prior to construction in the sections of the pipeline crossing culverts if the Applicant chooses to utilize horizontal directional drilling methods underneath the culverts.
- (7) The Applicant shall avoid construction in lark sparrow habitat during the species' nesting period of May 1 through June 30, unless coordination with the ODNR allows a different course of action.

By this submission, Dominion Energy Ohio (“DEO”) incorporates the above conditions as the second supplement to its Letter of Notification filed September 17, 2018, and requests that this second supplement be considered part of DEO’s application.

Respectfully submitted on behalf of,  
DOMINION ENERGY OHIO
