Understanding My Score

D&B's Credit Limit Recommendation is intended to help you more easily manage your credit decisions. It provides two recommended dollar guidelines:

A conservative limit, which suggests a dollar benchmark if your policy is to extend less credit to minimize risk.

An aggressive limit, which suggests a dollar benchmark if your policy is to extend more credit with potentially more risk.

The dollar guideline amounts are based on a historical analysis of credit demand of customers in D&B's U.S. payments database which have a similar profile to your business.

Exhibit D-1 "Operations"

Eco-Energy Natural Gas will market natural gas as a licensed CRNGS in the competitive retail markets. Eco-Energy Natural Gas's plans to serve the retail market include the contracting of natural gas purchases and the nomination and scheduling of retail natural gas for delivery.

It is Eco-Energy Natural Gas's plans to take over current natural gas operations of licensed CRNGS holder, Eco-Energy, LLC. The same team currently running natural gas operations for Eco-Energy, will continue to operate under Eco-Energy Natural Gas. All natural gas contracts and assets will be assigned to Eco-Energy Natural Gas. The company has spent the necessary time and resources to cultivate an experienced top-notch natural gas team with over 20 years of combined experience in marketing natural gas. As the company builds out this newer entity, the same attention will be given to ensure that the highest ethics and reputation are maintained. The operations are under the oversight of the company's key officers and Board of Directors who will ensure that all business is transacted to the highest standards.

The company will mainly target large industrial consumers who are seeking a low cost-highly efficient option for the natural gas supply to their facilities. The company has leveraged existing business contacts with whom we have conducted business in the biofuels segment of our business model, as well as natural gas contacts from our team members previous years of experience. Many of these contacts include various refineries and ethanol facilities which are users of natural gas. Eco-Energy Natural Gas will be linking production from the Marcellus and Utica Shale directly to large end users.
