

Hello, I want to make this very clear. We have a few young children attending Seneca East Public School. One of which has been diagnosed with sensory processing disorder. My wife and I have spent a significant amount of time and money to help Nolan, 1st grade, accel in school without an IEP. He has achieved all the requirements at the first grade level and working into advanced learning. My daughter, Nora, 5th grade is a straight A student reading at the 11 grade level. If the proposed wind turbines are erected around Seneca East School and they have a negative affect on the students. We WILL take legal actions towards the OPSB and every member that approves this project. We have the means to do this. Over a dozen 648 ft turbine within 2 miles! Would you want your children in that type of learning environment! Shadow flicker and within the a cause zone for infrasound levels during the teaching hours. No one should be subject to these conditions. We expect you to reject this project for our children's future. This is a promise to take action for our youth,

Doug Kelley
